AFFIDAVIT OF CLAY M. ROTH

STATE OF TEXAS \$

COUNTY OF HARRIS \$

BEFORE ME, the undersigned authority, on this day personally appeared Clay M. Roth and, being by me first duly sworn, declared the following:

- 1. My name is Clay Roth. I am over 18 years of age, of sound mind, have never been convicted of a felony or other crime involving moral turpitude, and am otherwise capable of making this affidavit. The statements in this affidavit are true and correct and within my personal knowledge.
- 2. I am a licensed Texas Certified General Real Estate Appraiser and a Managing Director in the Houston office of Colliers Valuation & Advisory Services, with offices at 1233 West Loop South, Suite 900, Houston, Texas 77027. I have been licensed as a Certified General Real Estate Appraiser for many years and hold a current certification.
 - 3. I am a member of the Appraisal Institute and hold the MAI designation.
- 4. I am fully familiar with the conditions of the real estate market in Houston, Texas. For over 30 years, I have appraised real property throughout Houston, including multifamily properties. During my career, I have appraised hundreds of multifamily properties throughout Houston and hundreds of multifamily properties throughout the State of Texas. I also have resided in Houston for over 35 years.

- 5. I was engaged in November 2023 by Chris Alfaro, MAI, AI-GRS, Director & Chief Appraiser of Multifamily Appraisals at Freddie Mac to appraise the Virtuo Med Center Apartments located at 7110 Ardmore Street, Houston, Texas 77054 (the "Property").
- 6. In connection with the appraisal, I prepared a report containing a detailed description of the appraisal process, subject and market data, and valuation analyses. A true and correct copy of the appraisal report dated December 19, 2023 is attached to this affidavit as Exhibit 1 and incorporated by reference.
- 7. In my professional and unbiased opinion, as of November 28, 2023, the As-Is Market Value of the Property was \$40,400,000, as set out in the appraisal report.
- 8. The statements of fact contained in the appraisal report are true and correct based on my inspection of the Property on November 28, 2023 and the available information regarding the Property gathered and provided to me.
- 9. The analyses, opinions, and conclusions communicated within the appraisal report are my impartial and unbiased professional analyses, opinions, and conclusions based on my knowledge, skill, experience, training, and education as a Certified General Real Estate Appraiser in Houston, Texas.
- 10. The reported analysis, opinions, and conclusions were developed, and the appraisal report has been prepared, in conformity with the *Uniform Standards of Professional Appraisal Practice* and the *Code of Professional Ethics and Standards of Professional Appraisal Practice* of the Appraisal Institute, which are the industry standards for conducting appraisals in the United States.
- 11. My engagement and compensation for making the appraisal is not contingent on the amount of the appraisal, nor do I have any present or contemplated future interest in the Property.

Clay M. Roth

SUBSCRIBED AND SWORN TO BEFORE ME, the undersigned authority, on August _____, 2025 to certify which, witness my hand and seal of office.

RE: Virtuo Med Center Apartments

7110 Ardmore Street Houston, Texas 77054

Colliers File #: HOU230784

Mr. Alfaro:

Pursuant with our engagement, the above captioned property was appraised utilizing best practice appraisal principles for this property type. This appraisal report satisfies the scope of work and requirements agreed upon by Freddie Mac and Colliers International Valuation & Advisory Services.

The date of this report is December 19, 2023. At the request of the client, this appraisal is presented in an Appraisal Report format as defined by *USPAP* Standards Rule 2-2(a). Our appraisal format provides a detailed description of the appraisal process, subject and market data and valuation analyses.

The purpose of this appraisal is to develop opinions of the As-Is Market Value and Prospective Value Upon Stabilization of the subject property's leased fee interest. At the request of the client we have also completed an Insurable Replacement Cost Estimate. The following table conveys the final opinions of market value of the subject property that are developed within this appraisal report:

VALUE TYPE	INTEREST APPRAISED	DATE OF VALUE	VALUE
Market Value As-Is	Leased Fee	November 28, 2023	\$40,400,000
Prospective Value Upon Stabilization	Leased Fee	January 1, 2025	\$48,500,000
OTHER CONCLUSIONS			AS OF NOVEMBER 28, 2023
Insurable Replacement Cost			\$30,500,000

The subject is a Multifamily (Mid/High-Rise Housing) property totaling 326 units located on a 6.39-acre site at 7110 Ardmore Street in Houston, Texas. The improvements were built in 2022, are in average/good condition and have a remaining economic life of 54 years based on our estimate.

The subject is currently operating at below stabilized occupancy. We requested the subject's current occupancy from the property manager during our inspection, however she declined to provide it, instead deferring questions about occupancy to the owner's attorney. We requested the current occupancy from the client, however they were unable to give an accurate account of occupancy as of the effective date. The rent roll provided dated October 18, 2023, shows 92 vacant units for a total occupancy of 71.8%. However, according to the client the property data provided may not be accurate and should be considered with caution. Further, the rent roll provided does not show the current rents for the in-place tenants making it difficult to determine the subject's economic vacancy. Additionally, the dates of commencement and expiration for the leases was not included. On the effective date, the PCA inspector reported walking 100 vacant units or approximately 30.6% of the property. While we were unable to accurately determine current occupancy during our inspection of the property, we did observe tenants at the property, as well as a number of cars in the parking lot, indicating that the subject has some degree of occupancy as of the effective date. It is highly atypical to complete an appraisal report without a reliable rent roll or accurate understanding of current occupancy and does impact the overall reliability of our analysis.

We have requested but not been provided with the copy of the subject's current T-12 historical financial as well as the full year 2022 historical financials. Further, we have requested but have not been provided with the owners 2024 operating budget or a stabilized operating budget. We have been provided with the subject's April 2023 T-12 historical financials which represent the subject prior to sale. However, we have been informed by the client that the subject's historical data may not be accurate and to use with caution. The appraisers do not have the expertise or data to confirm or deny the accuracy of the financials provided. However, based on our years of experience analyzing income and expenses for multifamily properties in the Houston market as well as knowledge of the subject's operations from individuals who previously listed the subject for sale, we cannot give any consideration to the financials provided. It is highly atypical to complete an appraisal report without reliable or accurate historical financials and does impact the overall reliability of our analysis.

We were provided with a copy of the Property Conditions Assessment and Phase I Environmental report. Based on our review of these reports, we opine that the findings contained therein have no impact on the concluded value in this analysis.

The analyses, opinions and conclusions communicated within this appraisal report were developed based upon the requirements and guidelines of the current Uniform Standards of Professional Appraisal Practice (USPAP), the requirements of the Code of Professional Ethics and the Standards of Professional Appraisal Practice of the Appraisal Institute. The report is intended to conform to the Financial Institutions Reform, Recovery and Enforcement Act (FIRREA) standards and the appraisal guidelines of Freddie Mac.

This report is for the use and benefit of, and may be relied upon by

- a) the Seller/Servicer, Freddie Mac and any successors and assigns ("Lender");
- b) independent auditors, accountants, attorneys and other professionals acting on behalf of Lender;
- c) governmental agencies having regulatory authority over Lender;
- d) designated persons pursuant to an order or legal process of any court or governmental agency;
- e) prospective purchasers of the Mortgage; and
- f) with respect to any debt (or portion thereof) and/or securities secured, directly or indirectly, by the Property which is the subject of this report, the following parties and their respective successors and assigns:

 any placement agent or broker/dealer and any of their respective affiliates, agents and advisors;

- any initial purchaser or subsequent holder of such debt and/or securities;
- any Servicer or other agent acting on behalf of the holders of such debt and/or securities;
- · any indenture trustee;
- · any rating agency; and
- any institutional provider from time to time of any liquidity facility or credit support for such financings

In addition, this report, or a reference to this report, may be included or quoted in any offering circular, information circular, offering memorandum, registration statement, private placement memorandum, prospectus or sales brochure (in either electronic or hard copy format) in connection with a securitization or transaction involving such debt (or portion thereof) and/or securities.

The report, in its entirety, including all assumptions and limiting conditions, is an integral part of, and inseparable from, this letter. *USPAP* defines an Extraordinary Assumption as, "an assignment specific-assumption as of the effective date regarding uncertain information used in an analysis which, if found to be false, could alter the appraiser's opinions or conclusions". *USPAP* defines a Hypothetical Condition as, "that which is contrary to what is known by the appraiser to exist on the effective date of the assignment results, but is used for the purpose of analysis".

The Extraordinary Assumptions and/or Hypothetical Conditions that were made during the appraisal process to arrive at our opinions of value are fully discussed below. We advise the client to consider these issues carefully given the intended use of this appraisal, as their use might have affected the assignment results.

EXTRAORDINARY ASSUMPTIONS

We have been unable to verify the subject's current occupancy. Therefore, we have appraised the subject's as is value based on the extraordinary assumption that the subject is 70% occupied as of the effective date. Additionally, it is extraordinary of this appraisal that the subject's in-place tenants are paying rents on par with our market rent conclusions. Should reliable information be provided that disproves this assumption our concluded market value would be subject to change.

HYPOTHETICAL CONDITIONS

No Hypothetical Conditions were made for this assignment.

RELIANCE LANGUAGE

The Appraisal is for the sole use of the Client; however, Client may provide only complete, final copies of the Appraisal report in its entirety (but not component parts) to third parties who shall review such reports in connection with loan underwriting or securitization efforts. Colliers International Valuation & Advisory Services is not required to explain or testify as to appraisal results other than to respond to the Client for routine and customary questions. Please note that our consent to allow the Appraisal prepared by Colliers International Valuation & Advisory Services or portions of such Appraisal, to become part of or be referenced in any public offering, the granting of such consent will be at our sole and absolute discretion and, if given, will be on condition that Colliers International Valuation & Advisory Services will be provided with an Indemnification Agreement and/or Non-Reliance letter, in a form and content satisfactory to Colliers International Valuation & Advisory Services. Colliers International Valuation & Advisory Services. Colliers International Valuation & Advisory Services does consent to your submission of the reports to rating agencies, loan

participants or your auditors in its entirety (but not component parts) without the need to provide Colliers International Valuation & Advisory Services with an Indemnification Agreement and/or Non-Reliance letter.

Colliers International Valuation & Advisory Services hereby expressly grants to Client the right to copy the Appraisal and distribute it to other parties in the transaction for which the Appraisal has been prepared, including employees of Client, other lenders in the transaction, and the borrower, if any.

Our opinion of value reflects current conditions and the likely actions of market participants as of the date of value. It is based on the available information gathered and provided to us, as presented in this report, and does not predict future performance. Changing market or property conditions can and likely will have an effect on the subject's value.

The signatures below indicate our assurance to the client that the development process and extent of analysis for this assignment adhere to the scope requirements and intended use of the appraisal. If you have any specific questions or concerns regarding the attached appraisal report, or if Colliers International Valuation & Advisory Services can be of additional assistance, please contact the individuals listed below.

Sincerely,

COLLIERS INTERNATIONAL VALUATION & ADVISORY SERVICES

PROPERTY IDENTIFICATION

The subject is a Multifamily (Mid/High-Rise Housing) property totaling 326 units. It is located on a 6.39-acre site at 7110 Ardmore Street in Houston, Harris County, Texas. The assessor's parcel number is: 1500190010002.

LEGAL DESCRIPTION

Unrestricted Reserve "B", in Block One (1) of PARKMED, a subdivision in Harris County, Texas, according to the map or plat thereof, recorded under Film Code No. 688668 of the Map Records of Harris County, Texas.

CLIENT IDENTIFICATION

The client of this specific assignment is Freddie Mac.

PURPOSE

The purpose of this appraisal is to develop opinions of the As-Is Market Value and Prospective Value Upon Stabilization of the subject property's leased fee interest. At the request of the client we have also completed an Insurable Replacement Cost Estimate.

INTENDED USE

The intended use of this appraisal is for asset management purposes, and/or for evaluating a request for an extension of credit (the "Mortgage Loan") to be secured by the property, and/or for loan origination, and/or for acquisition of an asset, and/or for any other purpose.

INTENDED USERS

Freddie Mac is the only intended user of this report. Use of this report by third parties and other unintended users is not permitted. This report must be used in its entirety. Reliance on any portion of the report independent of others, may lead the reader to erroneous conclusions regarding the property values. Unless approval is provided by the authors no portion of the report stands alone.

Valuation Date - Prospective At Stabilization January 1, 2025

PERSONAL INTANGIBLE PROPERTY

No personal property or intangible items are included in this valuation.

PROPERTY AND SALES HISTORY

Current Owner

The subject title is currently recorded in the name of TMC GrantApts #1 LLC who acquired title to the property some time prior to January 1, 2020 prior to the construction of the proposed improvements. As discussed below it is believed that the subject's ownership shares were transferred to a different entity on June 15, 2023 for between \$67,000,000 and \$69,000,000.

Three-Year Sales History

According to our search of the Harris County public records, the subject has had the same recorded owner, TMC Grand Apts, since at least January 1, 2020, prior to the construction of the existing improvements. However, based on discussions with the client and market participants as well as searching third party data sources, it appears that the subject sold in June of 2023. The price of this transaction is not publicly known but is reported to be between \$67,000,000 and \$69,000,000 based on discussions with market participants with knowledge of the sale. We spoke with two brokers who previously listed the property in late 2022 and early 2023 stated it was under contract to a different buyer for approximately \$65,500,000 but were unable to close the transaction and were not part of the reported sale in June of 2023. While there is no warranty deed recorded for this reported transaction, a multifamily deed of trust, assignment of rents, security agreement and fixture filling was recorded on June 15th 2023 (RP-2023-220918) with a loan amount of \$68,460,000. It is believed that this recording represents the loan for the reported transaction.

Subject Sale Status

Research of the applicable public records, private data services and an interview of the current owner and/or broker revealed that the subject property is not under a current agreement of sale or option and is not currently offered for sale on the open market.

DEFINITIONS

This section summarizes the definitions of value, property rights appraised, and value scenarios that are applicable for this appraisal assignment. All other applicable definitions for this assignment are located in the Valuation Glossary section of the Addenda.

DEFINITIONS OF VALUE

Given the scope and intended use of this assignment, the following definition of value is applicable:

Market Value

The most probable price which a property should bring in a competitive and open market under all conditions requisite to a fair sale, the buyer and seller each acting prudently and knowledgeably, and assuming the price is not affected by undue stimulus. Implicit in this definition is the consummation of a sale as of a specified date and the passing of title from seller to buyer under conditions whereby:

- 1. Buyer and seller are typically motivated;
- 2. Both parties are well informed or well advised, and acting in what they consider their own best interests;
- 3. A reasonable time is allowed for exposure in the open market;
- 4. Payment is made in terms of cash in U.S. dollars or in terms of financial arrangements comparable thereto; and
- 5. The price represents the normal consideration for the property sold unaffected by special or creative financing or sales concessions granted by anyone associated with the sale. ¹

PROPERTY RIGHTS APPRAISED

The property rights appraised constitute the leased fee interest for the market value and fee simple interest for the insurable value.

Fee Simple Estate

Absolute ownership unencumbered by any other interest or estate, subject only to the limitations imposed by the governmental powers of taxation, eminent domain, police power and escheat.²

¹ Interagency Appraisal and Evaluation Guidelines, December 10, 2010, Federal Register, Volume 75 Number 237, Page 77472

² The Dictionary of Real Estate Appraisal, Seventh Edition, Appraisal Institute, Chicago, Illinois, 2022

Leased Fee Interest

The ownership interest held by the lessor, which includes the right to receive the contract rent specified in the lease plus the reversionary right when the lease expires.³

VALUE SCENARIOS

As-Is Value

The estimate of the market value of real property in its current physical condition, use, and zoning as of the appraisal date.⁴

Prospective Value

A value opinion effective as of a specified future date. The term does not define a type of value. Instead, it identifies a value opinion as being effective at some specific future date. An opinion of value as of a prospective date is frequently sought in connection with projects that are proposed, under construction, or under conversion to a new use, or those that have not yet achieved sellout or a stabilized level of long-term occupancy.⁵

INTRODUCTION

The appraisal development and reporting processes requires gathering and analyzing information about those assignment elements necessary to properly identify the appraisal problem to be solved. The scope of work decision must include the research and analyses that are necessary to develop credible assignment results given the intended use of the appraisal. Sufficient information includes disclosure of research and analyses performed and might also include disclosure of research and analyses not performed. The scope of work for this appraisal assignment is outlined below:

- The appraisers analyzed the regional and local area economic profiles including employment, population, household income, and real estate trends. The local area was further studied to assess the general quality and condition, and emerging development trends for the real estate market. The immediate market area was inspected and examined to consider external influences on the subject.
- The appraisers confirmed and analyzed legal and physical features of the subject property including sizes of the site and improvements, flood plain data, seismic zone, zoning, easements and encumbrances, access and exposure of the site, and construction materials and condition of the improvements. This process also included estimating the remaining economic life of the improvements, analysis of the subject's site coverage and parking ratios compared to market standards, a process to identify deferred maintenance and a conclusion of the subject's overall functional utility.
- The appraisers completed an apartment market analysis that included market and sub-market overviews. The Houston market and West University / Medical Center / River Oaks sub-market overviews analyzed supply/demand conditions using vacancy, absorption, supply change and rent change statistics. Conclusions were drawn regarding the subject property's competitive position given its physical and locational characteristics, the prevailing economic conditions and external influences.
- The appraisers conducted a Highest and Best Use analysis, determining the highest and best use of the subject property As-Vacant and As-Improved. The analysis considered legal, locational, physical and financial feasibility characteristics of the subject property. Development of the Highest and Best Use As-Improved explored potential alternative treatments of the property including demolition, expansion, renovation, conversion, and continued use "as-is."

⁴ The Dictionary of Real Estate Appraisal, Seventh Edition, Appraisal Institute, Chicago, Illinois, 2022

⁵ The Dictionary of Real Estate Appraisal, Seventh Edition, Appraisal Institute, Chicago, Illinois, 2022

The appraisers would not confirm the accuracy of the rent roll and historical data provided. Therefore, the appraiser relied on comparable data as well as trends established by confirmed market indicators was used to forecast performance of the subject property.

- Selection of the valuation methods was based on the identifications required in USPAP relating to the intended use, intended users, definition and date of value, relevant property characteristics and assignment conditions. As a result, this appraisal developed the Income (Direct Capitalization), Sales Comparison and Cost approaches to value. The resulting value indicators were reconciled within the Analysis of Value Conclusions section. The appraisal develops opinions of the As-Is Market Value and Prospective Value Upon Stabilization of the subject property's leased fee interest. At the request of the client we have also completed an Insurable Replacement Cost Estimate. The reasoning for including or excluding traditional approaches to value is developed within the Valuation Methodology section.
- Reporting of this appraisal is in an Appraisal Report format as required in USPAP Standard 2. The appraiser's analysis and conclusions are fully described within this document.
- > We understand the Competency Rule of USPAP and the authors of this report meet the standards.
- No one provided significant real property appraisal assistance to appraisers signing this certification.

In addition to the above units, the appraisers walked all four floors of the property and inspected the building exteriors, and project/common amenities.

INTRODUCTION

The Houston-The Woodlands-Sugar Land, TX Metropolitan Statistical Area (MSA) is located in southeast Texas along the Gulf Coast region and contains the nine counties of Austin, Brazoria, Chambers, Fort Bend, Galveston, Harris, Liberty, Montgomery, and Waller. Situated in the gulf coastal plains, where most of the area is very flat, the MSA encompasses 9,444 square miles of which 8,311 square miles are land and 1,133 square miles are water. The climate is humid subtropical, and due to the numerous streams, bayous, and the close proximity to the Gulf of Mexico, fog is common. Humidity is also high, especially during the summer.

With a 2020 population of approximately 7.1 million, the Houston MSA is the 5th most populated CBSA (Core Based Statistical Area) in the U.S. - and the second most populated MSA in the state of Texas, losing out to Dallas/Fort Worth Metroplex by more than a half million residents. Recognized as the world energy capital, Houston's local economy is driven by the energy industry. However, Houston continues to expand its economic base in the areas of international business, information systems technology, and service-related industries. According to the 2023 Fortune 500 list, out of the 500 U.S. corporations with the largest revenues in 2023, Houston is home to 25 which is 3rd in the country behind only New York (64), and Chicago (35). The Fortune 500 Companies headquartered in Houston as of June 2023 include:

Fortune 500 Companies Headquartered in Houston Metro, 2023						
Rank	Company	Revenues (\$ Billion)	Rank	Company	Revenues (\$ Billion)	
17	Phillips 66	175.7	204	Waste Management	19.7	
49	ConocoPhillips	82.1	214	Kinder Morgan	19.2

Note: Schlumberger, which has principal offices in Houston, Paris, London, and The Hague, appears on the Fortune Global 500 list but not on Fortune 500.

DEMOGRAPHIC ANALYSIS

The following is a demographic study of the region sourced by *Pitney Bowes/Gadberry Group - GroundView®*, an on-line resource center that provides information used to analyze and compare the past, present, and future trends of geographical areas. Demographic changes are often highly correlated to changes in the underlying economic climate. Periods of economic uncertainty necessarily make demographic projections somewhat less reliable than projections in more stable periods. These projections are used as a starting point, but we also consider current and localized market knowledge in interpreting them within this analysis. Please note that our

demographics provider sets forth income projections in constant dollars which, by definition, reflect projections after adjustment for inflation. We are aware of other prominent demographic data providers that project income in current dollars, which do not account for inflation. A simple comparison of projections for a similar market area made under the constant and current dollar methodologies can and likely will produce data points that vary, in some cases, widely. Further, all forecasts, regardless of demographer methodology(ies), are subjective in the sense that the reliability of the forecast is subject to modeling and definitional assumptions and procedures.

Population

According to Pitney Bowes/Gadberry Group - GroundView®, a Geographic Information System (GIS) Company, the Houston-The Woodlands-Sugar Land metropolitan area had a 2022 total population of 7,325,715 and experienced an annual growth rate of 1.3%, which was higher than the Texas annual growth rate of 1.2%. The metropolitan area accounted for 24.5% of the total Texas population (29,926,185). Within the metropolitan area the population density was 840 people per square mile compared to the lower Texas population density of 112 people per square mile and the lower United States population density of 93 people per square mile. The 2022 median age for the metropolitan area was 34.72, which was 10.52% younger than the United States median age of 38.38 for 2022. The median age in the metropolitan area is anticipated to grow by 0.51% annually, increasing the median age to 35.62 by 2027.

Education

Eighteen school districts exist within the city of Houston. The Houston Independent School District (HISD) is the seventh-largest school district in the United States. HISD has 112 campuses that serve as magnet or vanguard schools—specializing in such disciplines as health professions, visual and performing arts, and the sciences. There are also many charter schools that are run separately from school districts. In addition, some public school districts also have their own charter schools.

The Houston area encompasses more than 300 private schools, many of which are accredited by Texas Private School Accreditation Commission recognized agencies. The Houston Area Independent Schools offer education

from a variety of different religious as well as secular viewpoints. The Houston area Catholic schools are operated by the Archdiocese of Galveston-Houston.

Colleges and Universities

Five separate and distinct state universities are located within Houston–The Woodlands–Sugar Land metropolitan area. The University of Houston is a nationally recognized Tier One research university, and is the flagship institution of the University of Houston System. The third-largest university in Texas, the University of Houston has nearly 40,000 students on its 667-acre campus in southeast Houston. The University of Houston–Clear Lake and the University of Houston–Downtown are stand-alone universities; they are not branch campuses of the University of Houston. The metropolitan area is home to two historically black colleges and universities: Texas Southern University and Prairie View A&M University. The University of Texas Medical Branch (UTMB) and Texas A&M University at Galveston, a branch campus of Texas A&M University, are located in Galveston.

Several private institutions of higher learning—ranging from liberal arts colleges to a nationally recognized research university—are located within the metropolitan area. The University of St. Thomas is a Catholic institution known for small classes (an average of 14 students per class). Rice University is one of the leading teaching and research universities of the United States and ranked the nation's 17th best overall university by U.S. News & World Report.

Three community college districts exist with campuses in and around Houston. The Houston Community College System serves most of Houston. The northwestern through northeastern parts of the metropolitan area are served by various campuses of the Lone Star College System, while the southeastern portion of the city and some surrounding areas are served by San Jacinto College. Eastern portions of the area and small sections of the city are served by Lee College. Portions of Fort Bend County are served by Wharton County Junior College. Portions of Galveston County are served by College of the Mainland and Galveston College. Portions of Brazoria County are served by Alvin Community College and Brazosport College. Blinn College serves portions of Austin County. The Houston Community College and Lone Star College systems are within the 10 largest institutions of higher learning in the United States.

Household Trends

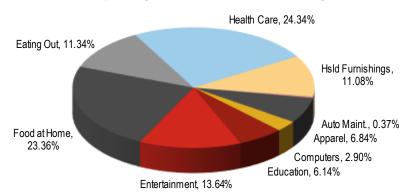

The 2022 number of households in the metropolitan area was 2,631,554. The number of households in the metropolitan area is projected to grow by 1.6% annually, increasing the number of households to 2,848,140 by 2027. The 2022 average household size for the metropolitan area was 2.75, which was 9.04% larger than the United States average household size of 2.53 for 2022. The average household size in the metropolitan area is anticipated to retract by 0.01% annually, reducing the average household size to 2.75 by 2027. The Houston-The Woodlands-Sugar Land metropolitan area had 38.17% renter occupied units, compared to the lower 37.07% in Texas and the lower 35.54% in the United States.

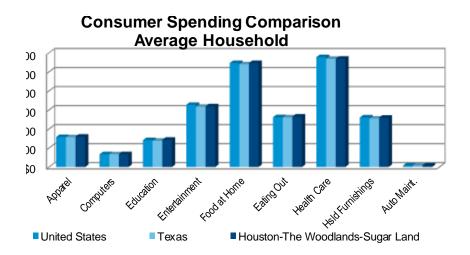

Income Trends

The 2022 median household income for the metropolitan area was \$80,171, which was 12.3% higher than the United States median household income of \$71,362. The median household income for the metropolitan area is projected to grow by 4.5% annually, increasing the median household income to \$100,048 by 2027. As is often the case when the median household income levels are lower than the national average, the cost of living index is also lower. According to the American Chamber of Commerce Researchers Association (ACCRA) Cost of Living Index, the Houston-The Woodlands-Sugar Land, TX MSA's cost of living is 92.9 compared to the national average score of 100. The ACCRA Cost of Living Index compares groceries, housing, utilities, transportation, health care and miscellaneous goods and services for over 300 urban areas.

2018	21,157,398	7.9%
2019	21,905,309	3.5%
2020	8,682,558	(60.4%)
2021	16,242,821	87.1%

Source: U.S. Department of Transportation

Houston's largest airport (IAH) recently realized its largest % change in passenger traffic in 2021 (87.1% YoY), which was preceded by COVID-19 in 2020 which drastically reduced the number of flights across the globe. Passenger traffic in 2021 increased significantly; however, to a level that was 74% of pre-pandemic (2019).

CONTINUED

EMPLOYMENT

Total employment has increased annually over the past decade in the state of Texas by 1.8% and increased annually by 1.3% in the area. From 2021 to 2022 unemployment decreased in Texas by 1.7% and decreased by 2.1% in the area. In the state of Texas unemployment has decreased over the previous month by 0.3% and decreased by 0.3% in the area.

Source: U.S. Bureau of Labor Statistics *Unadjusted Non-Seasonal Rate

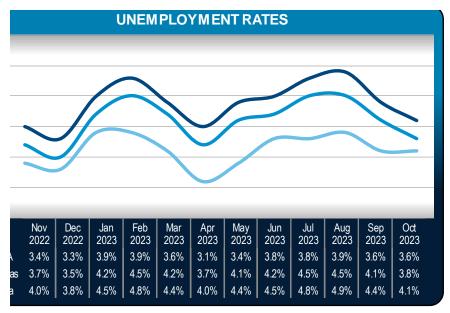

The Houston Metro area payroll employment has grown considerably over the past 10 years, up 10% or approximately 1% per year. The job growth over the past five years has been higher, averaging just over 100,000 jobs per year (excluding 2020). Job growth in 2022 was initially estimated at 179,000 and revised downward to 145,000, marking the highest job growth on record in the MSA.

METRO HOUSTON EMPLOYMENT

Source: Texas Workforce Commission

The following chart depict the unemployment rates in the United States, Texas, and the Houston Metro Area. The GHP opines that unemployment below 5.0% indicates a tight labor market. Below 4.0% indicates is an extremely tight labor market.

The preceding chart depicts unemployment trends in the region, Texas and the U.S. Overall levels of unemployment in the region have fluctuated over the past 12 months due to counter-acting events. On one hand, the exploding demand for labor during the economic boon that pent up during 2020 due to forced shutdowns and health restrictions from COVID-19 in 2020 that persisted into 2022. On the other hand, the sharp increases in the Fed Funds Rate as of March 2022 of over 525 basis points, which has caused economic unrest, particularly from an investment standpoint with the economy projected by many to head into a recession. The Houston unemployment rate has generally been higher than the entire country and the state of Texas.

For 2023, the Greater Houston Partnership expects anywhere between 30,375 jobs and 79,225 jobs to be created with consideration given to the headwinds caused by the higher interest rate climate that prevails due to the Fed's determination to combat high inflation. The GHP's baseline probability at 50% would indicate 60,800 jobs for 2023, 30% probability for a best-case scenario of 79,225 jobs gained, and 20% probability for worst-case scenario of 30,375 jobs gained.

ECONOMY

According to the Greater Houston Partnership's March 2021 Report, Houston Facts, the top five industries by employment in the Houston MSA is comprised of Trade, Transportation & Utilities (20.8%), Professional and Business Services (16.9%), Government (13.7%), Educational and Health Services (13.2%), and Leisure & Hospitality (9.6%).

Over the last 15 years, Houston has been through three economic downturns (Financial Recession, the Fracking Bust, and COVID-19) and two major storms (Hurricane Ike and Harvey), and has managed to gain 1.4 million residents, created over 500,000 jobs, and added \$100 billion

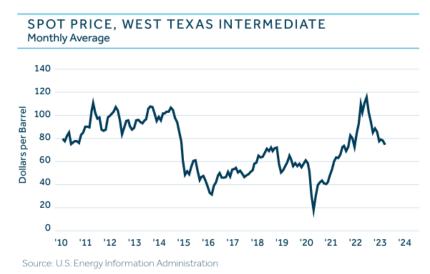

Source: Texas Workforce Commission, December 2020, not seasonally adjusted

to the MSA's GDP. Although substantial jobs were lost in the Financial Recession (120,000), the MSA recovered all lost jobs within two years after the event. Over the next several years, the MSA created 100,000 jobs annually (on average) until oil prices fell from \$100 per barrel to \$26 per barrel in 2016. Coupled with the oil price collapse the region saw 93,000 jobs lost, largely impacted by the oil and gas industry but offset by growth in the construction, retail, health care, business, professional services, and hospitality industries. While the Houston MSA's economy is diversified, it is still largely dependent on oil and gas as several of the largest employers in the region are related to oil and gas.

The U.S. rig count as of November 10, 2023 was 616, which has been on a steady decline since December 2022 (784 rigs online). Approximately 53% of oil rigs operating in North America are located in the Permian Basin, up from 35% prior to the downturn. Energy companies have restructured to operate profitably in a low-price environment. A Q2 2022 report by the Federal Reserve Bank of Dallas indicated new wells drilled in the Permian Basin and Eagle Ford areas of Texas break even between \$48-\$54 per barrel (WTI price).

WTI

In March 2020, the spread of Coronavirus (COVID-19) across the globe lead countries to ban travel to/from "hotspot" countries which grounded more than 50% of all air traffic across the world. This, along with stay-athome orders reduced all travel significantly, and demand for oil and many oil-related products waned broadly. This sent the price of WTI from around \$61 per barrel in January 1, 2020 to a low around \$20 per barrel on March 18, 2020. The May WTI Futures contract, which closed on April 20, fell to -\$37.63, going negative for the first time in history. This price collapse has led many oil & gas related

companies to lay off or furlough large portions of their workforce, reduce executives' compensation, and halt dividend payments. Many of these oil companies are headquartered in Houston. However, as of market open on November 15, 2023, the WTI December 2023 Futures price was approximately \$76 per barrel which is off from a recent high of about \$94 per barrel in September 2023.

Despite the negative environment surrounding the energy industry in the wake of the oil glut, the Port of Houston has continued to flourish. In June 2016, the expansion of the Panama Canal was completed. Originally set-back by China's economic slowdown, the expansion has allowed Panamax ships to cross the canal. The Port of Houston has become a primary beneficiary of canal shipping activity as marine-based trade routes between the Gulf Coast, Latin America, and Asian countries are more accessible. The Panama Canal can now accommodate a class of ships termed New Panamax, which are 1,401 FT in length by 60 FT in depth and have a carrying capacity of 14,000 TEU's. The Port of Houston is currently capable of accommodating New Panamax sized vessels. The fastest growing trade lane for the Port of Houston is imports and exports to Asian countries. As of 2021, Houston was ranked #1 in total tonnage across the U.S. and import containers from East Asia has grown 63% since 2016. The Port Authority also noted the increase in exports since the Panama Canal expansion to the note of 96% since 2016. It has been cited shipping directly to the Port of Houston may offer lower costs versus shipping an import to the West Coast and transporting the cargo inland by train or truck.

Trade

Houston's exports have grown from \$104.5 billion in 2011 to \$191.8 billion in 2022, according to data compiled by Greater Houston Partnership shown below.

Source: U.S. International Trade Administration

The Houston metro was the top U.S. exporting metro in 2022 and no other metro has experienced the same growth over the ten-year period. Houston accomplished this as oil prices have fluctuated from \$11.35 (Dec '98) to a high of \$147.27 per barrel (July '08) and less-than-half low of \$26.49 (Jan '16). Houston's export tonnage has increased nearly 200% since 2008. The growth is largely driven by supply, not demand, with the top five commodities accounting for 68% of all commodities (by Value).

Exports of crude have quadrupled since Congress lifted the ban on crude exports in 2015. The ethane crackers and chemical plants developed during the height of the fracking boom are online and exports of chemicals and plastics are up by 50% compared to five years prior. The Texas Legislature is expected to approve a rule that would limit the number of container ships of 9,500-TEU or greater able to call the Port of Houston to one per week effective September 1, 2019. The pending legislation would

Source: U.S. Census Bureau; U.S. Exports by Metropolitan Area

not limit the port's ability to accommodate 9,000-TEU ships and meet growing cargo demands in the short term. The port is using the rule effective September 1 as pressure to expedite a project to widen the Houston Ship Channel within five years. Total container volume (including empty containers) was up 10.2 percent year-over-year by the end of 2021, according to the Port of Houston Authority.

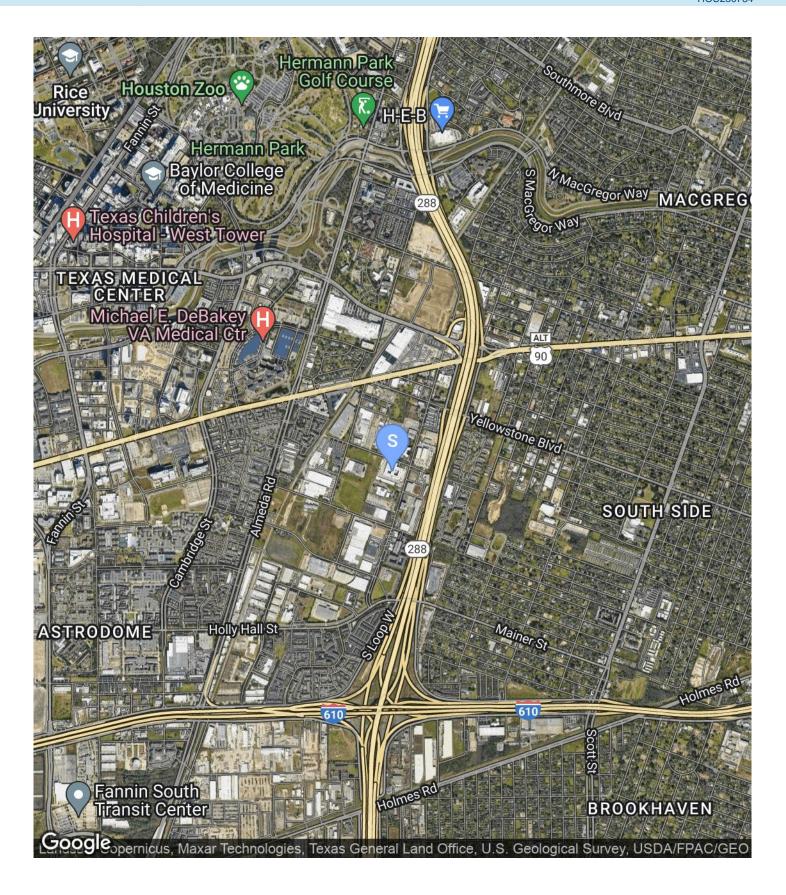

Texas Medical Center

Houston is home to the Texas Medical Center, the world's largest concentration of medical facilities with 61 member institutions. \$3 billion in new construction is planned for the next ten years, including the expansion of the Harris County Psychiatric Hospital and the addition of Texas A&M's Health Science Center on the TMC3 collaborative research campus. The TMC3 translation research campus is slated to open in the Fall of 2023 and will cover a 37-acre campus. The founding TMC3 member institutions are: the Texas Medical Center, Baylor College of Medicine, Texas A&M University Health Science Center, the University of Texas Health Science Center at Houston, and the University of Texas MD Anderson Cancer Center. Per the GHP's Houston Facts 2022 report,

the TMC3 is expected to create over 26,540 permanent jobs and bring \$5.4B annually to Texas' economy. In the 2021 Global Cities Report Index, Houston fell five spots to No. 37 from the previous report (ranked by AT Kearney). Patrick Jankowski, regional economist at the Greater Houston Partnership, reported close to 700 announcements in the region over the last 10 years of foreign firms staking investments in Houston.

SUMMARY

With a strong and diverse economy, the Houston MSA is home to world renowned corporations and Fortune 500 companies serving as the backbone for the city's economy and its continued growth. High oil prices are not a permanent fixture of the oil business or the regional economy; however, low oil prices are similarly impermanent. The regional economy has achieved significant diversification into non-energy sectors including trade, distribution, healthcare, technology and construction. Prior to the COVID-19 pandemic, the Houston economic outlook was bright with an influx of nearly 1.4 million people since 2008 and positive job growth every year since 2010 (with a minor hiatus between 2016 and 2017). The COVID-19 pandemic hurt the Houston economy severely; however, with 159,700 jobs added in 2021 the region has recovered all jobs lost during the pandemic. The Houston MSA gained 145,000 jobs in Houston in 2022, which marks the best year for job growth since employment records have been kept going back to the early 1980s. Overall, the Houston MSA region is attractive to potential investors as it offers a vibrant atmosphere, supported by top universities, urban attractions, and a history of resiliency. However, rapidly increasing interest rates by the Fed to combat soaring inflation may threaten real estate values, especially if it leads to an economic recession.

INTRODUCTION

In this section of the report, we provide details about the local area and describe the influences that bear on the real estate market as well as the subject property. A map of the local area is presented on the prior page. Below are insights into the local area based on fieldwork, interviews, demographic data and experience working in this market.

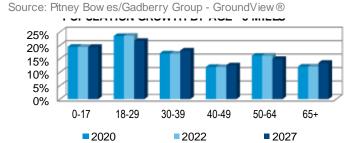

LOCAL AREA PROFILE

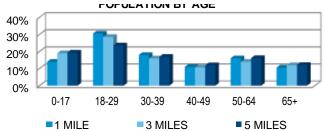

The subject property is in Houston, Texas, the seat of Harris County. According to the 2020 census, Houston had a population of 2,320,268 people, making it the most populous city in Texas and the southern United States. The city is in southeastern Texas near Galveston Bay and the Gulf of Mexico, within the counties of Harris, Fort Bend, and Montgomery. Interstates 10, 45, and 69, and U.S. Route 90 intersect the city. Air transportation is provided by George Bush Intercontinental Airport and William P. Hobby Airport.

DEMOGRAPHIC PROFILE

Below is a demographic study of the area, sourced by *Pitney Bowes/Gadberry Group - GroundView®*, an online resource center that provides information used to analyze and compare the past, present, and future trends of properties and geographical areas. Please note that our demographics provider sets forth income projections in constant dollars which, by definition, reflect projections after adjustment for inflation. We are aware of other prominent demographic data providers that project income in current dollars, which do not account for inflation. A simple comparison of projections for a similar market area made under the constant and current dollar methodologies can and likely will produce data points that vary, in some cases, widely. Further, all forecasts, regardless of demographer methodology(ies), are subjective in the sense that the reliability of the forecast is subject to modeling and definitional assumptions and procedures.

Transportation Routes

Major traffic arteries are shown in the chart below:

MAJOR ROADWAYS & THOROUGHFARES							
HIGHWAY	DIRECTION	FUNCTION	DISTANCE FROM SUBJECT				
Hardy Toll Road	north-south	Local Highw ay	This is just down the street from the subject property.				
Interstate 45	north-south	Interstate Highw ay	This is within a mile of the subject property.				
SURFACE STREETS	DIRECTION	FUNCTION	DISTANCE FROM SUBJECT				
FM 1960	east-w est	Primary Arterial	This is just down the street from the subject property.				
East Hufsmith Road	east-w est	Secondary Arterial	This is within 3 miles of the subject property.				

Economic Factors

Houston's economy has a diverse industrial base in energy, manufacturing, aeronautics, and transportation. The city is home to the world's largest concentration of healthcare organizations. The University of Houston System, a state university system, encompassing four separate and distinct universities, is a significant contributor to the Texas economy, with an estimated profit of \$3 billion annually, while generating approximately 24,000 jobs. Houston has a strong energy industry, particularly for oil and natural gas, as well as biomedical research and aeronautics. Houston is home to 40 Fortune 500 companies, including Phillips 66, Enterprise Products Partners, Sysco, Plains All American Pipeline, and Halliburton. The city is the center for petrochemical industries in the nation. Houston is also a leading center for building oilfield equipment. Much of its gain as a petrochemical complex is due to the Port of Houston. The Port of Houston ranks first in the nation for international waterborne tonnage handled and second in total cargo tonnage handled, which has given the city a strong international business community.

Community Services

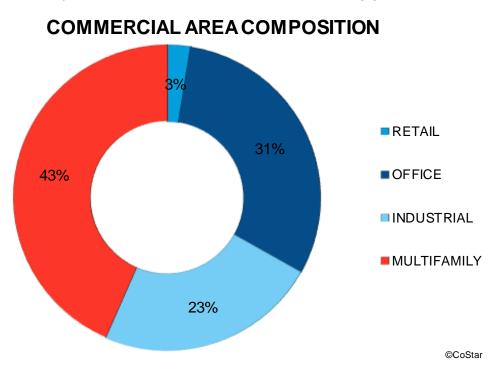

Community services and facilities are readily available in the surrounding area. These include public services such as fire stations, hospitals, police stations, and schools (all ages).

IMMEDIATE AREA PROFILE

This section discusses uses and development trends in the immediate area that directly impact the performance and appeal of the subject property.

Predominant Land Uses

Significant development in the immediate area consists of office, multifamily and mixed uses along major arterials that are interspersed with single-family residential development removed from arterials. The immediate area also includes older industrial sites which are being redeveloped for commercial or multifamily use. The local area has a mix of commercial uses nearby and the composition is shown in the following graph.

Multi-Family Development

The following chart shows a summary of multi-family data by type in the immediate area from CoStar.

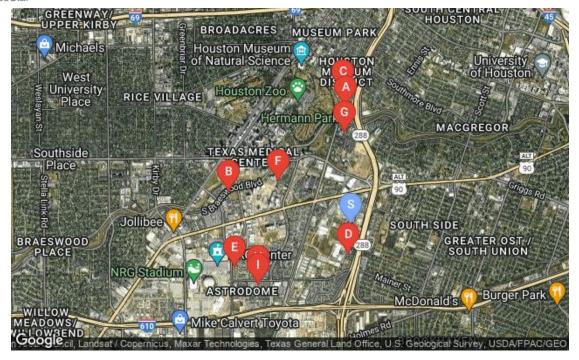

MULTIFAMILY SUMMARY

The following map shows the subject property and the five largest retail, office, and industrial properties in the immediate area from CoStar.

SUBJECT PROPERTY ANALYSIS

The following discussion draws context and analysis on how the subject property is influenced by the local and immediate areas.

Subject Property Analysis

The uses adjacent to the property are noted below:

- > North Office
- > South Industrial
- > East Industrial
- > West Vacant land / Industrial

Access

The subject is located on the corner on Ardmore Street and Alice Street which are both neighborhood collector streets. The subject is located one block off of highway 288 but does not have direct access to the highway. The subject's is located only a few miles from the Texas Medical Center but is separated from it by several major roadways as well as a railroad track with no vehicle crossings. According to the property manager the subject does not have walkable access to the Medical Center. According to brokers who previously listed the subject property, the subject's access was a major contributor to its poor occupancy.

Visibility

The subject is clearly visible in both directions along the street. The visibility of the property is not hampered by adjacent properties, trees or other obstructions. However, the subject is not visible from major roadways. In comparison to competitive properties, the subject property has fair visibility.

Subject Conclusion

Trends in the local and immediate areas, adjacent uses and the property's specific location features indicate an overall negative external influence for the subject, which is concluded to have a below average position in context of competing properties.

SUMMARY

With a strong and diverse economy, Houston is home to world renowned corporations and Fortune 500 companies serving as the backbone for the city's economy and its continued growth. Houston is attractive to potential investors as it offers a competitive business environment, supported by top universities, urban attractions, and a history of stability. Real estate in the Houston area market should ultimately enjoy relative strength in terms of value stability and appreciation for the foreseeable future.

General Description

The subject site consists of 1 parcel. As noted below, the subject site has 278,452 SF (6.39 AC) of land area. The area is estimated based on the assessor's parcel map, and may change if a professional survey determines more precise measurements. The following discussion summarizes the subject site size and characteristics.

Assessor Parcel

Frontage	The subject has approximatly 570			•	dmore Street. And

Accessibility

Average - The accessibility of the subject is rated as average. The subject is accessed from two streets, with the main entrance and primary point of ingress/egress being Alice Street. Major transportation arterials within proximity to the subject include Highway 288

and Old Spanish Trail, providing linkage to the surrounding area.

ExposureFair/Average - The subject has fair/average exposure, as it is located along a connector street. The project's exposure rating takes into account its below average visibility and

its average traffic count. It also considers the subject's exposure from multiple streets.

Seismic The subject is in a no risk zone.

Flood Zone

The subject site falls within the Zone X (Unshaded) flood zone. This is referenced by Community Number 480296, Panel Number 48201C0860L, dated June 18, 2007. The flood zone is defined as follows:

Zone X (unshaded) is a moderate and minimal risk area. Areas of moderate or minimal hazard are studied based upon the principal source of flood in the area. However, buildings in these zones could be flooded by severe, concentrated rainfall coupled with inadequate local drainage systems. Local stormwater drainage systems are not normally considered in a community's flood insurance study. The failure of a local drainage system can create areas of high flood risk within these zones. Flood insurance is available in participating communities, but is not required by regulation in these zones. Nearly 25-percent of all flood claims filed are for structures located within these zones. Minimal risk areas outside the 1-percent and .2-percent-annual-chance floodplains. No BFEs or base flood depths are shown within these zones. (Zone X (unshaded) is used on new and revised maps in place of Zone C.)

Easements

A preliminary title report was not available for review. During the on-site inspection, no adverse easements or encumbrances were noted. This appraisal assumes that there is no negative value impact on the subject improvements. If questions arise regarding easements, encroachments, or other encumbrances, further research is advised.

Soils

A detailed soils analysis was not available for review. Based on the development of the subject, it appears the soils are stable and suitable for the existing improvements.

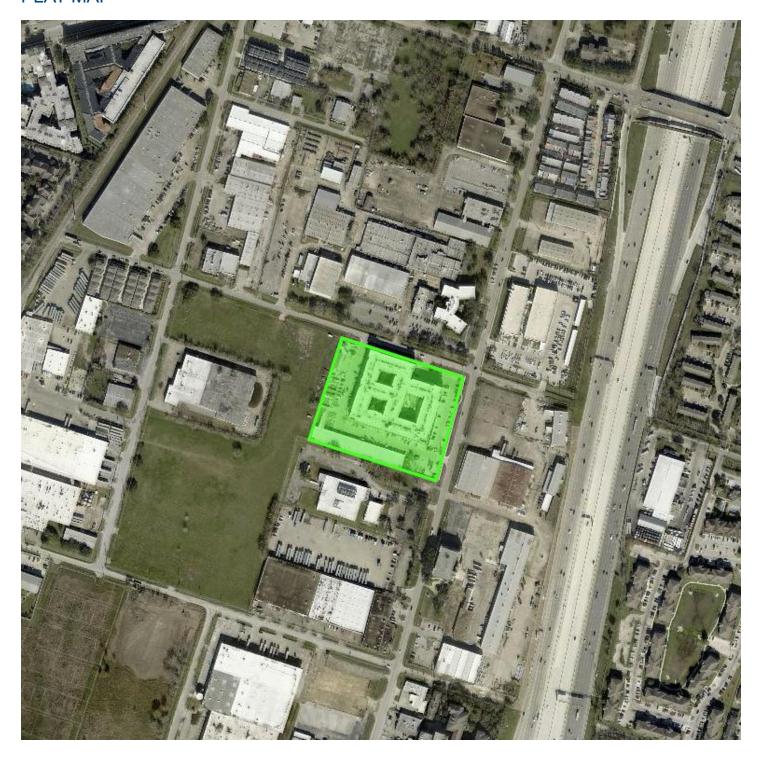

Hazardous Waste

We have not conducted an independent investigation to determine the presence or absence of toxins on the subject property. If questions arise, the reader is strongly cautioned to seek qualified professional assistance in this matter. Please see the Assumptions and Limiting Conditions for a full disclaimer. Even though we did not receive a draft environmental report, we walked around the subject site, including the rear of the buildings, the parking structure, the pool area and did not observe any obvious indicators of environmental contamination or adverse property condition issues.

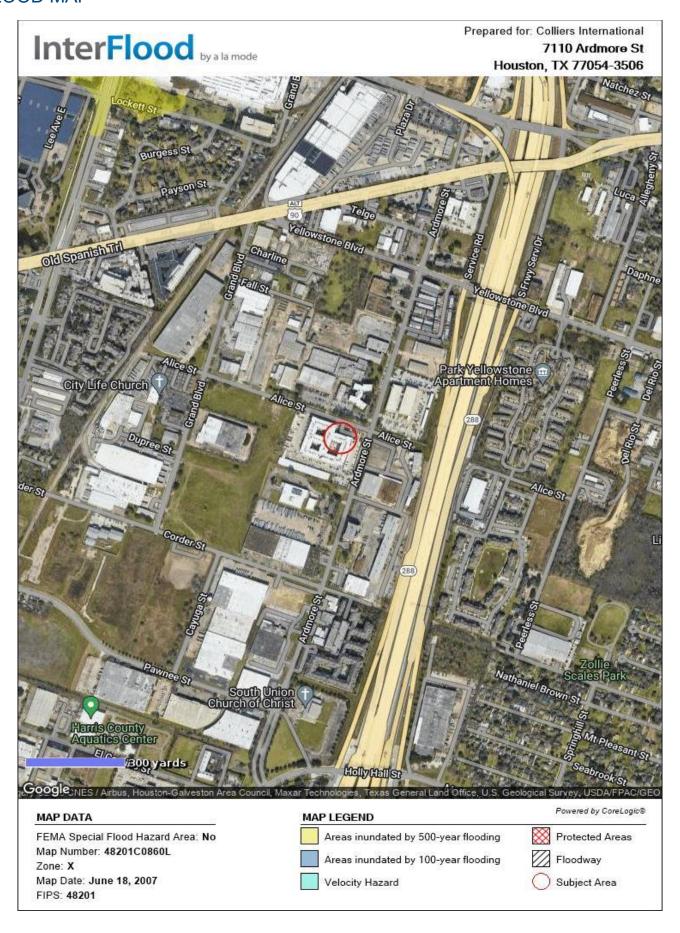

Conclusion

Overall, the subject's location is rated as fair/average. This location rating considers the subject's general market area (Houston), its submarket (West University / Medical Center / River Oaks) and the surrounding uses and immediate neighborhood. It also takes into account the subject's exposure and access to employment centers, educational facilities, and shopping centers. All of these characteristics provide supporting uses for the subject site making it desirable for multifamily development. Overall, there are no known factors that would limit the site's development according to its highest and best use.

Basic Construction Wood frame

Foundation Reinforced concrete slab

Framing Wood frame

Exterior Walls Stucco

Roof Type Flat

Roof Cover Sealed membrane

Insulation Exact type unknown, assumed adequate (R-type) and to code for both walls and

ceilings.

Plumbing Each bathroom includes a toilet, sink, and a shower/tub kit with wall-mounted

showerhead. Kitchens include a sink, dishwasher, and garbage disposal. There is

a laundry closet with washer/dryer units.

Air Conditioning Central HVAC

Heating Central HVAC

Hot Water Each unit includes a hot water heater.

Lighting Each unit has LED lighting.

Electrical Each unit is separately metered

Interior Walls Painted and medium textured finish on gypsum board.

Ceilings Painted and medium textured finish on gypsum board.

Windows Windows are double pane vinyl sliders with horizontal mini-blinds.

Doors Exterior doors are typically metal with peepholes. Interior doors are hollow, painted

wood.

Flooring Floor coverings for the kitchen areas are vinyl. The floor coverings vinyl, ceramic

tile in the bath areas and carpet in the bedrooms.

Elevators The building contains 3 passenger elevators.

Project Amenities The subject's common amenities include: bbq/picnic area, business center,

clubhouse, common area wi-fi, courtyard, electronic gate, elevators, fitness center,

game room, on-site manager, security alarm/patrol, swimming pool.

Unit Amenities Each unit features: air conditioning, alarm system, balcony/patio, ceiling fans,

complete appliance package, garbage disposal, microwave, parking garage, premium appliances, premium countertops, premium flooring, vaulted ceilings,

walk-in closets, washer/dryer hookups, washer/dryer in-unit.

Appliances Each unit is equipped with an electric oven/range combination, garbage disposal,

dishwasher, microwave, and refrigerator/freezer. The age and condition of

appliances are generally like new.

Laundry In-unit full washer/dryers.

Countertops The subject's units include granite countertops.

Cabinets Typical wood cabinetry

Security Security patrol is provided at the subject. In addition, each unit has a natural gas

detector, fire/smoke detector, and dead bolt.

Fire Protection The subject has a fire sprinkler system and smoke alarms.

Landscaping The subject has a typical amount of landscaping. There are mature plantings

surrounding the property. Plantings throughout the property include trees, flowers,

mowed lawn, shrubs and hedges. There is a sprinkler system.

Deferred Maintenance Deferred maintenance is measured as the cost of repairing or restoring the item to

new or reasonably new condition. Based on our interview with the property manager and the onsite inspection by the field appraiser, no observable deferred

maintenance exists.

Hazardous Materials This appraisal assumes that the improvements are constructed free of all

hazardous waste and toxic materials, including (but not limited to) asbestos. Please refer to the Assumptions and Limiting Conditions section regarding this

issue.

We were provided with a copy of the Property Conditions Assessment and Phase

I Environmental report. Based on our review of these reports, we opine that the findings contained therein have no impact on the concluded value in this analysis.

ADA Compliance This analysis assumes that the subject complies with all ADA requirements. Please

refer to the Assumptions and Limiting Conditions section regarding this issue.

Conclusion The subject improvements are in average/good condition for their age and for the

surrounding neighborhood. The interiors have Class A standard finish, comparable to most other properties in the immediate area. The roofs are reportedly in good

condition with no roof leaks reported.

INTRODUCTION

Assessment of real property is established by an assessor that is an appointed or elected official charged with determining the value of each property. The assessment is used to determine the necessary rate of taxation required to support the municipal budget. A property tax is a levy on the value of property that the owner is required to pay to the municipality in which it is situated. Multiple jurisdictions may tax the same property.

The subject property is located within Harris County. The assessed value and property tax for the current year are summarized in the following table.

		ASSES	SSMENT &	TAXES		
Tax Year	2023				Tax Rate	2.1298%

SUBJECT PROPERTY ANALYSIS

The total taxable value for the subject property is \$52,800,800 or \$161,966/Unit. There are no exemptions in place. Total taxes for the property are \$1,124,557 or \$3,450/Unit. We note that the subject current assessment represents it prior to stabilized occupancy.

As implicit in the definition of Market Value is the consummation of a sale, even in the event of a refinance, the potential real estate tax implication following a sale must be considered through a projected increase in assessment level, adjusted capitalization rate, or a blended approach with both factors being adjusted more moderately. As a result, projecting future real estate assessment/tax levels can be somewhat subjective. The primary factors are:

- 1. Variability in how counties are handling re-assessment following a sale
- 2. Local county's history of increasing values after a transaction
- 3. Subject's value relative to similar properties

In Texas, the amount of tax is determined by the product of the tax rate and the assessed valuation of the property. The tax rate is set each year by the governing bodies of local taxing entities such as county commissioners, school boards, cities and special districts, usually in October. It is important to note that the appraisal district does not set local budgets or tax rates. The combined tax rate includes multiple individual charges for flood, schools, hospitals, utilities, and general city and county levies.

The assessed valuation of each piece of property is set by the county assessor according to state statutory guidelines. By law, appraisal districts in Texas are required to appraise property at market value, or what the property would sell for, as of January 1 of that year. Additionally, the Texas Constitution requires that taxation of properties must be "equal and uniform." Therefore, the assessment for a property must be similar to comparable properties in the area. Finally, the State of Texas is a non-disclosure state, meaning that the sales price of a property does not have to be revealed to the public. Therefore, property taxes are not automatically increased

to the sales price of the property. However, in instances where the purchase price of a property is known, it has been observed that a property is likely to experience an increase in its assessment the year following a purchase.

TAX COMPARABLES

To determine if the assessment and taxes on the subject property are reasonable, we considered historical information, as well as information from similar properties in the market. They are illustrated in the table below.

				TAX COMP	ARABLES

Taxes Per SF	\$4.51	\$6.39	\$4.12	\$5.37	\$5.12	\$4.81	\$4.84	\$4.12	\$6.39	\$5.11

The comparable properties reflect assessments ranging from \$177,328/Unit to \$218,945/Unit with an average of \$198,977/Unit. The assessment for the subject property below this range on a per unit basis but within the lower end of the range on a per square foot basis. We note that all of the tax assessments represent opinions of market value as of January 1, 2023. The property was not stabilized in January 2023 so its assessment should be on the low end of the range of competing properties which are all stabilized. As discussed later in the appraisal, market conditions of decline since that time due to rising interest rates.

The following table shows the assessments of new construction class A multifamily properties in the Houston Urban Core within Harris County relative to their purchase price the previous year.

MEDIAN	79.5%						
MEAN	80.8%						

Properties in Harris County are typically assessmed for less than 100% of sales price the year following sale. Based on the above comparablables, comparable properties in Harris County are typically reassessed upon sale to between 75% and 90% of the purchase price which typically reflects a significant increase from the previous years assessed.

CONCLUSION

The subject's current tax assessment is 108.9% of our concluded stabilized market value. Under Texas law properties are to be assessed at 100% of market value. However, as indicated by the comparables above, properties are typically assessed for less than 100% of market value in practice. Therefore, the subject would have a high likelihood of appealing its tax assessment to at least 100% of its sales price if the price was provided to the County Tax Assessor. Therefore, we have projected taxes based on 100% of our concluded as if stabilized market value. The risk of future assessment increases has been accounted for in our concluded cap rate.

ESTIMATED STABILIZED TA	AXES
= Estimated Assessed Value	\$48,500,000

Percent of Concluded Market Value	100.0%
x Current Millage Rate	2.13%
 Stabilized Taxes Estimate (rounded) 	\$1,033,000
Stabilized Taxes/Unit	\$3,169
Stabilized Taxes/SF of NRA	\$4.14

INTRODUCTION

Zoning requirements typically establish permitted and prohibited uses, building height, lot coverage, setbacks, parking and other factors that control the size and location of improvements on a site. The zoning characteristics for the subject property are summarized below:

	ZONING SUMMARY
Municipality Governing Zoning	No Zoning Jurisdiction
Current Zoning	No Zoning Jurisdiction
Permitted Uses	All permitted uses under environmental, state and federal regulations.
Current Use	Multi-Family Apartments
Is Current Use Legally Permitted?	Yes
Zoning Change	Not Likely

ZONING CONCLUSIONS

The subject is currently outside of surrounding zoning jurisdictions. The improvements could be re-built to existing design and density if over 51% of the improvements were damaged or destroyed.

Detailed zoning studies are typically performed by a zoning or land use expert, including attorneys, land use planners, or architects. The depth of our analysis correlates directly with the scope of this assignment, and it considers all pertinent issues that have been discovered through our due diligence. Please note that this appraisal is not intended to be a detailed determination of compliance, as that determination is beyond the scope of this real estate appraisal assignment.

INTRODUCTION

The market analysis section provides a comprehensive study of supply/demand conditions, examines transaction trends, and interprets ground level information conveyed by market participants. Based on these findings and an analysis of the subject property, conclusions are drawn with regard to the subject's competitive position within the marketplace. Below is a list of the various sections covered in the following apartment market analysis:

- > Houston-The Woodlands-Sugar Land Apartment Market
- > West University/Medical Center/Third Ward Apartment Submarket
- Competitive Dataset Analysis
- > Broker / Market Participant Interviews
- > Transaction Trends
- Subject Property Analysis

HOUSTON-THE WOODLANDS-SUGAR LAND METRO APARTMENT MARKET ANALYSIS

The following is an analysis of supply/demand trends in the Houston-The Woodlands-Sugar Land Apartment Market using information provided by MPF Research, widely recognized as a market leader in Apartment data and statistics. Through their coverage of the MPF-100, a collection of the 100 largest primary and secondary markets in the US, data is primarily sourced at the floor-plan, transaction level. This is made possible through MPF's sister company relationship with RealPage, the developers of YieldStar and OneSite revenue and property management software suites, resulting in access to access individual lease transactions for roughly 3.7 million units.

We will first analyze the metro market, followed by the submarket. The following map highlights MPF's coverage of the Houston-The Woodlands-Sugar Land Metro Market and the individual submarkets tracked. The subject is located within the West University/Medical Center/Third Ward submarket denoted as (5) below.

Source: MPF Research® 1 Delivering within next four quarters. 2 Annual Revenue Change = Annual Occ. Change + Annual Rent Change

Occupancy

As presented, the Houston-The Woodlands-Sugar Land market maintains a current inventory of 753,816 units, up approximately 0.80% (6,351 units) from the previous quarter. The current market-wide occupancy rate of 93.0% is indicated through a range extending from 92.1% to 93.4% across all property styles and vintages. When compared to the previous quarter, the market-wide average occupancy rate has increased 0.1%. On a current-quarter annualized basis, occupancy rates have decreased 0.8%.

Rental Rates / Revenue

On a per unit basis, rental rates by vintage range from a low of \$1,001 per month to a high of \$1,660 per month. When analyzed on the basis of style, rental rates range from \$1,235 (low-rise) to \$2,496 (high-rise). In total, the market-wide inventory-weighted average rental rate is \$1,367 per unit per month. On a per square foot basis, rental rates range from a low of \$1.21 to a high of \$1.71 when analyzing property vintage and \$1.39 to \$2.37 when analyzed by property style. In aggregate, the market-wide average rental rate is \$1.52 per square foot. Annual revenue change, defined as annual occupancy change plus annual rent change represents a decrease of -0.1% versus the previous same-quarter annual period.

Concessions

Analyzed by vintage, the percentage of properties currently offering concessions range from 21.8% (2000+) to 31.1% (1980s). When singularly analyzing property style, this range shifts to a low of 21.4% (mid-rise) to a high of 26.8% (high-rise). An aggregate, market-wide average of 24.9% is indicated.

The average concession given ranges from 2.5% to 4.4% (vintage) and 2.9% to 7.1% (style) of potential gross income. An inventory-weighted average across all vintages and styles of 3.6% of potential gross income is indicated.

Trailing Metro Performance

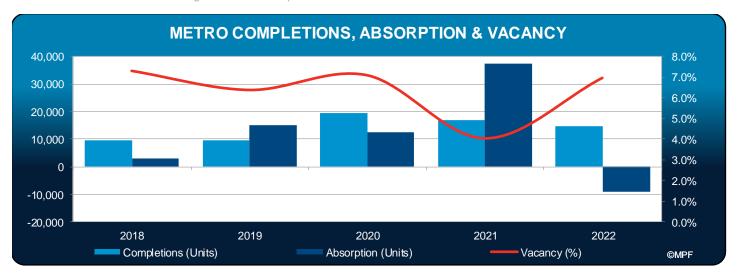

Key supply/demand, occupancy, rental rate, and concession statistics for available trailing annual and quarterly periods are summarized below.

Historical Supply/Demand

The following table highlights the trailing annual and quarterly supply, construction, and absorption metrics.

TRANSACTION TRENDS

Sales Volume

The volume of sale transactions for similar assets has been Low over the past six months within the local area. This assertion is supported by the comparable sales that were selected for the Sales Comparison Approach. These sales are all recent transactions, which provides support for the reported market sales activity. According to brokers surveyed, multi-family investment activity is subdued compared to the first half of 2022 due to the increases in the Fed Funds Target Rate which impacts several products including mortgage lending rates. Fundamentals of multi-family properties remain resilient with healthy rent growth and healthy occupancy levels seen across most markets. However, with interest rates in the 6.0% to 7.0% range, most investors are not pursuing multi-family investments for the time being. Brokers reported the only active investors in the multi-family assets are more local in nature with syndicated funds and local/regional bank debt, generally under \$40M price point. Many debt sources are not lending in this inflationary environment as pricing appears to be fleeting based on reports by brokers whom have had deals fall out of contract due to the buyer's lender backing out of the deal. Sales volume is directly impacted by the activity levels of sellers and buyers of this property type.

Seller Activity

Based on research completed on various listing sources including CoStar and Loopnet, properties similar to the subject in terms of pricing and overall investment appeal have somewhat limited availability, with few listings offered within the marketplace. This trend was confirmed with Multi-Family Investment Brokers during the market participant interview process, and represents the general sentiment of market participants interviewed for this and other assignments. Market participants indicated the primary type of seller in the market right now are owners with looming debt maturities or distressed operations.

Most Probable Buyer Profile/Activity

In the open market, the subject property type would command most interest from national buyers that are actively pursuing similar large investment properties. There is currently minimal buyer demand for substitute properties of the subject based on the volume of sale transactions and reports by buyers, sellers and other market participants during confirmation of market transactions. The most probable buyer is a national investor. The majority of the buyers in the market for class A properties in the Houston market are one who have the ability to secure a PFC agreement with the Housing Authority or are seeking properties with favorable assumable debt or value add upside.

Transaction Trends Conclusion

Based on the preceding analysis, there is an established sales market for the subject property. As previously discussed, the velocity of sale transactions has been low over the past six months. Currently there is minimal buyer demand, while there is somewhat limited availability for this property type on the supply side. Based on these factors, conditions favor buyers in regard to negotiating sale terms. One of the greatest observed strengths of this asset type is the particularly sound fundamentals compared to other commercial real estate sectors. One of the greatest observed weaknesses of this asset type is the limited availability of financing based on its marginal appeal to various debt financing sources.

COMPETITIVE DATASET ANALYSIS

The majority of existing supply in the subject's immediate market area was constructed between the 2000s and 2020s. The general area has average to good appeal. The following table summarizes the results of a vacancy survey of directly competing properties to the subject that was confirmed during development of this assignment.

VACANCY SURVEY AS OF NOVEMBER 2023					
PROJECT	UNITS	VACANT UNITS	VACANCY		
Revl Med Center	281	22	7.8%

SUBJECT PROPERTY ANALYSIS

This market analysis has examined historical and current supply/demand trends for the subject property type on market and submarket levels. Further, the subject's competitive dataset was profiled and analyzed to gain perspective of supply/demand conditions for properties in direct competition with the subject. Market participant interviews were conducted to provide ground level support of what is really occurring in the marketplace. Next, transaction trends were researched and analyzed. The final step will be to draw conclusions from the market data and analyses based on their perceived influence on the subject property.

The subject is a Multifamily (Mid/High-Rise Housing) asset with a total of 326 units. The market generally classifies the subject as a large investment property. The subject consists of Studio, 1 bedroom, and 2 bedroom units. The absorption forecast and related lease-up costs for the subject to achieve stabilization are treated in the Valuation section.

DEMAND

Vacancy

Vacancy in the subject's market area is anticipated to remain stable in upcoming months. Based on conversations with on-site managers and owners, vacancy rates in the subject's market area have remained generally stable over the past 12 months.

Rent Levels

Property managers in the area indicate that rents have remained generally level in the area over the past few months. Overall, rent levels are anticipated to remain stable over the next several months given the relatively strong occupancy throughout the area.

Concessions

The level of rental concessions being offered in a market area provides another indication of the level of demand for apartment units. Typical concessions in the market include discounts for new move-ins and for new residents that sign long-term lease agreements. The subject is not currently offering concession. According to our Colliers International Valuation & Advisory Services survey, some of the complexes in the subject's market area are currently offering concessions.

Tenant Appeal Conclusion

Based on our analysis of the subject property and investigation of comparable properties in the marketplace, the subject is considered to have average overall tenant appeal with a relatively weak competitive position for attracting and retaining tenants.

Buyer Appeal Conclusion

Based on our analysis of the subject property and investigation of substitute properties in the marketplace, the subject is considered to have below average overall buyer appeal with a relatively weak competitive position if the asset was exposed to the open market.

General Vacancy Conclusion

As summarized in the table below this market analysis relied on various published data sources and field research for assessing how supply/demand conditions influence the long-term vacancy estimate of the subject property.

GENERAL VACANCY CONCLUSION					
MPF	3Q 2023	LAST YR	AVG LAST 5		
Houston	7.0%	7.0%	6.6%		
West University / Medical Center / River Oaks	5.2%	6.3%	6.7%		
Competitive Set	8.2%	-	-		
Subject	30.0%	-	-		
GENERAL VACANCY RATE CONCLUSIONS			8.0%		

SUMMARY OF MARKET ANALYSIS

Overall, based on interviews with planners and brokers, and Colliers International Valuation & Advisory Services market survey, there is sufficient demand for the improvements. The depth of demand for the subject property is anticipated to be sufficient based on continuing economic and population growth in the subject's area. Rent levels are anticipated to remain stable in the coming months. Demand is expected to remain strong in the subject's immediate market area based upon the general location near the Houston urban core which provides additional strength for the multi-family market in the immediate area.

EXPOSURE TIME & MARKETING PERIOD

Exposure time is defined as "An opinion, based on supporting market data, of the length of time that the property interest being appraised would have been offered on the market prior to the hypothetical consummation of a sale at market value on the effective date of the appraisal." (The Dictionary of Real Estate Appraisal, Appraisal Institute, 2022). Reasonable exposure time is impacted by the aggressiveness and effectiveness of a property's exposure to market participants, availability and cost of financing, and demand for similar investments. Exposure time is best established based the recent history of marketing periods for comparable sales, discussions with market participants and information from published surveys.

The following information was taken into consideration to develop estimates of exposure time and marketing period for the subject property:

EXPOSURE TIME & MARKETING PERIOD					
SOURCE	QUARTER	RANGE		AVG	
PriceWaterhouse Coopers					
National Apartment Market	3Q 23	2.0 to	12.0	6.0	
Southeast Region Apartment	3Q 23	3.0 to	6.0	4.2	
AVERAGE		2.5 to	9.0	5.1	

The availability of acquisition financing factors into exposure time. In recent quarters, financing has been available for well-positioned commercial real estate, particularly for stabilized assets within core MSAs and owner/user deals. For second tier or marginal properties, financing has been available but subject to more stringent requirements. Based on review of the local capital market, we conclude that adequate financing options would have been available to consummate a sale of the property on the date of value.

Exposure Time Conclusion

The preceding information generally supports an exposure time range from 3.0 to 6.0 months for Multifamily (Mid/High-Rise Housing) properties. The subject property is of average/good quality and is in average/good condition. Based on its overall physical and locational characteristics, the subject has average overall appeal to investors. Considering these factors, a reasonable estimate of exposure time for the subject property is six months or less.

Marketing Period Conclusion

Marketing period is very similar to exposure time, but reflects a projected time period to sell the property, rather than a retrospective estimate. We have reviewed open listings and discussed the market with local participants, and given the nature of the subject property, we feel that a time period of six months or less is supported for the subject's marketing period.

INTRODUCTION

The highest and best use of an improved property is defined as that reasonable and most probable use that will support its highest present value. The highest and best use, or most probable use, must be legally permissible, physically possible, financially feasible, and maximally productive. This section develops the highest and best use of the subject property As-Vacant and As-Improved.

AS-VACANT ANALYSIS

Legal Factors

The legal factors that possibly influence the highest and best use of the subject site are discussed in this section. Private restrictions, zoning, building codes, historic district controls, and environmental regulations are considered, if applicable to the subject site. Permitted uses of the subject's None (None) zoning were listed in the Zoning Analysis section and include a wide range of uses that include residential, commercial, and industrial development. The potential use that meets the requirements of the legal permissibility test is multi-family development.

Physical & Locational Factors

Regarding physical characteristics, the subject site is rectangular in shape and has level topography with average access and fair/average exposure. The subject is surrounded by light-industrial development, commercial development and single-family development. Given the subject's location and surrounding uses, the subject site is desirable for multifamily development. Of the outright permitted uses, physical and locational features best support development of a residential property as market conditions warrant for the site's highest and best use as-vacant.

Feasibility Factors

The financial feasibility of those uses that meet the legal and physical tests discussed is analyzed further in this section. Supply and demand conditions affect the financial feasibility of possible uses. Indicators of feasibility, which typically indicate favorable or non-favorable supply and demand conditions, include construction financing and proposed projects. In recent quarters there has been new multifamily development throughout the subject's market area. This is evidence that new multifamily construction is feasible at this time. Financial feasibility factors generally support a three to five-year hold prior to development.

As-Vacant Conclusion

Based on the previous discussion, the subject's highest and best use as-vacant is concluded to be development of a residential property as market conditions warrant.

AS-IMPROVED ANALYSIS

Legal Factors

The subject property, as-improved, is a multifamily mid/high-rise housing project that is zoned None (None). The subject's improvements represent a legal, conforming use. The legal factors influencing the highest and best use of the property support the subject's use as-improved.

Physical & Locational Factors

The physical and location characteristics of the subject improvements have been previously discussed in this report. In summary, the subject's improvements were constructed in 2022 and have a remaining economic life of 54 years based on our estimate. The project is of average/good quality construction and in average/good condition, with adequate service amenities. The subject improvements as-improved are sufficiently supported by site features including its rectangular, level topography, average access and fair/average exposure. Further, the subject's location supports the subject improvements as-improved with similar and homogeneous

developments present in the subject's immediate market area. Physical and location factors influencing the highest and best use of the property support the subject's use as-improved.

Alternative Uses & Feasibility Factors

In addition to legal and physical considerations, analysis of the subject property as-improved requires the treatment of two important issues: 1) consideration of alternative uses for the property; and 2) the marketability of the most probable use. The five possible alternative treatments of the property are demolition, expansion, renovation, conversion, and the subject's use as-improved.

- > **Demolition** The subject improvements contribute significant value above the current land value. Therefore, demolition is not applicable in this case.
- > **Expansion** The subject property comprises approximately 6.39 acres (278,452 SF) and is improved with a mid/high-rise housing multifamily development. The subject site does not contain additional site area for expansion. Therefore, expansion of the subject is not considered a viable option.
- Renovation The subject property is approximately 1 years old and is in average/good condition. Some of the units at the subject have received renovations. Renovating units at the subject is an option. However, the feasibility of said renovation would depend on the scope of work and the associated costs. Based on the scope of work agreed upon for this assignment, we have valued the subject in its as-is condition.
- Conversion Conversion is neither appropriate nor applicable to this property.
- > **Continued Use "As-Is"** The final option is the continued use of the property "As-Is." This is legal, physically possible, and financially feasible. Therefore, continued use, a multifamily (mid/high-rise housing) development is considered appropriate.

Among the five alternative uses, the subject's use as-improved is supported to be its Highest and Best Use.

Marketability Factors

As previously indicated in the Market Analysis, the subject property has fair/average marketability. The condition of the property reflects average maintenance and appeal. In general apartment supply/demand conditions and immediate market area trends support viable short and long-term operations of the subject's use as-improved. Based on our analysis of the subject property and investigation of comparable properties in the marketplace, the subject is considered to have average overall tenant appeal with a relatively weak competitive position for attracting and retaining tenants. Based on our analysis of the subject property and investigation of substitute properties in the marketplace, the subject is considered to have below average overall buyer appeal with a relatively weak competitive position if the asset was exposed to the open market.

As-Improved Conclusion

Legal, physical, and market considerations have been analyzed to evaluate the highest and best use of the property. This analysis is presented to evaluate the type of use that will generate the greatest level of future benefits possible from the property. Based on the previous discussion, the highest and best use of the subject property as-improved is concluded to be continued use as a residential property.

INTRODUCTION

The following presentation of the appraisal process deals directly with the valuation of the subject property. The following paragraphs describe the standard approaches to value that were considered for this analysis.

INCOME APPROACH

The Income Approach is based on the premise that properties are purchased for their income producing potential. It considers both the annual return on the invested principal and the return of the invested principal. This valuation technique entails careful consideration of contract rents currently in place, projected market rents, other income sources, vacancy allowances, and projected expenses associated with the efficient operation and management of the property. The relationship of these income estimates to property value, either as a single stream or a series of projected streams, is the essence of the income approach. The three fundamental methods of this valuation technique include Direct Capitalization, Discounted Cash Flow and Effective Gross Income Multiplier.

Direct Capitalization

This method analyzes the relationship of one year's stabilized net operating income to total property value. The stabilized net operating income is capitalized at a rate that implicitly considers expected growth in cash flow and growth in property value over a buyer's investment horizon. The implied value may be adjusted to account for non-stabilized conditions or required capital expenditures to reflect an as is value.

Discounted Cash Flow (DCF)

The DCF analysis models a property's performance over a buyer's investment horizon from the date of acquisition through the projected sale of the property at the end of the holding period. Net cash flows from property operations and the reversion are discounted at a rate reflective of the property's economic and physical risk profile.

Effective Gross Income Multiplier

Also known as the EGIM, this method is appropriate within the Income Approach because it is recognized that purchasers are concerned with the income-producing ability of the property. The EGIM is derived by dividing the effective gross annual income of each comparable into the sales price. The EGIM has the advantages of simplicity and easy calculation. It is based on the premise that rents and sales prices move in the same direction and, essentially, in the same proportion as do net income and sales prices. The EGIM is typically used without adjustments. The final selection of an effective income multiplier is based upon the applicability of each comparable and a range is established.

Development of the Income Approach is a specific scope requirement of this assignment. Characteristics specific to the subject property warrant that this valuation technique is developed. The subject is an investment property; therefore, the Income Approach represents the decision making process of knowledgeable buyers and sellers of this property type. The Direct Capitalization method is used in this analysis. Discounted Cash Flow analysis does not contribute substantially to estimating value beyond the direct capitalization method and is not used in this analysis.

SALES COMPARISON APPROACH

The Sales Comparison Approach is based on the principle of substitution, which asserts that no one would pay more for a property than the value of similar properties in the market. This approach analyzes comparable sales by applying transactional and property adjustments in order to bracket the subject property on an appropriate unit value comparison. The sales comparison approach is applicable when sufficient data on recent market transactions is available. Alternatively, this approach may offer limited reliability because many properties have unique characteristics that cannot be accounted for in the adjustment process.

Development of the Sales Comparison Approach is a specific scope requirement of this assignment. Characteristics specific to the subject property warrant that this valuation technique to be developed. Sufficient sales data is available to provide a credible value estimate by the Sales Comparison Approach. Based on this reasoning, the Sales Comparison Approach is presented within this appraisal.

LAND VALUATION

Development land in the subject marketplace is most often valued utilizing the Sales Comparison Approach. Development of the subject site value is not a specific scope requirement of this assignment. Characteristics specific to the subject property warrant that a site value is developed. The site value is required to be developed for use within the Cost Approach. Within the Site Valuation section, the subject is valued as one marketable economic site.

COST APPROACH

The Cost Approach is a set of procedures through which a value indication is derived for the fee simple estate by estimating the current cost to construct a reproduction of (or replacement for) the existing structure, including an entrepreneurial incentive or profit; deducting depreciation from the total cost; and adding the estimated land value. Adjustments may then be made to the indicated value of the fee simple estate in the subject property to reflect the value of the property interest being appraised. For investment properties, this valuation technique is most often relied upon as a test of financial feasibility for proposed construction.

Development of the Cost Approach is not a specific scope requirement of this assignment. Characteristics specific to the subject property warrant that this valuation technique is developed. The subject property is new or recently new construction, which increases the reliability of utilizing the Cost Approach. Knowledgeable buyers and sellers typically do not rely on this valuation technique for income-producing properties similar to the subject. Based on the preceding information, the Cost Approach will be presented.

RECONCILIATION OF VALUE CONCLUSIONS

The Income (Direct Capitalization), Sales Comparison and Cost approaches are used to value the subject property, which will be reconciled into the final opinions of market value in the Analysis of Value Conclusions section.

INTRODUCTION

The Income Approach is based on the premise that properties are purchased for their income producing potential. It considers both the annual return on the invested principal and the return of the invested principal. This valuation technique entails careful consideration of contract rents currently in place, projected market rents, other income sources, vacancy allowances, and projected expenses associated with the efficient operation and management of the property. The relationship of these income estimates to property value, either as a single stream or a series of projected streams, is the essence of the income approach. The three fundamental methods of this valuation technique include Direct Capitalization, Discounted Cash Flow and Effective Gross Income Multiplier.

Direct Capitalization

This method analyzes the relationship of one year's stabilized net operating income to total property value. The stabilized net operating income is capitalized at a rate that implicitly considers expected growth in cash flow and growth in property value over a buyer's investment horizon. The implied value may be adjusted to account for non-stabilized conditions or required capital expenditures to reflect an as is value.

Discounted Cash Flow (DCF)

The DCF analysis models a property's performance over a buyer's investment horizon from the current as is status of the property, to projected stabilization of operations and through the projected sale of the property at the end of the holding period. Net cash flows from property operations and the reversion are discounted at a rate reflective of the property's economic and physical risk profile.

Effective Gross Income Multiplier

Also known as the EGIM, this method is appropriate within the Income Approach because it is recognized that purchasers are concerned with the income-producing ability of the property. The EGIM is derived by dividing the effective gross annual income of each comparable into the sales price. The EGIM has the advantages of simplicity and easy calculation. It is based on the premise that rents and sales prices move in the same direction and, essentially, in the same proportion as do net income and sales prices. The EGIM is typically used without adjustments. The final selection of an effective income multiplier is based upon the applicability of each comparable and a range is established.

Given the appraisal problem and defined scope of work, the following table summarizes the value scenarios and Income Approach methods developed within this appraisal report:

INCOME APPROACH VALUE SCENARIOS					
VALUE	METHODS USED				
SCENARIO	DIRECT CAP	DCF	EGIM		
As-Is Market Value	✓				
Prospective Value Upon Stabilization	\checkmark				

As previously discussed within the Valuation Methods section, the Direct Capitalization method is used in this analysis, and Discounted Cash Flow analysis is not developed.

Income Approach Framework

The following identifies the primary sections and order in which the Income Approach is developed.

- Subject Information
- Apartment Rent Analysis
- > Cash Flow Risk Analysis
- Income & Expense Analysis
- > Investment Market Analysis

- Direct Capitalization
- > Adjustments to Value
- > Income Approach Reconciliation

SUBJECT INFORMATION

Rent Roll Data - A rent roll dated October 18, 2023 was provided for our analysis. A copy of the rent roll is located in the addenda of this report. The following table displays the unit statistics of each floor plan based on our analysis of the rent roll.

RECENT LEASES AS OF JANUARY 1, 2020 THROUGH NOVEMBER 28, 2023

We have requested but not been provided with the subject's current in place rates. Further, we have requested but not been provided with the lease commencement and expiration dates for any of the subject's current tenants. Therefore, we cannot determine the in place average rent or the rent of recently signed leases. We have been provided with what we believe is the current asking rent for each unit type however we have not been able to verify their accuracy. Please see our extraordinary assumption regarding the subject's rent roll.

Subject Utility Structure

Water / Sewer - Not included in the rent - RUBS system is used (tenants reimburse owner through 3rd party)

- > **Trash Removal -** Not included in the rent RUBS system is used (tenants reimburse owner through 3rd party)
- > **Gas -** Not present at the subject property
- > Electricity Not included in the rent Residents directly billed from utility provider
- > **Telephone -** Not included in the rent
- > Cable Not included in the rent
- > Internet Not included in the rent
- The subject utilizes a 3rd-party service to administer the billing of the RUBS utilities.

ANALYSIS OF RENT COMPARABLES

Unit of Comparison

The analysis is conducted on a rent per month basis, reflecting market behavior. This unit of comparison is predominantly used in this market.

Selection of Comparables

A complete search of the area was conducted in order to find the most comparable complexes in terms of age, appeal, condition, number of units, and amenities. The rent comparables are located in the subject's local area and range from 0.4 to 2.7 miles from the subject site, with an average distance of 1.2 miles. The subject is in average/good condition with average appeal for the market area considering its vintage. The comparables selected in this analysis are similar properties to the subject property.

Concessions

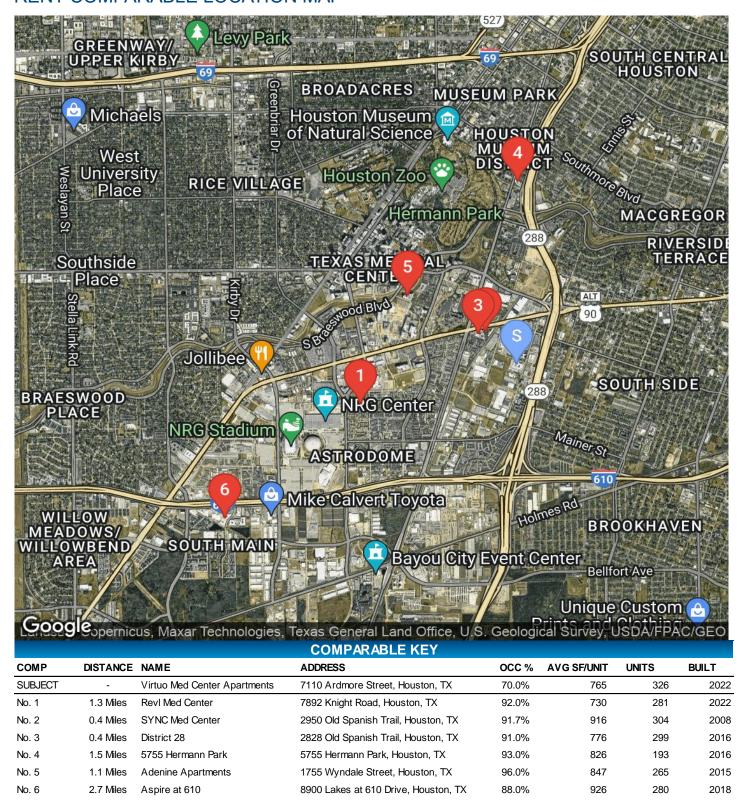

Some of the comparables were offering concessions at the time of survey. Please see the data sheets for full details. Most Class A communities utilize lease optimizer programs which reflect market rents inclusive of rent specials so they are not reported. However, when looking at finacial statements of similar properties, this is almost always a concession line which indicates concessions do exist. As such marginal concessions are estimated for the subject property.

Presentation

The following presentation summarizes the comparables most similar to the subject property. A Rent Comparable Summation Table, Rent Comparable Location Map, Data Sheets, and analysis of the rent comparables is presented on the following pages.

Unit finishes include black appliances, vinyl w ood flooring in living areas w ith carpet in bedrooms, granite countertops, and in unit w asher / dryers. Amenities include a sw imming pool, fitness center, and clubhouse.

DISCUSSION OF RENTAL ADJUSTMENTS

Adjustments for differences between the subject property and the comparables can be made quantitatively or qualitatively. Adjustments for some differences can be derived from the market and are addressed below. Other items for which dollar adjustments are more difficult to derive are addressed in the Qualitative Adjustments paragraph.

Adjustments

The subject property and the comparables vary to some degree in terms of physical characteristics, project amenities, unit amenities, parking, laundry, and utilities. The following grid illustrates the quantitative adjustments applied to the comparables (when necessary) in order to make the comparables similar to the subject in terms of these features.

	REN	T CON	1PA	RAB	LE	ADJ	UST	ГМЕ	T TV	TABL	E

TOTAL ADJUSTMENTS				(\$130)		\$20		(\$50)		(\$50)		(\$100)		\$140

The subject property represents new construction whereas five of the six comparables are at least 5 years old. Therefore, we have applied an upward adjustment for age. All of the properties have class A unit finishes and amenities. However, Revl Med Center has premium stainless-steel appliances and wall to wall vinyl whereas the subject has carpet in bedrooms and closets. Therefore, we have applied partial adjustments for these categories. Additionally, comparable 2 has stainless steel appliances but they are older and of lower quality compared to the subject. Therefore, we have applied a partial upward adjustment. Finally, Comparable 6, Aspire 610, has black appliances rather than stainless steel and has therefore been adjusted upward.

According to the property manager the subject's two main competitors are Revl Med Center and Sync Med Center. These properties, along with District 28 are considered the most comparable to the subject based on their access to the Medical Center and overall quality. 5755 Herman Park and the Adenine apartments are the next most comparable properties as they are both new construction with similar class A finishes and amenities. Aspire 610 is the least comparable due to being older and further away from the Medical Center and the Houston Urban Core.

In order to analyze the subject's location relative to the rent comparables we have presented each property's walk score from walkscore.com. This score ranks a location based on its walkable access to restaurants and bars, grocery stores, shopping centers, errands, parks, schools, and culture / entertainment venues. We have also included each property's transit and bike score.

V	ALK SCORE - RENT	COMPARA	BLES	
Property	Address	Walk Scroe	Transit Score	Bike Score
Revl Med Center	7892 Knight Road	52	57	82
SYNC Med Center	2950 Old Spanish Trail	46	43	55
District 28	2828 Old Spanish Trail	46	43	55
5755 Hermann Park	5755 Hermann Park	72	54	84
Adenine Apartments	1755 Wyndale Street	29	68	79
Aspire at 610	8900 Lakes at 610 Drive	43	40	43
Virtuo Med Center Apartments	7110 Ardmore Street	39	41	57

Walkscore.com gives the following descriptions of each walk score rating:

90-100	Walker's Paradise
	Daily errands do not require a car
70-89	Very Walkable
	Most errands can be accomplished on foot
50-69	Somewhat Walkable
	Some errands can be accomplished on foot
25-49	Car-Dependent
	Most errands require a car
0-24	Car-Dependent
	Almost all errands require a car

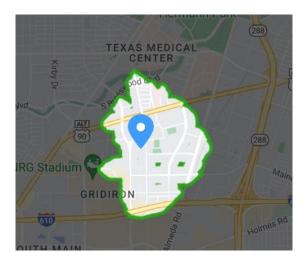

In addition to each property's walk score, we have also considered each property's walkable access to the Texas Medical Center which as discussed previously is a major employment center for high paying medical jobs which creates significant demand for class A properties in the submarket. For the purpose of this analysis we will use the intersection of Bertner Avenue and Holcomb Blvd as the center of the TMC to compare distances from each property.

In order to quantity our adjustments we have included the following published parking rates for garages in the Texas Medical Cetner. While all of the comparables are within a reasonable driving distance of the Texas Medical Cetner, the ability to walk saves approximately \$175 to \$300 per month in parking expense.

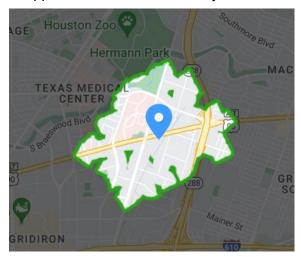

TMC Multiple Facility Access Garages 1, 2, 4, 6, 7, 10, The Commons, LAV	\$350
TMC Campus Garages	
Garages 1, 2, 2GL, 7	\$239
Garages 4, 5, 10, 17	\$204
Garage 8	\$117
Garage 1 Basement	\$308
The Commons (Garage 15)	\$291
Garage 18	\$146
TMC Campus Surface Parking Lots	
A, GG, P1, P3, RR	\$175
AM, AU, M, SM	\$117
Leland Anderson Campus (LAV Lot)	\$117
John P. McGovern Campus	
(2450 Holcombe Surface Lot)	\$146

Virtuo Med Center - The subject is located in an industrial area with minimal walkable access to any of the major medical buildings and is 8 minutes by car and 50 minutes by foot to our designated center point. The subject suffers from being separated from the rest of the area by railroad tracks with no nearby vehicle crossings. According to market participants that we spoke with, including ones who previously listed the property, the subject's location and lack of access was the primary driver of its inability to achieve stabilized occupancy.

RevI Med Center - is located on the southern end of the Texas Medical Center with walkable access to some medical developments but is 6 minutes by car and 31 minutes by foot to the heart of the Medical Center. In addition to stronger access to the Medical Center, RevI has a higher walk score with better access to retail as well and being adjacent to NRG park, home of Houston Texas and the Houston Rodeo. Given these factors we have applied a downward \$100 adjustment. We have included the following map showing the property's 20minute walkable distance:

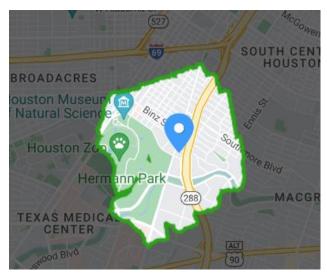

Sync Med Center – is located along Old Spanish Trail southeast of the Medical Center giving it strong visibility from a major road. It is six minute by car and 34 minutes by foot to the center point location, however it is directly across the street from the VA hospital. Whie Sync is only 0.4 miles from the subject, it is on the opposite side of the above-mentioned railroad track which eliminates a major access barrier. The property also has a higher walk score. Given these factors we have applied a downward \$100 adjustment.

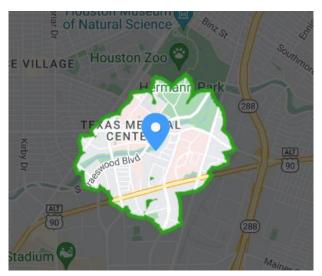

CONTINUED

District 28 – is located adjacent to Sync Med Center with identical visibility and access. Therefore, we have applied the same downward \$100 adjustment.

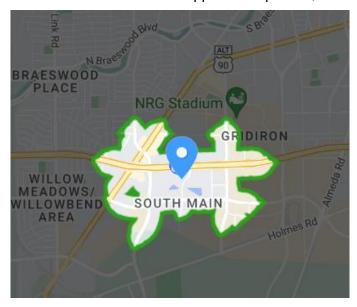

5755 Herman Park - is located northeast of the Texas Medical Cetner and is 6 minutes by car and 43 minutes by foot to the center point. While it is further from the TMC, it is walkable to Herman Park which includes a public golf course and the Houston Zoo. The property is located near the Museum District with walkable access to many of Houston's major museums as well as better access to Downtown Houston. Given these factors we have applied a downward \$100 adjustment.

Adenine Apartments – is located near the middle of the Texas Medical Center and is 3 minutes by car and 13 minutes on foot to the center point. As a result, residents can walk to many of the major employers without the need to pay for parking. Given its location in the middle of the TMC, the property's walk score suffers from a lack of other walkable destinations such as restaurants and grocery stores. Given these factors we have applied a downward \$150 adjustment.

Aspire 610 - is located further from the Texas Medical Center and is outside of the 610 Loop. It is 13 minutes by car and 71 minutes on foot to the center point. The property has a similar walk score to the subject benefiting from retail sites along 610. Given these factors we have applied an upward \$50 location adjustment.

RENT COMPARABLE ADJUSTMENT GRID

The following tables adjust the comparables to the subject property quantitatively.

	RE	NT (COMP	ARAB	LE A	DJU:	STME	ENT SU	JMM <i>A</i>	ARY

Investor Income Expectation Comment

Based on discussions with numerous brokers throughout the subject's region, investors are placing heavy emphasis on actual, "in place" rents, as well as recent leases at this time. Thus, this rental rate analysis will compare the subject's actual, asking, and recent lease rents to market comparables.

MARKET RENT ANALYSIS

The following tables summarize the various indicators of market rent, and provide the market rent analysis and conclusions for the subject property.

				STU	JDIO U	NIT CON	LUSION

Analysis and Conclusions

STUDIO / 1 BA

537

\$1,082

\$2.01

12

50

The rent comparables range in size from 444 SF to 721 SF, with an average unit size of 538 SF. The rent comparables' unadjusted rent per month ranges from \$1,198 to \$1,770, with an average rent of \$1,371. After applying adjustments to the comparables for differences in amenities, laundry, parking and utilities, the rent comparables' rent per month ranges from \$1,068 to \$1,720, with an average rent of \$1,285. Given the lack of data on the subject's in place rents, we have given primary consideration to the rent comparables in our determination of market rent for each unit type.

Analysis and Conclusions

The rent comparables range in size from 600 SF to 1,102 SF, with an average unit size of 801 SF. The rent comparables' unadjusted rent per month ranges from \$1,135 to \$2,139, with an average rent of \$1,551. After applying adjustments to the comparables for differences in amenities, laundry, parking and utilities, the rent comparables' rent per month ranges from \$1,155 to \$2,039, with an average rent of \$1,514. Given the lack of data on the subject's in place rents, we have given primary consideration to the rent comparables in our determination of market rent for each unit type.

Analysis and Conclusions

CONTINUED

HOU230784

The rent comparables range in size from 917 SF to 1,676 SF, with an average unit size of 1,204 SF. The rent comparables' unadjusted rent per month ranges from \$1,482 to \$2,682, with an average rent of \$2,079. After applying adjustments to the comparables for differences in amenities, laundry, parking and utilities, the rent comparables' rent per month ranges from \$1,500 to \$2,582, with an average rent of \$2,049. Given the lack of data on the subject's in place rents, we have given primary consideration to the rent comparables in our determination of market rent for each unit type.

POTENTIAL RENTAL INCOME

The gross rental income equals the total gross income based the rent conclusions presented previously and is summarized in the following table.

TOTAL INCOME BY TYPE

The graph below segregates the subject property's income by type.

PERCENT OF TOTAL INCOME BY TYPE

INCOME & EXPENSE ANALYSIS

The preceding section addressed potential risks associated with the cash flow of the subject property. Having addressed potential risks, it is appropriate to analyze historical revenues and operating expenses. Operating expenses include those items necessary to maintain the subject property and generate income at the forecasted level. Expenses associated with debt financing, depreciation, or other accounting items are disregarded. The following section provides supporting information and discusses the individual expense conclusions for the subject property.

INCOME APPROACH

CONTINUED HOU230784

We have requested from the client the subject's recent T-12 historicals and full year 2022 historicals but have not received either. We have been provided with the Subject's T-12 historical dated April 2023 prior its sale. We have been informed by the client that there is suspected fraud in the subject's historical data. The appraisers do not have the expertise or data to confirm or deny the validity of the financials provided. However based on our years of experience analyzing income and expenses for multifamily properties in the Houston market as well as knowledge of the subject's operations from individuals who previously listed the subject for sale, we cannot give any consideration to the financials provided.

OTHER INCOME

In the following section, we analyzed and made conclusions for the other income items of the subject property.

OTHER INCOME						ANALYSIS

Vacancy

The following table summarizes the results of a vacancy survey of directly competing properties to the subject that was confirmed during development of this assignment.

VACANCY SURVEY AS OF NOVEMBER 2023											
PROJECT	UNITS	VACANT UNITS	VACANCY								
Revl Med Center	281	22	7.8%								
SYNC Med Center	304	25	8.2%								
District 28	299	27	9.0%								
5755 Hermann Park	193	14	7.3%								
Adenine Apartments	265	11	4.2%								
Aspire at 610	280	34	12.1%								
TOTAL/AVERAGE	1,622	133	8.2%								

Source: Colliers International Valuation & Advisory Services

We requested the subject current occupancy as well as historical occupancy from both the property manager and the client but have not received either. We assume that the subject's current occupancy is 70%. Please see our extraordinary assumption. Based on conversations with brokers who listed the property in late 2022 and early 2023 the subject was approximately 80% occupied at that time but had never achieved stabilized occupancy after opening. Our concluded stabilized vacancy of 8.0% is reasonable given the vacancy seen at the rent comparables and the market and submarket overall vacancy.

Credit Loss

Typically credit loss for this type of asset can range from 0% to 3% with Class A/B properties typically falling in the lower end of the range. We have not been provided with reliable historical data with which to analyze the subject's historical collection loss. Therefore, we have concluded to a collection loss of 1.0% based on other class A properties in the market as well as typical buyer underwriting.

Concessions

According to the property manager the new owners offered one month free rent after acquiring the property in June of 2023 but it did not have a noticeable impact of occupancy and therefore was discontinued. The subject is reportedly not offering concessions as of the effective date. We have included the following table detailing the concessions offered at each of the rent comparable:

	RENT COMPARABLE CONCESSIONS								
NAME	CONCESSIONS OFFERED								
Revl Med Center	None								
SYNC Med Center	Up to \$500 off the first month								
District 28	One month free on all floor plans								
5755 Hermann Park	None								
Adenine Apartments	None								
Aspire at 610	One month free rent								

As seen above three of the six comparable are not offering any concessions while two are offering one month free rent and one is offering the equivalent of approximately one to two weeks free rent. We note that the two properties offering a full month free and the two comparables that are significantly older than the subject. We note that most Class A communities utilize lease optimizer programs which reflect market rents inclusive of rent specials so they are not reported. However, when looking at financial statements of similar properties, this is almost always a concession line which indicates concessions do exist. As such we have projected a marginal stabilized concession of 1.0%. Additionally, we have projected concessions of one month free rent in our lease up cost analysis.

Loss to Lease

Our proforma assumes that the subject is operating at stabilization. Therefore, no loss to lease is projected.

Our conclusions are summarized in the table below:

INCOME LOSS								
General Vacancy Rate	8.0%							
Credit Loss Conclusion	1.0%							
Concessions	1.0%							
Loss to Lease	0.0%							
TOTAL	10.0%							

Effective Gross Income

Based on the above analysis we have concluded to the follow EGI projection summarized in the table below:

	EFFECTIVE GROSS INCOME (EGI)										
YEAR	TOTAL	\$/UNIT	ANALYSIS								
April 2023 T-12	\$8,781,109	\$26,936	We have given no consideration to the reported historical EGI. Our concluded EGI is based on our projection of market rent for each unit type based on the rent comparables as well as other income and income loss.								
CONCLUDED EGI	\$6,031,210	\$18,501									

Analysis of Operating Expenses

Expenses are estimated based on one or more of the following sources: (1) historical or projected operation of the subject; (2) comparable expense properties; (3) published operating sources; or (4) individual suppliers. The expense comparables reflect varying accounting methods with respect to individual line items and reserves for replacement expenses. On a line-item basis, due to the variances in accounting and classification, their applicability is diminished. The following section provides supporting information and discusses the individual expense conclusions for the subject property. The operating expenses for the subject property were presented previously. The following chart summarizes comparable expenses.

ANALYSIS

Franchise Tax is an income tax which depends on numerous scenarios and there are various tax rates that could be imposed on the property owner, if any. Thus, for our analysis we have assumed the subject's owners would qualify for the 0.331% tax rate unless the property's EGI is over \$20 million. If the property has an EGI below \$1,230,000, no franchise tax would be due.

ANALYSIS

This expense includes all premiums and costs incurred for insurance covering structures, public liability, rental value, and equipment. Market participants have indicated a significant increase in insurance cost for properties renewing their coverage in 2023. This has been especially impactful for properties in costal areas and flood zones. While insurance cost vary based on a properties improvements and locations, market participants indicate that the average increase has been approximately 50% to 100% from the previous rate. Historical operating expense data was unavailable for this analysis. The expense comparables provided for this category report a wide range of expenses and are less reliable. The conclusion is based on the current insurance cost for class A properties in the Houston MSA.

INVESTMENT MARKET ANALYSIS

Development of Capitalization Rate

The going-in capitalization rate, also known as overall rate (OAR), can be determined using several sources and methods. In developing our opinion of OAR, the following techniques were used:

- > Comparable Sales (Sales Comparison Approach)
- > Supplemental Comparable Sales (Competitive Market)
- Investor Surveys
- > Band of Investment Technique
- Mortgage Equity Technique

Comparable Sales

The following table presents a summary of the comparable sales used ahead in the Sales Comparison Approach, and the capitalization rates from each of those sales.

	CAPITALIZATION RATE COMPARABLES (OAR)												
	NAME CITY ST SALEDATE YR BLT CLASS UNITS AVG UNIT SF \$/UNIT SALE PRICE										CAP RATE		
1	Dolce Midtow n	Houston	TX	November 15, 2023	2019	Α	201	829	\$183,567	\$36,897,000	6.05%

HIC	SH .			November 2023							6.75%		
A۷	ERAGE							5.46%					
MEDIAN November 2023									5.07%				
INE	INDICATED CAPITALIZATION RATE (OAR) 6.00%										6.00%		

For this analysis, we have provided five primary sales comparables, which are later presented in the Sales Comparison Approach. These five primary sales have capitalization rates ranging from 4.76% to 6.05%, with an average of 5.12% and a median of 4.93%. Comparable 2 will be converted to PFC structure upon sale and will therefore, we tax exempt. According to a party to sale this had a downward impact on cap rate, though the impact is difficult to quantify. Comparables 3 and 4 sold in the summer of 2023 and were priced several months prior during lower interest rates and more favorable market conditions. As a result, these properties sold at lower cap rates than would be expected as of the effective date. Comparable 5 has an assumable 2.15% HUD loan which resulted in a below market cap rate given current market conditions. Given the limitations of the primary comarables we have also included two supplemental cap rate comparables. Cobalt Lake Houston is a Class A property in the Houston suburbs whose cap rate reflects current interest rates. Elle Collection is a 1990's vintage three property portfolio southeast of the Medical Center which was awarded within weeks of the effective date but has not yet been formally placed under contract. With consideration of the comparable data presented for this analysis, a capitalization rate of 6.00% is most reasonable and indicated for the subject property.

Investor Surveys

As will be discussed below, there have been significant changes in the market over the past year as the Federal Reserve has pushed interest rates up to a level multiple times higher than it was mid-2022. In turn, sales have plummeted as investors reassess their risks and wait for some stability to return. Brokers report a broad range in bid-ask spreads due to the weakened sentiment brought on by both recent changes in the debt market and widespread fears of a forthcoming recession. Given the recent scarcity of pricing evidence in the new, more expensive debt environment, it is important to triangulate from a range of data types and sources.

FEDER	AL RESERVE	POLICY I	DECISIO	NS

Ma y-23	25 bps	5.00%	to	5.25%
Jul-23	25 bps	5.25%	to	5.50%

With the increased inflow of capital to multifamily real estate over the past two years, capitalization rates throughout the nation dipped over the course of 2021 and early-2022, with proforma cap rates for well-located trophy assets dropping below 3.0% in some cases. However, above average inflation in areas of basic needs for consumers, including food, fuel, and shelter, resulted in an aggressive response from the Federal Reserve. In response to ongoing inflationary pressures, the Federal Reserve has increased interest rates several times over the past year and continues to signal further increases are possible through 2023 until there is clear evidence that inflation is under control.

Fed officials are united in the belief that the higher cost of money will restore the rate of inflation to pre-pandemic levels of 2% or less by 2025, based on its preferred Personal Consumption Expenditures (PCE) price index. The Personal Consumption Expenditures Price Index is a measure of the prices that people living in the United States, or those buying on their behalf, pay for goods and services.

While interest rate increases were both frequent and stout at the beginning of the rate hikes, the target Federal Funds rate has remained unchanged at the 22-year high established with the last hike in July 2023. Measures taken by the Fed appear to be having the desired impact as the annual US Inflation Rate has fallen from its 40-year high of 9.1% in June 2022 to 3.24% for the 12 months ending in October. The advance in the core rate of inflation (which omits food and energy) over the past 12 months dropped to 4.0%

from its September 2022 high of 6.6% to mark the lowest level in over a year. The Fed views the core rate as a more accurate predictor of future inflation trends.

Fed Chairman Jerome Powell has acknowledged that a "disinflationary" process is underway, but also reiterates the Fed needs to see "substantially more evidence" that price pressures are evaporating. Powell has indicated that officials expect to keep rates higher through next year. Although the Fed has not sworn off the possibility of additional rate hikes—with Fed chair Jerome Powell reiterating that FOMC decisions are data dependent—the market believes that the Fed has reached the terminal rate of their hiking cycle and has begun pricing in future rate cuts.

Impacts of Rising Interest Rates

Generally, rising interest rates create issues for the commercial real estate market, as the cost of borrowing capital is a consideration in real estate pricing. Real estate investors have long used BBB bond rates as a point of comparison to cap rates. As the 10-year Treasury is considered a "risk-free" bond, while BBB bonds have inherent levels of risk, such as default, bankruptcy, etc. Since the

US Corporate BBB Effective Yield (I:USCBBBEY)

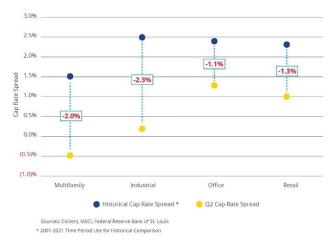

6.13% for Nov 17 2023

beginning of 2022, BBB bond rates have moved from 2.7% to upwards of 6.13% in recent days.

Since the Great Financial Crisis (GFC), cap rate spreads have generally been above their long-term trend. For office, industrial and retail, that spread has historically averaged between 2.3 and 2.5 percentage points (cap

rates above BBB bonds). Multifamily historically trades at a tighter spread of 1.5 percentage points, as shown in the following chart.

Real estate's solid fundamentals, particularly on the industrial and multifamily side, stand in stark contrast to BBB bonds. A bond is a bond, and while they trade on the open market causing price movement, the coupon is a fixed rate. Improving occupancies and rents have and continue to fuel strong NOI growth. This suggests that real estate can, and rationally should, act differently than BBB bonds in a rising interest rate environment. Add in real estate's ability to hedge against inflation (for the same reasons mentioned above rising rents and NOI), and there is further support for movement to below trend spreads.

Cap rates of recently closed developments generally remain below or in-line with prevailing commercial mortgage rates, which in general appear to be operating in a range between 6.0% and 7.0% as of 4Q 2023. As such, many investors are still going into deals with negative leverage in primary markets; however, negative leverage in secondary and tertiary markets is generally no longer a reality. Broadly, local brokers are suggesting that potential buyers are expecting cap rate premiums of at least 150 to 300 basis points from levels seen in late-2021/early-2022.

Transaction Volumes and Pricing Trends

Rising interest rates have impacted the multifamily market the hardest given the record low cap rate environment. Multifamily drove nearly 50% of all volume in the first half of 2022. However, volume was down was down 84% year-over-year by December, and by the end of the Third Quarter of 2023, volume remains 62% below levels one year prior. Despite this sharp decline, multifamily remains among the top draws for capital in the current environment. Multifamily remains the most liquid asset class overall, with Q3 volume totaling \$30.1 billion. In addition, multifamily accounted for 36.5% of all sales

2023 Q3 Sales Volume (by Asset Class)

	Volume (\$ billions)	Volume Change (YOY)	Price Change (YOY) 1

volume this quarter, well ahead of its pre-COVID norm of 31.8%. At the height of the market, multifamily regularly accounted for 40% or more of volume, suggesting a sense of normalcy is returning. Cap rates are rising and, per quarterly averages, are back to 2019 levels.

As borrowing costs have escalated, pricing pressure has increased. Cap rates remain in an expansionary phase with many buyers generally requiring higher cap rates than sellers are willing to accept. As a result, many sellers are holding onto their assets unless they have a liquidity event, such as pending loan maturity, meaning buyers will have fewer new sales offerings than usual.

While double-digit rent growth continued to prop up transactions through most of the 2022 and early 2023, growth has slowed, or even reversed in many of the formerly hot Sunbelt markets. CoStar reports that even if lending costs ease, forward-looking rent growth, along with rising insurance costs, is another sensitive metric holding buyers back in the current market.

Barry Gosin, Chief Executive of Newmark, opined that "the rapid rise of global interest rates has materially impacted transaction volumes. We do not expect volumes to rebound until interest and capitalization rates

¹ Each index is calculated independently

² Index comprises office, industrial, retail, and multifamily

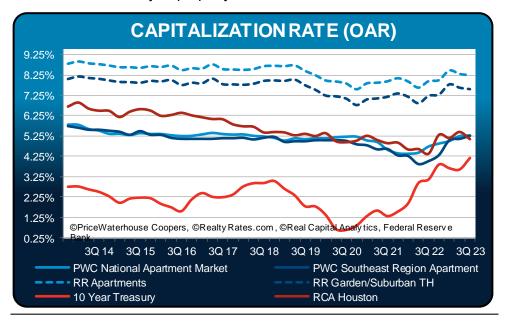

stabilize and the strong fundamentals of commercial real estate reemerge... The banks are in a good position to lend. ... [There's] over \$410 billion of global institutional real-estate focused capital waiting to be deployed and \$2.5 trillion of commercial and multifamily debt maturing over the next five years."

Higher interest rates have made deals more challenging, but the rate jump comes at a time when multifamily fundamentals remain attractive, which is benefitting from a supply-demand imbalance and material and labor shortages that have increased the barriers to building new supply.

Miles Zander, Director of Investments for LV Collective, an Austin-based real estate investment firm focused on acquiring, developing, and managing high-quality real estate in high-profile locations throughout the nation, reports that investors are uniform in their assumption that cap rates will drop as interest rates begin moving back down. He opines that while the buyer pool is deep, there are few sellers willing to dispose of properties in the current capital environment, resulting in large bid-ask spreads, which show little signs of letting up in the near term.

Upcoming loan maturities have been a hot topic among the capital markets community, and rightfully so. Lenders are starting to see assets come back, or they are opening the door to short sales and loan sales. The amount of parked capital available offers a ray of hope and stands as one of the brighter spots in the market today. The biggest challenge is likely meeting IRR hurdles. Given the cost of debt, some of this capital will be stuck, as unlevered returns typically cannot meet targets alone. Overall, investors are well positioned to capitalize on the types of deals that will need capital and the opportunities that will likely present themselves.

The following graph provides a historical illustration of capitalization rate statistics as surveyed by investors that we considered to be relevant to the subject property.

The following table provides the most recent survey results from investors and our independent market participant interview.

Market Participants

We interviewed local Houston multifamily investment sales brokers at five of the major brokerages that sell class A multifamily properties in the urban core. Their opinions of cap rate range for the subject property assuming stabilized occupancy and operations are as follows:

MARKET PARTICIPANT INTERVIEWS - CAPITALIZATION RATES (OAR)						
TITLE	COMPANY	DATE		RANG	E	
Director	IPA	4Q 23	5.50%	to	6.00%	
Director	JLL	4Q 23	5.75%	to	6.25%	
Director	New mark	4Q 23	5.50%	to	5.75%	
Managing Director	Berkadia	4Q 23	6.25%	to	6.50%	
Associate	CBRE	4Q 23	5.50%	to	6.00%	
Executive Managing Director	Cushman & Wakefield	4Q 23	5.75%	to	6.25%	
Average		4Q 23	5.71%	to	6.13%	

Director, IPA – Previous listing broker for the subject in late 2022 and early 2023. The cap rate for the subject assuming stabilized operations would likely be below 6.0%. For properties that are not stabilized but have positive cash flow and occupancy north of 80%, buyers are looking to purchase at cap rate of 5.25% to 5.50% based on current in place income. Given the subject's current occupancy and lack of positive cash flow the subject would likely be priced at a stabilized yield to cost above 7.0%, likely between \$120,000 and \$130,000 per unit. There are currently around 15 class A properties on the market in Houston with prices between \$130,000 and \$150,000 per unit. Given current market conditions and interest rates, buyers would not pay above the price of those stabilized properties for the subject given its low occupancy and lack of positive cash flow. He pointed to Prose Hardy Yards, a 2022 new build property just north of Downtown Houston which achieved stabilized occupancy. This property was reportedly on the market for \$160,000 per unit but was pulled off the market due to lack of demand at that price. The subject never reached stabilized occupancy after opening and remained around 80% occupied during the time the property was listed. In his opinion the subject's occupancy issues are is due to its poor location lacking easy access to the Texas Medical Center as well as access to supporting retail.

Director, JLL – The subject's cap rate would be around a 6.0% today assuming stabilized occupancy. The cap rate could be slightly lower depending on the discount to replacement cost which is driving demand for class A properties in the Houston Urban Core. Cap rates have decreased slightly in recent weeks as the 10 year treasury, which peaked above 5% in early October but has since declined into the mid 4% range.

Newmark, Director – Cap rate range of 5.50% to 5.75% based on current market conditions.

Berkadia, Managing Director –Cap rates are around 6.0% for new construction property in the Urban Core. However, given its location the subject would likely trade at a higher cap rate between 6.25% and 6.50% at stabilization. He pointed to the Elle Collection, a 1990's vintage three property portfolio in the Medical Cetner area which was recently awarded at a cap rate of approximately 6.75%. The subject's as is sales price would likely fall somewhere between \$100,000 and \$150,000 per unit.

Associate, CBRE – The subject would be expected to sell between 5.50% and 6.0% based on current market conditions. The cap rate spread between class and class B/C properties is beginning to thin out as typical class B/C buyers are increasingly looking at class A properties due to low-cost basis. There are buyers in the market looking to purchase distressed properties at a discount, however they have had difficulty raising equity from investors.

Executive Managing Director, Cushman and Wakefield – Previous part of the team at IPA that listed the property. The subject was originally built by a retail developer who was making their first attempt at multifamily. As a result of their inexperience the developer ran our of money at the end of the project and did not have the funds to properly complete the finishing touches or fund the lease up. As a result of this, as well as the subject's poor location, it has struggled with occupancy since opening. The cap rate for the subject if stabilized today would range from 5.75% to 6.25% assuming some remaining upside in the property. Buyers are seeking positive leverage by month 12 and no later than month 18. The subject would be valued at a 7.0%+ stabilized yield to cost in its as is condition.

Band of Investment Technique

Because most properties are purchased with debt and equity capital, the overall capitalization rate must satisfy the market return requirements of both investment positions. Lenders must anticipate receiving a competitive interest rate commensurate with the perceived risk of the investment or they will not make funds available. Lenders also require that the principal amount of the loan be repaid through amortization payments. Similarly, equity investors must anticipate receiving a competitive equity cash return commensurate with the perceived risk or they will invest their funds elsewhere.

To analyze the capitalization rate from a financial position, the Band of Investment Technique is used. Available financing information indicates the following terms:

BAND OF INVESTMENT ASSUMPTIONS					
Loan Amortization Period	30 Years				
Interest Rate	6.50%				
Loan-to-Value (LTV) Ratio	60%				
Mortgage Constant	7.58%				

Equity dividend rates vary depending upon motivations of buyers and financing terms. The previous terms and an appropriate equity dividend rate are used in the Band of Investments calculations, which are presented on the following chart.

BAND OF INV	ESTMEN	IT C	ALCULA	TIO	N
Mortgage Component	60%	Х	7.58%	=	4.551%
Equity Component	40%	х	9.00%	=	3.600%
Indicated Capitalization Rate					8.151%
INDICATED CAPITALIZATION RATE					8.15%

The band of investment reflects the year 1 cap rate indication based on cost of capital, LTV, and going in return on equity. However, it does not reflect the increasing return on equity as a result of anticipated rent and NOI growth, as well as the impact of interest only loan terms. As a result, the band of investment tends to reflect the market ceiling in terms of capitalization rate indications in the present environment where rent growth is anticipated to continue occurring at an elevated level. Consequently, we have placed greater reliance on recent transactions, pending sales, and current market participant feedback.

It should be noted that interest rates have risen faster than cap rates in the local market, creating an environment where many buyers are going into deals with negative leverage. Negative leverage is defined as when the cap rate on a property acquisition is less than the cost of debt or debt constant and therefore, the cash-on-cash return is less than the cap rate. Buyers of multifamily properties are willing to invest with these terms for a number of reasons: one being that they may have capital raised in a fund that they are eager to allocate; another being that they believe rent increases will be high enough to generate positive leverage within a short period of time; and finally, as protection from inflation, which is currently at its highest level in decades. All of these factors are present to some degree and provide support for our concluded equity and mortgage components above, which reflect the inverse of the typical mortgage-equity relationship where the equity component is expected to exceed the mortgage component.

Equity Dividend Rate	9.68%					
SOURCE: Realty Rates - 3rd Qu	uarter 2023 l	Data				

Our loan-to-value ratio of 60% is bracketed by the survey data which ranges from 55% to 90%. Mortgage interest rates range from 4.32% to 8.37%, which brackets the Colliers projection of 6.50%. The Colliers Equity Dividend Rate of 6.5% is bracketed by the survey data, which ranges from 4.70% to 13.74%, with an average of 9.68%.

Debt Coverage Ratio Technique

An alternate method to calculating capitalization rates based on financing metrics is the Debt Coverage Ratio method, which uses the relationship between the DCR, LTV, and mortgage constant to conclude to a rate value. Based on the assumptions previously discussed, we have concluded to a DCR of 1.30, an LTV of 60% and a mortgage constant of 7.58%. The following calculation indicates the cap rate conclusion by this method:

DEBT COVERAGE RATIO CALCULATION					
Debt Coverage Ratio	1.30				
Loan-to-Value (LTV) Ratio	60%				
Mortgage Constant	7.58%				
INDICATED CAPITALIZATION RATE 5.92%					

The Band of Investment does not reflect the impact of interest only loans. Typical investors are receiving several years of interest only, which is driving cap rates below levels indicated by the Band of Investment analysis and DCR ratio indications

Capitalization Rate Conclusion

Taking all factors into consideration, the following table summarizes the various capitalization rate indicators and provides the final capitalization rate conclusion.

CAPITALIZATION RATE CONCLUSION (OAR)						
SOURCE	QUARTER	R.	ANG	E	AVG	
Comparable Sales		4.76%	to	6.05%	5.12%

Investor Surveys	3Q 23	4.51%	to	9.17%	6.59%	
Market Participant Survey	4Q 23	5.75%	to	6.25%	6.0%	
Band of Investment Technique					8.15%	
Debt Coverage Technique					5.92%	
AVERAGE		5.23%	to	7.06%	6.35%	
CAPITALIZATION CONCLUSION					6.00%	

We have placed primary emphasis on the cap rate comparables as well as the market participant interview in our concluded cap rate. We note that our concluded cap rate reflects the subject at stabilization and does not account for the risks associated with the subject as is.

STABILIZED DIRECT CAPITALIZATION

This method analyzes the relationship of one year's stabilized net operating income to total property value. The stabilized net operating income is capitalized at a rate that implicitly considers expected growth in cash flow and growth in property value over a buyer's investment horizon. The implied value may be adjusted to account for non-stabilized conditions or required capital expenditures to reflect an as is value.

The subject property is expected to attain stabilized occupancy in year 1. The following table summarizes our opinion of market value for the subject property via Direct Capitalization including the Prospective Value Upon Stabilization (Capitalized Value) as of January 1, 2025.

We have estimated the subject will achieve stabilized occupancy in the 13 months following the effective date of this report. Given the recently flat trends in terms of rent growth across the Houston market, no inflation factors have been utilized.

ADJUSTMENTS TO VALUE

Lease-Up Analysis

We have appraised the subject under the extraordinary assumption that it is 70% occupied at market rent as of the effective date. Based on discussions with market participants the subject never reach stabilization after opening and was in the low 80% range in early 2023 before declining over the course of the year. As such, lease-up costs associated with the subject achieving stabilization are warranted in arriving at the As-Is Market Value.

The following table shows the absorption costs for the subject, based on the rental conclusions of this report and current 30% vacancy rate. Additionally, it is estimated that the subject will need to offer a strong concession of one month free, to promote occupancy and move-in. Based on the average market rent of \$1,528, and an average of one month free rent, rent loss is estimated at about \$1,500/unit and is represented in the "Marketing" expense. Given the subject's location and poor performance history, we have included to a 100.00% profit on lease up cost to reflect both the risk and expected return for a buyer to purchase the subject in as is condition.

Rounded to nearest \$10,000

We have included the following absorption comparables from other new constriction multifamily properties in the Houston Urban Core to support our concluded lease up timing.

ABSORPTION COMPARABLES						
Property Name	Year Built	# of Units	Precent Occupied	Lease Up Period (Months)	Units Leased	Units Per Month
RevI Med Center	2022	281	95%	14	267	19.1
Prose South Main	2022	335	96%	11	322	29.2
2111 Austin	2020	215	96%	18	206	11.5
Boone Manor	2022	247	97%	13	240	18.4
Broadstone Memorial Park	2021	358	91%	12	326	27.1

Given the above compablables our concluded lease up timing of 5 units per month appears conservative and takes into account the subject's historical difficulty in achieving stabilized occupancy.

Risk / Profit Adjustment

Entrepreneurial profit is applicable with significant capital expenditures are incurred on a property or a property is being purchased at below stabilized NOI. When buyers contemplate an appropriate purchase price for properties that are not stabilized (i.e. the property effected by deferred maintenance, below-stabilized occupancy, or both), the buyer first calculates the out-of-pocket costs to achieve stabilization. Typically, this involves the cost of repairs, and/or the cost of the lost revenue until the property achieves stabilized occupancy. However, the buyer must be induced to buy a property that is not stabilized. That is, if the buyer can only reduce the sale price by the amount of the actual out-of-pocket funds, the buyer is not being compensated for the time, capital, opportunity cost, and risk associated with purchasing un-stabilized properties. Thus, the buyer will make an additional deduction from the sale price for "profit/risk."

Extensive interviews with various market participants who actively purchase and renovate sub stabilized properties indicate that two factors are considered when estimating an appropriate "profit/risk" allocation: One method buyers consider is an allocation as a percentage of the total lease up cost or renovations/capital expenditures. Here, buyers consider the overall dollar amount of profit as compared to the total capital outlay. Typically buyers quote profit/risk rates of 25% to 150% percent of total capital expenditures. The higher the cost usually corresponds with a higher risk and the resulting higher required return.

Another method often reported on value-add properties, where the renovation is more substantial, is a calculation of profit as a percentage of return on the entire project, i.e. the stabilized market value. In this scenario, the entrepreneurial profit is normally a greater overall dollar amount but smaller percentage of the investment. This method is often necessary when significant upside value is created from a renovation. This method applies a profit on the future value of the asset that reflects the increase in market value from increased revenue performance that is a result of the renovation.

Each buyer reports that profit/risk allocations are evaluated on a case-by-case basis and are property specific based on the overall capital outlay and risk level. The method selected varies and there is no particular rule of thumb or trend.

Given the lack of any truly comparable transactions, we spoke with multiple market participants in order to estimate how buyers would price the subject is as is condition. Brokers that we spoke with indicated that since the increase in interest rates and decline in market conditions beginning in early 2022, buyers have shown minimal interest in property which do not have positive cash flow day one. Further, they require a path to positive leverage by month 12 and no later than month 18. These brokers indicated that there are approximately 15 class A properties in the Houston MSA with asking prices between \$130,000 and \$150,000 per unit and in many cases

are receiving weak demand. It is the brokers' opinion that buyers would prefer to purchase these stabilized properties, despite being outside the Houston Urban Core, than the subject in as is condition. Therefore, we have applied a further risk / profit adjustment of 15% to the concluded as is value and lease up cost which represent the buyer's initial capital outlay.

Two brokers that we spoke with indicated that the subject as is would be priced north of 7.0% on a stabilized yield to cost, ie stabilized NOI / as is value. Our stabilized NOI of \$2,907,488 and concluded as is value of \$40,400,000 results in a stabilized yield to cost of 7.20% which represents a 120 basis point spread between the stabilized and as is cap rates. Two of the market participants that we spoke with gave price per unit opinions for the subject property in as is condition which ranged from \$100,000 per unit to around \$150,000 per unit with emphasis on the middle of the range, which is in line with our as is value conclusion.

Total Adjustments to Value

A summary of the value adjustments that are applicable for valuation of the subject property are summarized in the following table.

SUMMARY OF VALUE ADJUSTMENTS					
ADJUSTMENT ITEM		ADJUSTMENT			
LEASE-UP COSTS					
Rent Loss		\$788,037			
Marketing		\$108,000			
Subtotal Lease-Up Costs	3	\$896,037			
Entrepreneurial Profit		\$896,037			
TOTAL LEASE-UP COST	S	\$1,792,075			
Profit / Risk	15%	\$6,328,811			
TOTAL ONE TIME ADJUS	STMENT	\$6,328,811			
TOTAL VALUE ADJUSTME	ENTS	\$8,120,000			

Rounded to nearest \$10,000

The preceding value adjustments were applied consistently to all approaches to value that were developed in this appraisal.

RECONCILIATION OF INCOME APPROACH VALUES

The following table summarizes the opinions for market value that were developed by the Direct Capitalization and Effective Gross Income Multiplier methods of the income approach. Of the two approaches, the Direct Capitalization analysis is considered more reliable because it mirrors the sentiment of participants in this asset class. Therefore, the reconciled values below place primary emphasis on the Direct Capitalization method.

VALUATION INDICES	MARKET VALUE AS-IS	PROSPECTIVE VALUE UPON STABILIZATION
INTEREST APPRAISED	LEASED FEE	LEASED FEE
DATE OF VALUE	NOVEMBER 28, 2023	JANUARY 1, 2025
INCOME	CAPITALIZATION APPROACH	
Direct Capitalization	\$40,400,000	\$48,500,000
Direct Capitalization \$/Unit	\$123,926/Unit	\$148,773/Unit
Direct Capitalization \$/SF (NRA)	\$162.03/SF	\$194.52/SF

Income Conclusion \$/SF (NRA)	\$162.03/SF	\$194.52/SF

INTRODUCTION

The Sales Comparison Approach is based on the principle of substitution, which asserts that a buyer would not pay more for a property than the value of similar properties in the market. This approach analyzes comparable sales by applying transactional and property adjustments to bracket the subject property within an appropriate unit value comparison.

UNIT OF COMPARISON

The most relevant unit of comparison is the price per unit. This indicator best reflects the analysis used by buyers and sellers in this market for improved properties with similar design and utility.

COMPARABLE SELECTION

We completed a thorough search for similar improved sales in terms of property type, location, physical characteristics, and date of sale. In selecting comparables, emphasis was placed on confirming recent improved sales of properties that match the highest and best use, and buyer/seller profile of the subject property. The sale comparables are located in the subject's region and range from 1.0 to 4.6 miles from the subject site, with an average distance of 3.0 miles. Overall, the sales selected represent the best comparables available for this analysis.

The appraiser made extensive attempts to locate recently closed sales as well as active listings within the marketplace. For closed sales, we searched the databases of CoStar, Real Capital Analytics and Reis, all of which monitor the Subject's metro area for new sales data. While there are a handful of recent sales that are comparable to the Subject not used in this report, Texas is a non-disclosure state and sales prices are not made public. We attempted to confirm information of numerous comparable sales with knowledgeable parties, but were unable to uncover reliable data for several of these sales. Given the significantly reduced sales volume over the past year, there are few pending sales available to the appraisers, and brokers/buyers/sellers are typically not willing to share this information with unrelated parties. The sales (whether active, pending, or closed) presented in the sales comparison approach are the most appropriate and relevant and comparable sales available to the appraisers for this analysis.

ADJUSTMENT PROCESS

Quantitative adjustments are made to the comparable sales. The following adjustments or general market trends were considered for the basis of valuation.

Transactional Adjustments

Dollar adjustments to the comparable sales were considered and made when warranted for transactional adjustments in the sequence shown below:

Property Rights Transferred The valuation of the subject site was completed on a leased fee basis. If

warranted, leased fee, leasehold and/or partial interest sales were adjusted

accordingly.

Financing Terms The subject property was valued on a cash equivalent basis. Adjustments were

made to the comparables involving financing terms atypical of the marketplace.

Conditions of Sale This adjustment accounts for extraordinary motivation on the part of the buyer or

seller often associated with distressed sales.

Expenditures After Purchase Adjustments were applied if physical conditions warranted expenditures on the

part of the buyer to bring the comparable up to functional standards. Most often

this adjustment accounts for costs associated with deferred maintenance.

Market Conditions

Market conditions adjustments were based on a review of historical sale data, market participant interviews and review of current versus historical pricing. As previously discussed, and summarized in the table below, the Federal Reserve began a series of consecutive interest rate increases that started in March 2022.

FEDER	AL RESERVE I	POLICY	DECISIO	NS
DATE	RATE INCREASE	TARGET F	EDERAL FU	NDS RATE
Pre-March 2022	-	0.00%	to	0.25%
Ma r-22	25 bps	0.25%	to	0.50%
Ma y-22	50 bps	0.75%	to	1.00%
Jun-22	75 bps	1.50%	to	1.75%
Jul-22	75 bps	2.25%	to	2.50%
Sep-22	75 bps	3.00%	to	3.25%
Nov-22	75 bps	3.75%	to	4.00%
Dec-22	50 bps	4.25%	to	4.50%
Feb-23	25 bps	4.50%	to	4.75%
Mar-23	25 bps	4.75%	to	5.00%
Ma y-23	25 bps	5.00%	to	5.25%
Jul-23	25 bps	5.25%	to	5.50%

As of the date of this report, the federal fund rate has increased over 400 basis points (bps) within less than a year, with the most recent increase of 25 bps in July 2023, and is currently 5.25%-5.50%. However, the Federal Reserve Chairman, Jerome Powell, commented on possible smaller interest rate increases and/or pauses are likely ahead in the current year (2023) if inflation can be tamed. The multifamily market was seeing steady growth from year to year prior to early 2022.

However, as a result of the recent Federal Reserve action and sharp interest rate increases, treasury yields and mortgage rates have sharply increased and the velocity of the changes have forced the market into a transition. Interviews with numerous multifamily brokers indicate a relatively stagnant market at this time as sellers are reluctant to lower their asking price significantly to offset the impact of increased interest rates, and prospective buyers are finding it challenging to make sound investments at the prices seen in previous months as a result of the significantly higher cost of debt. Brokers have stated that the market has started to slow down and stall given the change in fundamentals. And the lack of current listings and recent sales comparables have made it challenging to confirm and/or quantify the impacts from rising inflation as it relates to mortgage interest rates. This is typical in real estate as sales are a lagging economic indicator. The change in the interest rate environment has negatively impacted many commercial real estate sectors. However, the magnitude of the impact on the multifamily sector is uncertain at this time. In our analysis, we have included some sales comparables that transacted when interest rates were generally lower and thus also resulted in lower capitalization rates.

All of the comparable sales occurred within six months of the effective date. However, as discussed in the income approach, interest rates have continued to

rise in the second half of 2023 which has led to further cap rate increased and a decline in market value. As a result we have applied a downward adjustment to the sales comparables which occurred in the summer of 2023.

Location

The location adjustment considers 1) the strength of the property's submarket and 2) the surrounding uses of the comparable as compared to the subject property.

Property Adjustments

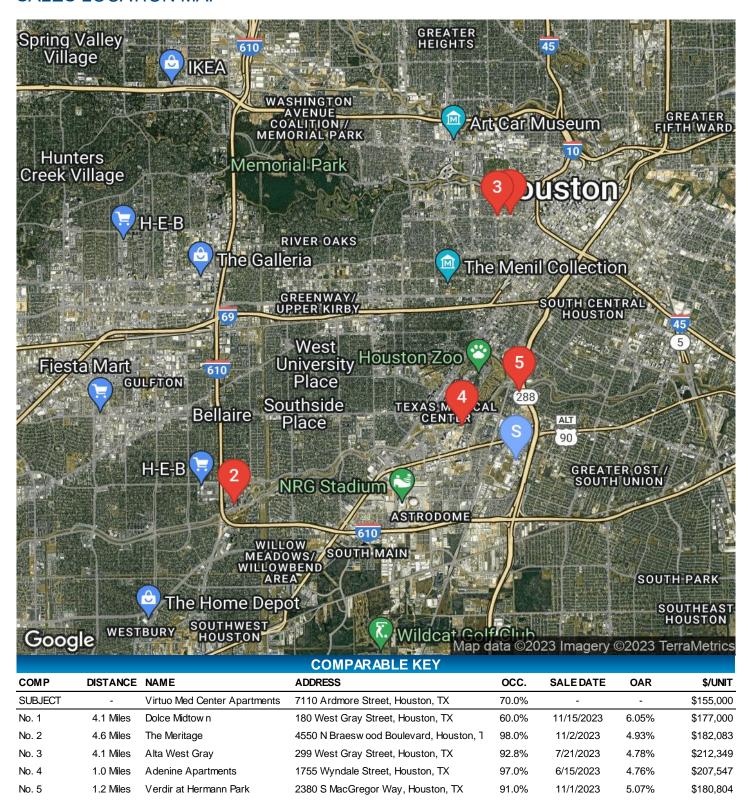

Quantitative percentage adjustments are also made for location and physical characteristics such as size, age, site and parking ratios, access, exposure, quality and condition, as well as other applicable elements of comparison. Where possible the adjustments applied are based on paired data or other statistical analysis. It should be stressed that the adjustments are subjective in nature and are meant to illustrate our logic in deriving a value opinion for the subject property.

PRESENTATION

The following Sales Summation Table, Location Map and datasheets summarize the improved sales data. Following these items, the comparable sales are adjusted for applicable elements of comparison and the opinion of value by the Sales Comparison Approach is concluded.

REMARKS

Dolce Midtown is a podium build midrise in the Montrose area of Houston that was built in 2019. The property was purchased by a joint venture between RailField and Artemis Partners. According to the confirming source the property never reached stabilized occupancy and had declined to 60% by the time of sale. We have projected a lease up cost / profit of \$1,320,000 and applied it to the reported sales price to reflect the properties value at stabilization. The confirming source stated that there was no true in place cap rate due to low occupancy but the buyer was underwriting a stabilized cap rate north of 6.0%. Our proforma cap rate is based on market rent and vacancy with tax and insurance adjusted expenses with reserves.

REMARKS

Verdir at Hermann Park is a first generation value add multifamily property near the Texas Medical Center. The property is currently under contract for \$40,500,000 and has an assumable 2.15% HUD loan which reportedly led to a lower cap rate. The reported in place cap rate was reported to be approximately 4.10%. The proforma cap rate was calculated by the appraiser using market rent and vacancy with tax and insurance adjusted expense with reserves.

Market Conditions Adjustment - Compound annual change in market conditions: 0%
 Date of Value (for adjustment calculations): 11/28/23

Comparable 1 was reportedly below stabilized occupancy prior to sale. We have applied a lease up cost plus profit adjustment based on the property's reported occupancy has sale. We note that comparable 1 represents podium style construction and as discussed below this property is in a significantly superior location that the subject, resulting in a lower lease up cost deduction.

Comparable 2 was sold as a market rent property and was priced by buyers assuming market rent operations. However, the buyer was able to secure an agreement to convert the property to a PFC structure whereby the property will purchased by the Houston Housing Authority and leased back to the buyer with rent set as a onetime payment of the purchase price. The property will operate with some affordable restrictions in exchange for being 100% exempt from property taxes. As a result, the buyer will be able to achieve an effective return greater than the property could have operating under typical operations. According to the listing broker this had a positive impact on the subject sales price. However, most buyers do not have the capacity to be awarded a PFC contract and therefore a typical PFC buyer would not pay more or less than the market rent value the property. This makes it difficult to quantity any adjustment for conditions to sale for the buyers PFC conversion. Therefore, we have applied no adjustment but given the sale secondary consideration in our value conclusion.

Comparable 5 is under contract to be sold with an assumable 2.15% HUD loan which is significantly below current interest rates which are reportedly around 6.0% based interviews with market participants. Therefore, we have applied a downward 5% adjustment for financing.

Location

The subject and all of the sales comparables are located within the Houston Urban Core within a reasonable distance to Downtown Houston. This makes it difficult to analysis these properties based on annual median income or area median home value given the overlap between the subject and comparable areas. Therefore, we have analyzed each properties walk score, transit score and bike score:

WALK SCORE - SALES COMPARABLES						
Property	Transit Score	Bike Score				
Dolce Midtow n	180 West Gray Street	83	72	60		
The Meritage	4550 N Braesw ood Boulevard	52	45	69		
Alta West Gray	299 West Gray Street	86	64	63		
Adenine Apartments	1755 Wyndale Street	29	68	79		
Verdir at Hermann Park	2380 S MacGregor Way	46	47	84		
Virtuo Med Center Apartments	7110 Ardmore Street	39	41	57		

Comparables 1 and 3 are located in the Montrose / Midtown area and have significantly higher walk scores than the subject due to the high concentration of supporting retail and restaurants in that area. Additionally, according to Costar, the Neartown / River Oaks submarket where these properties are located has an average rent of \$1,915 per month vs the Medical Cetner / West University submarket where the subject and remaining comparables are located at \$1,580 per month. Therefore, we have applied a downward 10% location adjustment to these sales.

Comparable 2 is located in Southwest Houston with strong access to the Meyerland Plaza shopping center as well as major retailers along the 610 Loop and has a stronger walk score than the subject. Therefore, it has been adjusted downward 5% for location.

Comparble 4 was analyzed in the rent comparable section of the appraisal. We have applied a downward 5% adjustment due to its superior location in the middle of the Texas Medical Cetner.

Comparable 5 is located north of the subject closer to downtown and the Museum District and has a slightly higher walk score. Therefore, it has been adjusted downward 5% of location.

SALES COMPARABLE ANALYSIS

Introduction

The comparable sales indicate an adjusted value range from \$145,999 to \$165,210/Unit, with a median of \$162,447/Unit and an average of \$157,393/Unit. The range of total gross adjustment applied to the comparables was from 20% to 30%, with an average gross adjustment across all comparables of 26%. The level of total adjustment applied to the comparables is considered minimal, an indication that the dataset is applicable to the subject and increases the credibility of the analysis. The adjustment process for each comparable sale is discussed in the following paragraphs.

Discussion of Adjustments

Comparable 1 (\$165,210/Unit as adjusted) required a total upward transaction adjustment of 4%. This considers the recent transaction date of this sale in November 2023, in addition to other transactional adjustments previously discussed in the Sales Approach (see data sheet for details). This comparable required a total downward adjustment of -10% for property characteristics. Dolce Midtown is a mid-rise complex that includes 201 multi-family units on 1.699 acres. It has a superior location in Houston, approximately 4.1 miles from the subject. Additionally, this comparable has an average unit size of 829 SF, which is similar to the average of the subject's units at 765 SF. Overall, this sale required adjustments for location, quality and unit mix/unit size. The total gross adjustment applied to this comparable was 24%. The moderate level of gross adjustments required for this comparable indicates that it can be adequately relied upon for valuation of the subject. This comparable is given primary consideration as a value indicator for the subject.

Comparable 2 (\$163,875/Unit as adjusted) required a total upward transaction adjustment of 0%. This considers the recent transaction date of this sale in November 2023. This comparable required a total downward adjustment of -10% for property characteristics. This mid-rise development is known as The Meritage. It includes 240 apartment units on 3.17 acres. It has a slightly superior location in Houston, approximately 4.6 miles from the subject. Additionally, this comparable has an average unit size of 914 SF, which is similar to the average of the subject's units at 765 SF. Overall, this sale required adjustments for location, unit mix/unit size and age. The total gross adjustment applied to this comparable was 20%. The moderate level of gross adjustments required for this comparable indicates that it can be adequately relied upon for valuation of the subject. This comparable is given secondary consideration as a value indicator for the subject.

Comparable 3 (\$162,447/Unit as adjusted) required a total downward transaction adjustment of -10%. This considers the transaction date of this sale approximately 5 months ago in July 2023. This comparable required a total downward adjustment of -15% for property characteristics. Alta West Gray is a mid-rise apartment complex that includes 166 dwelling units on 1.046 acres. It has a superior location in Houston, approximately 4.1 miles from the subject. Additionally, this comparable has an average unit size of 822 SF, which is similar to the average of the subject's units at 765 SF. Overall, adjustments to this sale are applied for differences in location and unit mix/unit size. The total gross adjustment applied to this comparable was 25%. The moderate level of gross adjustments required for this comparable indicates that it can be adequately relied upon for valuation of the subject. This comparable is given secondary consideration as a value indicator for the subject.

Comparable 4 (\$149,434/Unit as adjusted) required a total downward transaction adjustment of -10%. This considers the transaction date of this sale approximately 6 months ago in June 2023. This comparable required a total downward adjustment of -20% for property characteristics. This mid-rise development is known as Adenine Apartments. It includes 265 apartment units on 4.29 acres. It has a slightly superior location in Houston, approximately 1.0 miles from the subject. Additionally, this comparable has an average unit size of 1,026 SF,

which is slightly larger than the average of the subject's units at 765 SF. Overall, adjustments to this sale are applied for differences in location and unit mix/unit size. The total gross adjustment applied to this comparable was 30%. The substantial level of gross adjustments required for this comparable was justified due to the comparable's varying attributes. Considering these factors, this comparable is given primary consideration as a value indicator for the subject.

Comparable 5 (\$145,999/Unit as adjusted) required a total downward transaction adjustment of -5%. This considers the recent transaction date of this sale in November 2023. This comparable required a total downward adjustment of -15% for property characteristics. Verdir at Hermann Park is a mid-rise complex that includes 224 multi-family units on 2.664 acres. It has a slightly superior location in Houston, approximately 1.2 miles from the subject. Additionally, this comparable has an average unit size of 975 SF, which is similar to the average of the subject's units at 765 SF. Overall, we have applied adjustments to this sale for differences in location, quality, unit mix/unit size and age. The total gross adjustment applied to this comparable was 30%. The substantial level of gross adjustments required for this comparable was justified due to the comparable's varying attributes. Considering these factors, this comparable is given secondary consideration as a value indicator for the subject.

SALES COMPARISON APPROACH CONCLUSION

The comparable sales indicate an adjusted value range from \$145,999 to \$165,210/Unit, with a median of \$162,447/Unit and an average of \$157,393/Unit. Based on the results of the preceding analysis, Comparable 1 (\$165,210/Unit adjusted) and Comparable 4 (\$149,434/Unit adjusted) are given primary consideration for the subject's opinion of value. Comparble 1 was given primary consideration due to being the most recent transaction and comparable 4 was given primary consideration due to being located in the Medical Center. We note that compables 2 and 5, while also recent, were not given primary consideration due being PFC and having a below market assumable loan.

The following table summarizes the analysis of the comparables, reports the reconciled price per unit value conclusion, and presents the concluded value of the subject property.

INTRODUCTION

As previously discussed within the Valuation Methods section, the subject is valued as one marketable economic site in this appraisal. Land value is influenced by a number of factors; most prominent of which is development and use potential. These factors, as well as others, are considered in the following analysis.

UNIT OF COMPARISON

The most relevant unit of comparison is the price per square foot. This indicator best reflects the analysis used by buyers and sellers in this market for land with similar utility and zoning in this marketplace.

COMPARABLE SELECTION

A thorough search was made for similar land sales in terms of proximity to the subject, size, location, development potential, and date of sale. In selecting comparables, emphasis was placed on confirming recent sales of commercial sites that are similar to the subject property in terms of location and physical characteristics. Overall, the sales selected represent the best comparables available for this analysis.

ADJUSTMENT PROCESS

Quantitative adjustments are made to the comparable sales. The following adjustments or general market trends were considered for the basis of valuation.

Transactional Adjustments

Dollar adjustments to the comparable sales were considered and made when warranted for transactional adjustments in the sequence shown below:

Property Rights Transferred	The valuation	of the out	igat aita waa	completed on	a fac aima	a basia If
Proberty Rionis transierred	THE VAIDABOD	or me suo	ieci sile was	completed on	a ree simoi	e basis ii
r reporty raignite framerence	THO VAIGATION	OI TITO COD	loor one mac	oonipiotoa on	a loo olllipi	o bacio. II

warranted, leased fee, leasehold and/or partial interest land sales were adjusted

accordingly.

Financing Terms The subject site was valued on a cash equivalent basis. Adjustments were made

to the comparables involving financing terms atypical of the marketplace.

Conditions of Sale This adjustment accounts for extraordinary motivation on the part of the buyer or

seller often associated with distressed sales and/or assemblages.

Expenditures After Purchase Adjustments were applied if site conditions warranted expenditures on the part

of the buyer to create a buildable site. Examples include costs for razing preexisting structures, general site clearing and/or mitigation of environmental

issues.

Market Conditions Market conditions adjustments were based on a review of historical sale data,

market participant interviews and review of current versus historical pricing. Based on our research, the following table summarizes the market conditions

adjustment applied in this analysis.

MARKET CONDITIONS ADJUSTMENT				
Per Year As Of	November 2023	(As-ls)	0%	

The market has exhibited value stability during the time from the oldest sale date up through the effective valuation date; therefore a market conditions adjustment is not warranted.

Property Adjustments

Quantitative percentage adjustments are also made for location and physical characteristics such as size, shape, access, exposure, topography, zoning and overall utility. Where possible the adjustments applied are based on

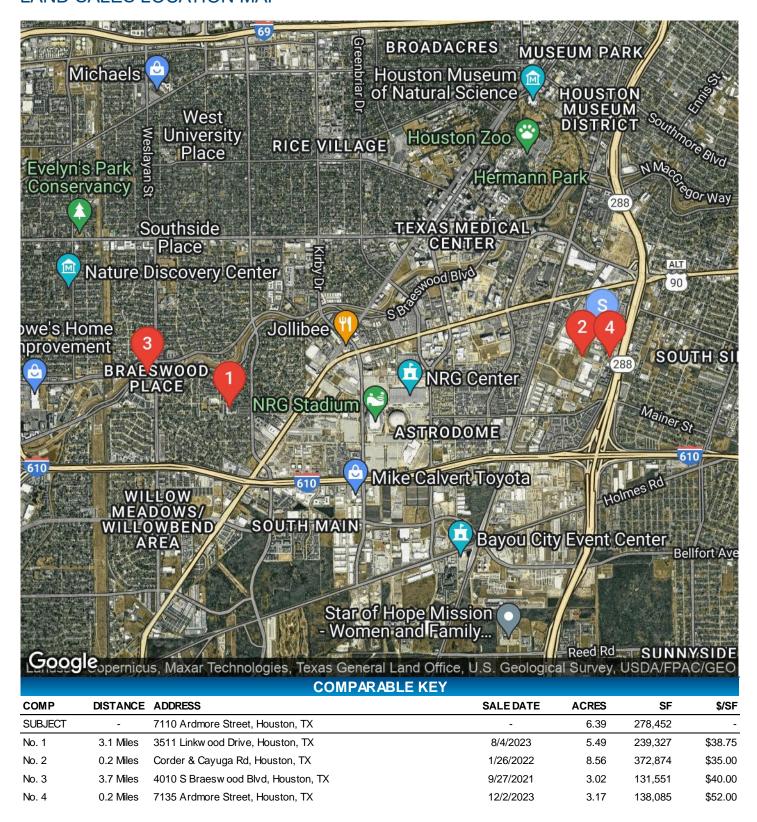

paired data or other statistical analysis. For example, location adjustments are based primarily on review of land values in the market areas for the comparables relative to the subject. It should be stressed that the adjustments are subjective in nature and are meant to illustrate our logic in deriving a value opinion for the subject site.

PRESENTATION

The following Land Sales Summation Table, Location Map and datasheets summarize the sales data used in this analysis. Following these items, the comparable land sales are adjusted for applicable elements of comparison and the opinion of site value is concluded.

REMARKS

This sale represents an approximately 5.494 acre site in South Braeswood that sold for a reported \$9,275,000. The property was improved with a church at the time of sale but was reportedly purchased for development. The site is primarily located in the 500 year flood plain with a portion located in the 100 year flood plain.

LAND SALES ANALYSIS

Introduction

The comparable land sales indicate an adjusted value range from \$31.50 to \$42.12/SF, with a median of \$37.44/SF and an average of \$37.13/SF. The range of total gross adjustment applied to the comparables was from 0% to 20%, with an average gross adjustment across all comparables of 10%. The level of total adjustment applied to the comparables is considered to be moderate. Overall, the availability of market data and extent of analysis was adequate to develop a reasonably credible opinion of land value. The adjustment process for each comparable land sale is discussed in the following paragraphs.

Discussion of Adjustments

Comparable 1 (\$34.88/SF adjusted) did not require any transaction adjustments. This comparable required a total downward adjustment of -10% for property characteristics. The total gross adjustment applied to this comparable was 10%. The minimal amount of gross adjustments required for this comparable suggests it is similar to the subject, increasing its applicability for this analysis. Overall this comparable warrants primary consideration as a value indicator for the subject.

Comparable 2 (\$31.50/SF adjusted) did not require any transaction adjustments. This comparable required a total downward adjustment of -10% for property characteristics. The total gross adjustment applied to this comparable was 10%. The minimal amount of gross adjustments required for this comparable suggests it is similar to the subject, increasing its applicability for this analysis. Overall this comparable warrants primary consideration as a value indicator for the subject.

Comparable 3 (\$40.00/SF adjusted) did not require any transaction adjustments. This comparable did not require any property characteristic adjustments. The total gross adjustment applied to this comparable was 0%. With no adjustments required, this comparable is viewed as a good substitute for the subject. For this analysis, this comparable commands primary consideration as a value indicator for the subject.

Comparable 4 (\$42.12/SF adjusted) required a total downward transaction adjustment of -10%. This comparable required a total downward adjustment of -10% for property characteristics. The total gross adjustment applied to this comparable was 20%. The moderate level of gross adjustments required for this comparable indicates that it can be adequately relied upon for valuation of the subject. This comparable is given secondary consideration as a value indicator for the subject.

CONTINUED

LAND VALUE CONCLUSION

The comparable land sales indicate an adjusted value range from \$31.50 to \$42.12/SF, with a median of \$37.44/SF and an average of \$37.13/SF. Based on the results of the preceding analysis, Comparable 1 (\$34.88/SF adjusted), Comparable 2 (\$31.50/SF adjusted) and Comparable 3 (\$40.00/SF adjusted) are given primary consideration for the subject's opinion of land value.

The following table summarizes the analysis of the comparables, reports the reconciled price per square foot value conclusion, and presents the concluded value of the subject site.

INTRODUCTION

The Cost Approach is a set of procedures through which a value indication is derived for the fee simple estate by estimating the cost new as of the effective date of the appraisal to construct a reproduction of (or replacement for) the existing structures,, including an entrepreneurial incentive; deducting depreciation from the total cost; and adding the estimated land value. The contributory value of any site improvements that have not already been considered in the total cost can be added on a depreciated-cost basis. Adjustments may then be made to the indicated value of the fee simple estate in the subject property to reflect the value of the property rights being appraised.⁶

REPLACEMENT COST ANALYSIS

The following cost approach to value was developed based on replacement cost analysis. Replacement Cost is defined as: The estimated cost to construct, at current prices as of a specific date, a substitute for a building or other improvements, using modern materials and current standards, design, and layout.⁷

Replacement cost includes both direct and indirect costs. Direct costs are expenditures for labor and materials used in the construction of improvements (also known as hard costs). Indirect costs are expenditures for items other than labor and materials that are necessary for construction, but are not typically part of the construction contract (also known as soft costs). Indirect costs often include real property taxes during construction, professional fees, permanent financing fees, leasing commissions, marketing costs and contingency.

Replacement Cost New (Buildings)

This section calculates the replacement cost new of the subject building improvements by estimating total direct and indirect costs to which an entrepreneurial profit incentive is applied. Two sources were selected to support direct and indirect costs: Marshall Valuation Service and cost comparables. This selection is appropriate considering the scope and intended use of the appraisal, and given that the subject improvements are new construction.

Marshall Valuation Service

Marshall Valuation Service is a comprehensive appraisal guide widely used throughout the United States for developing replacement costs and depreciated values of buildings and other improvements, and is largely considered the authority on building costs.

The table on the following page outlines the process we applied for developing replacement cost new of the subject building improvements with Marshall Valuation Service. First, the subject components were researched to identify the applicable base building costs per square foot. Next, the base building costs were adjusted for square foot refinements, height and size refinements, and current and local cost multipliers to determine an estimate of direct costs. After determining direct costs using Marshall Valuation Service, we then analyzed market evidence to estimate indirect costs. Finally, an appropriate developer's profit was applied to provide an indication of the replacement cost new.

FINAL TOTAL REPLACEMENT CO	OST NEW		\$45,302,659	\$1,432,973

¹Colliers International Estimate

Based on our research, indirect costs are typically 10% to 20% of direct cost for this type of development in the marketplace. Considering the size and project characteristics, we have estimated indirect costs at 15% of direct costs.

Entrepreneurial profit and overhead compensates the developer for project risk and management. It is unlikely that a developer would proceed with a development unless adequate profit is available to justify the effort. Based on anecdotal evidence provided by developers of similar Mid/High-Rise Housing projects, profit is typically based on a percentage of replacement cost, generally 10% to 30%, depending upon project size, location, marketability and risk. An entrepreneurial profit and overhead allocation of 20% was used in this analysis.

The replacement cost new as developed with Marshall Valuation Service is summarized in the following table.

REPLACEMENT COST NEW SUMMARY (BUILDINGS)									
MARSHALL VALUATION SERVICE									
Direct & Indirect Costs		\$38,946,360	\$126.38/SF						
Entrepreneurial Profit	@20%	\$7,789,272	\$25.28/SF						
TOTAL REPLACEMENT COST NEW (RCN)		\$46,735,632	\$151.66/SF						

Depreciation Analysis (Buildings)

The following table details the depreciation estimate developed for the subject building improvements.

DEPRECIATION ANALYSIS (BUILDING	S)	
	1	2
Component Description	Apartment	Clubhouse
TOTAL REPLACEMENT COST NEW	\$45,302,659	\$1,432,973
LESS: Physical Curable	\$0	\$0
LESS: Functional Curable	\$0	\$0
LESS: Functional Incurable	\$0	\$0
Subtotal Adjusted Replacement Cost New	\$45,302,659	\$1,432,973
Age/Life Analysis		
Economic Life	55	55
Effective Age	1	1
Remaining Economic Life	54	54
Percent Depreciated	1.8%	1.8%
LESS: Age/Life Depreciation	(\$823,685)	(\$26,054)
Adjusted Replacement Cost New	\$44,478,974	\$1,406,919
LESS: Economic Obsolescence (External) 0%	\$0	\$0
Depreciated Replacement Cost New (Buildings)	\$44,478,974	\$1,406,919

Our analysis of depreciation reflects physical and functional curable prior to consideration of physical and functional incurable items, which are treated as components of the age-life analysis. If applicable, economic obsolescence was independently estimated and deducted. For this analysis it is assumed that economic obsolescence was allocated solely to the improvements The depreciation analysis for the subject building improvements is summarized in the following table.

DEPRECIATION ANALYSIS SUMMARY (BUILDINGS)										
APPROACH	TOTAL	\$/UNIT	\$/SF							
TOTAL REPLACEMENT COST NEW	\$46,735,632	\$143,361	\$152							
LESS: Physical Curable	\$0	\$0	\$0							
LESS: Functional Curable	\$0	\$0	\$0							
LESS: Functional Incurable	\$0	\$0	\$0							
LESS: Age/Life Depreciation	(\$849,739)	(\$2,607)	-\$3							
LESS: Economic Obsolescence (External)	(\$7,100,000)	(\$21,779)	-\$23							
Depreciated Replacement Cost New (Buildings)	\$38,785,893	\$118,975	\$126							

Economic Obsolescence

Although we do not depreciate land, the site value is required in this analysis to arrive at the cost feasible NOI. Please see the chart the follows illustrating our calculation of the external obsolescence.

ECONOMIC OBSOLESCENCE	
Replacement Cost New of Improvements	\$46,735,632
Less: Depreciation	(\$849,739)
Depreciated RCN	\$45,885,893
Site Value	\$9,700,000
Depreciated Cost + Land Value	\$55,585,893
x Overall Capitalization Rate (OAR)	6.00%
Cost Feasible NOI	\$3,335,154
Less: Actual NOI	(\$2,907,488)
Income Loss	\$427,665
Divide by Overall Capitalization Rate (OAR) (Market Rate Scenario)	6.00%
ECONOMIC OBSOLESCENCE (ROUNDED)	\$7,100,000

The cost feasible NOI implies that the rental rates to support new construction need to be about \$1,985 per month. It should also be noted that this also factors in the land value which has been concluded considering the location. It is our conclusion that rental rates in-line with cost-feasible rates are not supported in the subject market area.

Site Improvements Replacement Cost

The replacement cost new of the subject site improvements is presented in the following table.

SITE IMPROVEMENTS REPLACEMENT COST NEW											
				TOTAL	INDIRECT	ADJUSTED	PROFIT	TOTAL			
ITEM	UNITS	AREA	RCN	RCN	15%	RCN	20%	RCN			
Site Improvements	SF	278,452	\$7.00	\$1,949,164	\$292,375	\$2,241,539	\$448,308	\$2,689,846			

The site improvements area was calculated based on the subject useable land area less the footprint of the buildings, or 278,452 SF. The replacement cost new was estimated at \$7.00/SF with support from Marshall Valuation Service and cost comparables. Allocations for indirect costs of 15% and profit of 20% were carried forward from the conclusions made within the analysis of building improvements.

The following table shows the estimated depreciation and the resulting depreciated replacement cost for the subject site improvements.

SITE IMPROVEMENTS DEPRECIATION											
		PHYS	FUNCT	ADJ	ECON	EFF	DEPREC	AGE/LIFE	ADJ	ECON OBS	DEPREC
ITEM	RCN	CURABLE	CURABLE	TOTAL	LIFE	AGE	%	DEPREC	TOTAL	0%	COST
Site Improvements	\$2,689,846	\$0	\$0	\$2,689,846	55	1	2%	(\$48,906)	\$2,640,940	\$0	\$2,640,940
Totals	\$2,689,846	\$0	\$0	\$2,689,846				(\$48,906)	\$2,640,940	\$0	\$2,640,940

Depreciation for physical and functional curable was noted in the schedule above. If applicable, economic obsolescence is independently estimated and deducted.

COST APPROACH CONCLUSION

The Cost Approach analysis and conclusion are presented in the following table.

Rounded to nearest \$100,000

INTRODUCTION

The Reconciliation of Value Conclusions is the final step in the appraisal process and involves the weighing of the individual valuation techniques in relationship to their substantiation by market data, and the reliability and applicability of each valuation technique to the subject property. Understanding the profiles of potential buyers and their typical reliance on each approach to value strongly influences the weighting process.

In the open market, the subject property type would command most interest from national buyers that are actively pursuing similar large investment properties. There is currently minimal buyer demand for substitute properties of the subject based on the volume of sale transactions and reports by buyers, sellers and other market participants during confirmation of market transactions. The most probable buyer is a national investor. The majority of the buyers in the market for class A properties in the Houston market are one who have the ability to secure a PFC agreement with the Housing Authority or are seeking properties with favorable assumable debt or value add upside.

Based on the overall quality of the data and analyses, and decision-making process of the typical buyer profile of the subject asset, the income approach warranted primary emphasis and the sales approach warranted secondary emphasis in developing our final opinions of market. The Cost Approach was included at the request of the client and was given minimal consideration over the income and sales approaches.

PRESENTATION OF VALUE CONCLUSIONS

Our opinion of value reflects current conditions and the likely actions of market participants as of the date of value. It is based on the available information gathered and provided to us, as presented in this report, and does not predict future performance. Changing market or property conditions can and likely will have an effect on the subject's value.

The following table summarizes our final opinions of the As-Is Market Value and Prospective Value Upon Stabilization of the subject property's leased fee interest. At the request of the client we have also completed an Insurable Replacement Cost Estimate.

ANALYSIS OF VALUE CONCLUSIONS								
VALUATION INDICES	MARKET VALUE AS-IS	PROSPECTIVE VALUE UPON STABILIZATION

This appraisal is subject to the following assumptions and limiting conditions:

- The appraisers may or may not have been provided with a survey of the subject property. If further verification is required, a survey by a registered surveyor is advised.
- We assume no responsibility for matters legal in character, nor do we render any opinion as to title, which is assumed to be marketable. All existing liens, encumbrances, and assessments have been disregarded, unless otherwise noted, and the property is appraised as though free and clear, under responsible ownership, and competent management.
- The exhibits in this report are included to assist the reader in visualizing the property. We have made no survey of the property and assume no responsibility in connection with such matters.
- > Unless otherwise noted herein, it is assumed that there are no encroachments, zoning, or restrictive violations existing in the subject property.
- The appraisers assume no responsibility for determining if the property requires environmental approval by the appropriate governing agencies, nor if it is in violation thereof, unless otherwise noted herein.
- > Information presented in this report has been obtained from reliable sources, and it is assumed that the information is accurate.
- This report shall be used for its intended purpose only, and by the party to whom it is addressed. Possession of this report does not include the right of publication.
- The appraisers may not be required to give testimony or to appear in court by reason of this appraisal, with reference to the property in question, unless prior arrangements have been made therefore.
- > The statements of value and all conclusions shall apply as of the dates shown herein.
- There is no present or contemplated future interest in the property by the appraisers which is not specifically disclosed in this report.
- Without the written consent or approval of the authors neither all, nor any part of, the contents of this report shall be conveyed to the public through advertising, public relations, news, sales, or other media. This applies particularly to value conclusions and to the identity of the appraisers and the firm with which the appraisers are connected.
- > This report must be used in its entirety. Reliance on any portion of the report independent of others, may lead the reader to erroneous conclusions regarding the property values. Unless approval is provided by the authors no portion of the report stands alone.
- The valuation stated herein assumes professional management and operation of the buildings throughout the lifetime of the improvements, with an adequate maintenance and repair program.
- The liability of Colliers International Valuation & Advisory Services, its principals, agents, and employees is limited to the client. Further, there is no accountability, obligation, or liability to any third party. If this report is placed in the hands of anyone other than the client, the client shall make such party aware of all limiting conditions and assumptions of the assignment and related discussions. The appraisers are in no way responsible for any costs incurred to discover or correct any deficiency in the property.
- The appraisers are not qualified to detect the presence of toxic or hazardous substances or materials which may influence or be associated with the property or any adjacent properties, has made no investigation or analysis as to the presence of such materials, and expressly disclaims any duty to note the degree of fault. Colliers International Valuation & Advisory Services and its principals, agents, employees, shall not be liable for any costs, expenses, assessments, or penalties, or diminution in value,

property damage, or personal injury (including death) resulting from or otherwise attributable to toxic or hazardous substances or materials, including without limitation hazardous waste, asbestos material, formaldehyde, or any smoke, vapors, soot, fumes, acids, alkalis, toxic chemicals, liquids, solids or gasses, waste materials or other irritants, contaminants or pollutants.

- The appraisers assume no responsibility for determining if the subject property complies with the *Americans with Disabilities Act (ADA)*. Colliers International Valuation & Advisory Services, its principals, agents, and employees, shall not be liable for any costs, expenses, assessments, penalties or diminution in value resulting from non-compliance. This appraisal assumes that the subject meets an acceptable level of compliance with *ADA* standards; if the subject is not in compliance, the eventual renovation costs and/or penalties would negatively impact the present value of the subject. If the magnitude and time of the cost were known today, they would be reduced from the reported value conclusion.
- An on-site inspection of the subject property was conducted. No evidence of asbestos materials on-site was noted. A Phase 1 Environmental Assessment was not provided for this analysis. This analysis assumes that no asbestos or other hazardous materials are stored or found in or on the subject property. If evidence of hazardous materials of any kind occurs, the reader should seek qualified professional assistance. If hazardous materials are discovered and if future market conditions indicate an impact on value and increased perceived risk, a revision of the concluded values may be necessary.
- A detailed soils study was not provided for this analysis. The subject's soils and sub-soil conditions are assumed to be suitable based upon a visual inspection, which did not indicate evidence of excessive settling or unstable soils. No certification is made regarding the stability or suitability of the soil or subsoil conditions.
- This analysis assumes that the financial information provided for this appraisal, including rent rolls and historical income and expense statements; accurately reflect the current and historical operations of the subject property.

INSURABLE REPLACEMENT COST

At the client's request, we have included an estimate of the insurable replacement cost estimate of the subject improvements, which represents the replacement cost new of the subject improvements, exclusive of land value and profit, and the costs associated with excavation, site work, foundations and architects fees. Insurance coverage is usually specific to a given project. We have not been provided with the specific policy requirements, which limit the reliability of the conclusion. Insurable replacement cost is a matter of underwriting as opposed to valuation. Users of this report should not construe the conclusion of insurable value to be an indication of market value. The insurable estimate is made using base costs and multiplier adjustments for market conditions and location from *Marshall Valuation Service*, which is assumed to accurately reflect replacement cost of the subject. We assume no liability as to the subject's insurable replacement cost and recommend that an estimate from a reputable insurance company be obtained if further assurance is required.

The following chart summarizes the insurable replacement cost estimate:

	INSURABLE REPLACEME	NT COST	
	MARSHALL VALUATION SERVICE DI	RECT COST	
Number of Buildings	2

November 20, 2023

Clay M. Roth, MAI Managing Director Colliers Valuation & Advisory Services 1233 West Loop South, Suite 900 Houston, TX 77027

Dear Mr. Roth:

Freddie Mac desires that CBRE (the "Appraiser" or the "Appraisers") provide it with real estate appraisal services and hereby authorizes Appraisers to complete a narrative format appraisal report on the property referenced below:

Virtuo Med Center Apartments

7110 Ardmore Street Houston, TX 77054

General Scope of Work

The purpose of the appraisal is to estimate the (1) As-Is Market Value, (2) Prospective Market Value Upon Stabilization; (3) Insurable Replacement Cost, in the referenced property. Any encumbrances such as encroachments, easements, title defects, deed restrictions, environmental issues, and the like, must be detailed and their impact on value considered. The appraiser will prominently discuss in the body of the report any hypothetical conditions or extraordinary assumptions (as defined and required by the Uniform Standards of Professional Appraisal Practice).

The appraisal report must be prepared in conformity with the current edition of the Uniform Standards of Professional Appraisal Practice (USPAP) as promulgated by the Appraisal Standards Board of the Appraisal Foundation and FIRREA Title XI, 12 CFR Part 323 (FDIC) and 12 CFR Part 34 (RTC), and the Code of Ethics & Standards of Professional Practice of the Appraisal Institute, and state so in the report. The appraisal must also conform to all of Freddie Mac's multifamily appraisal requirements, as outlined in Chapter 60 of its Seller/Servicer Guide.

The definition of market value must conform to that defined in the Federal Register, Vol. 55, August 22, 1990. Market value is defined as:

The most probable price which a property should bring in a competitive and open market under all conditions requisite to a fair sale, the buyer and seller each acting prudently and knowledgeably, and assuming the price is not affected by undue stimulus. Implicit in this definition are the consummation of a sale as of a specified date and the passing of title from seller to buyer under conditions whereby:

1. Buyer and seller are typically motivated.

- 2. Both parties are well informed or well advised and acting in what they consider their own best interest:
- 3. A reasonable time is allowed for exposure in the open market;
- 4. Payment is made in terms of cash in U.S. Dollars or in terms of financial arrangements comparable thereto; and
- 5. The price represents the normal consideration for the property sold, unaffected by special or creative financing or sales concessions granted by anyone associated with the sale.

Additional Scope Requirements:

- The rent comparables must be from the immediate vicinity of the subject and the market rent projections must be accompanied by a detailed description and analyses of the rationale used to determine market rent. Please discuss/analyze any rent premiums for "location" if any rent comparables are located adjacent to the Medical Center.
- John Burke and/or Clay Roth will do 100% of the comparable selection, due diligence, property inspection, analyses, value conclusions, and report write up.
- All expense conclusions must be supported by current expense comparables (within the last 6-12 months).

Appraisal Fee

The agreed upon fee for the completion of this assignment shall not exceed **\$4,000**, which is inclusive of all the Appraiser's costs associated with this engagement including, but not limited to, direct and indirect costs, personnel costs, all copying and reproduction costs, photography, travel, lodging, and meals, shipping, and mailing.

Be advised that time is of the essence and it is imperative the appraisal be completed by the agreed upon due date. The appraisal fee noted above will be reduced by a penalty of \$100.00 per business day after the original scheduled due date.

Delays that are out of your control must be communicated in writing to the undersigned for consideration, at its sole discretion, whether the due date will be modified and/or the late fee waived.

Due Date

The due date for the electronic copies is **December 5, 2023**. Electronic copies (in an unlocked PDF format) should be e-mailed to:

Christopher Alfaro@freddiemac.com

Note: Paper copies of the appraisal are not required.

Use of the Appraisal

Freddie Mac, its employees, agents, successors and assigns will be relying on this appraisal for asset management purposes, and/or for evaluating a request for an extension of credit (the "Mortgage Loan") to be secured by the property, and/or for loan origination, and/or for acquisition of an asset, and/or for any other purpose.

The following Intended User/Reliance Language must be included verbatim in the appraisal report:

"This report is for the use and benefit of, and may be relied upon by

- a) the Seller/Servicer, Freddie Mac and any successors and assigns ("Lender");
- b) independent auditors, accountants, attorneys and other professionals acting on behalf of Lender;
- c) governmental agencies having regulatory authority over Lender;
- d) designated persons pursuant to an order or legal process of any court or governmental agency;
- e) prospective purchasers of the Mortgage; and
- f) with respect to any debt (or portion thereof) and/or securities secured, directly or indirectly, by the property which is the subject of this report, the following parties and their respective successors and assigns:
 - any placement agent or broker/dealer and any of their respective affiliates, agents and advisors;
 - any initial purchaser or subsequent holder of such debt and/or securities;
 - any Servicer or other agent acting on behalf of the holders of such debt and/or securities;
 - any indenture trustee;
 - any rating agency; and
 - any institutional provider from time to time of any liquidity facility or credit support for such financings

In addition, this report, or a reference to this report, may be included or quoted in any offering circular, information circular, offering memorandum, registration statement, private placement memorandum, prospectus or sales brochure (in either electronic or hard copy format) in connection with a securitization or transaction involving such debt (or portion thereof) and/or securities."

Court Testimony

Freddie Mac has not requested the Appraiser's services for court testimony at this time. If assistance is required for court testimony, depositions, and the like, the applicable fees for court testimony and preparation will be negotiated at that time.

Inspection requirements

- See Scope of Work.
- All persons who sign the report are required to be appropriately certified in the state in which
 the property is located. Signatories to the report must provide their license/certification
 number and a copy of the applicable certificate within the Addendum of the report. The
 capacities of each person who assisted with the report should be identified in the Certification
 to the report.
- **Note:** As part of the engagement, we would ask that you do a final review on the report -- you don't have to inspect the property and would not be signing the report, but we would like to have you, as the signatory to this engagement letter, be the last set of eyes on the report to ensure that the requirements of the engagement letter have been met. You should be listed in the Certification as having contributed.
- The appraiser is expected to inspect all vacant units, down units, and at least one unit of each model type, up to a limit of 15 units. The appraiser should concentrate on first floor and top floor units and must note the inspected units in the appraisal report.
- All subject photographs should be taken at the time of inspection. Photographs of all comparables must be recent and taken by the appraiser or staff member. If the appraiser uses photographs taken by others, the date and source of the photographs must be indicated in the report.
- The appraiser should attempt to arrange for the inspection as soon as possible after the start of the assignment. Any delays outside the control of the appraiser must be communicated to Freddie Mac immediately.

Other valuation development requirements

Sales Comparison Approach

- The appraiser must not adjust the sale price of Sales Comparables to reflect the cost or
 prospective cost of capital expenditures undertaken after the sale if these expenditures were
 not a part of the original transaction and were not reflected in the actual sale price and/or
 pricing negotiations.
- The appraiser must not develop a net income multiplier analysis or use operating income as an adjustment in the Sales Comparison Approach. Typically, adjustments in the Sales Comparison

Approach should reflect specific characteristics that affects a property's income and/or marketability such as location, condition, size, level of operating expenses, quality of management, tenant mix, rent concessions, lease terms, and the like, not just that the resulting NOI is greater or lesser than the subject. That is, typically *an appraiser will discuss the causes of the differences in NOI*, not just that a difference exists.

A reasonable source of verification of the comparable sales' prices and financial information
must be included in the appraisal report, by name if available. For example, "local broker" or
"principal to the transaction" is too general and is not acceptable.

Income Approach

- The appraiser will analyze and discuss the differences, if any, between the subject's actual
 recent contract rents and the appraiser's estimate of the subject property's market rents, and
 their impact on the leased fee value of the property. And, if the appraiser's estimate of market
 rent is dissimilar to the recent leasing at the subject, the appraiser must provide an adequate
 discussion and explanation of the variance.
- The appraisal will have a specific discussion of the appraiser's analysis of the causes of subject property's occupancy issues, if any, and the prospect for achieving stabilized operations.
 Included in this discussion will be a supported estimate of the time-frame for achieving stabilized occupancy and the market-related and/or property-specific factors that support the appraiser's estimate.
- The estimated vacancy and collection loss must consider the subject property's historical operations, current operations of the property, rental comparables in the market area, and anticipated changes in regional market conditions.
- Operating expenses should be benchmarked against comparable properties in the subject's
 market area based on, at a minimum, both operating expenses per unit and operating expense
 ratio. As part of our review of this appraisal, we will evaluate the appraiser's estimate of
 operating expenses with and without property taxes and reserves, both on a per-unit and as a
 function of effective gross income (EGI), so the appraiser should consider this in their
 development of the appraisal.
- The appraisal will include a supported discussion, analysis, and derivation of the Appraiser's estimated capitalization rate by each of the following methods:
 - An analysis of comparable sales
 - Published sources (preferably more than one published data source, and preferably a source that focuses on the local market, not general national data)
 - Survey of local market participants (with date of survey and names/titles of the individuals surveyed),

- Band of Investment/Mortgage-Equity model (with specific reference to the sources of the financial data assumptions), and
- Debt Coverage Ratio model (again, with specific reference to the sources of the financial data assumptions).

<u>Note:</u> Exclusion of any of the above-referenced analytical methodologies for capitalization rate development must be discussed in detail in the appraisal, with advanced notification given to Freddie Mac (via the undersigned) prior to transmittal of the final report.

- Development of capitalization rates from Ackerson or Ellwood methodologies is not recommended for appraisals for Freddie Mac.
- A discounted cash flow analysis (DCF) is not necessary for this appraisal unless the property is not operating at stabilized operations or if it is the local market practice to include a DCF analysis in all reports. In any event, the cash flow period for the DCF should reflect the period necessary to achieve stabilized operations (discounting, monthly, quarterly, or annually, as best fits the lease-up scenario), unless local practice dictates otherwise. In lieu of a DCF analysis for an unstabilized property, the appraiser could consider the present value of lost revenue, operating expenses, and necessary repairs/renovations/alterations as adjustments to value.
 - Key assumptions used to develop this analysis must be adequately discussed and supported including rent and expense increases, discount rate, reversion capitalization rate, and absorption period.
 - If the property is not operating at stabilization, appropriate consideration must be given in each of the three approaches to value.

Miscellaneous reporting requirements

- Freddie Mac will provide the appraiser with all the property and financial information it has available with this engagement letter. An up-to-date rent roll and any other additional information required to complete the assignment must be obtained from property management.
- Insurable Value must be provided
- The Addenda of the report must include a copy of the subject's rent roll and historical financial statements that were used in the development of the Income Approach, as well as a copy of this engagement letter.
- Freddie Mac requires that the appraiser will produce draft and/or final signed electronic copies in unlocked PDF format. Paper copies are no longer required.
- The property's loan number or other Freddie Mac identifier must be referenced on all correspondence and on the title page of the appraisal.

• The appraiser will be provided with a property condition report. Please contact me if any significant deferred maintenance is observed during the site inspection.

The appraiser must report any environmental concerns commonly known in the geographic area where the property is located and any environmental concerns with the property's land or improvements observed during the appraiser's site inspection or known to the appraiser.

It is not acceptable for the appraiser to merely state that the appraiser did not notice any physical and/or environmental issues during their inspection; the appraiser must discuss the extent of the appraiser's inspection for these issues.

Appraisers must report the extent of their due diligence and describe their environmental observations, analysis and conclusions in the appraisal. It is not acceptable for the appraiser to only state that the appraiser is not qualified to detect environmental issues and thus has made no observations during their physical inspection of the property.

Any data provided by Freddie Mac, the property owner, the lender, or any other entity associated with the property, this engagement letter, or the request for bid is confidential and must be closely held by the appraiser. This data may not be disseminated in any way by the appraiser or used or published in any manner in any way including, but not limited to, subsequent property analyses, appraisal and/or consulting reports, articles, commentaries, advertising, publicity, and the like, without the written consent of the Freddie Mac Director of Multifamily Appraisals, whose authorization can be withheld at his/her sole discretion.

Freddie Mac shall, at its sole discretion, request revisions, alterations, additional analyses, data, and discussion, and/or edits of the appraisal from the Appraiser. In such an event, the Appraiser agrees to furnish Freddie Mac with a revised appraisal or Addendum (as agreed upon by Freddie Mac), and such revisions shall be completed and delivered to Freddie Mac within five (5) business days of the request to make the revision, at no cost to Freddie Mac. Freddie Mac's decision regarding compliance with the terms of this agreement and quality of the appraisal report(s) shall be final.

To receive payment, the appraiser must submit its invoice to the attention of the undersigned. Failure to submit all requested items will result in a delayed response.

Please contact Chris Alfaro (Christopher_Alfaro@freddiemac.com) or Gabrielle Riedy (Gabrielle_Riedy@freddiemac.com) if you have any questions regarding this assignment. Property contact information is as follows:

Please contact the Freddie Mac Appraisal Department for the property contact information.

<The remainder of this page intentionally left blank>

Acknowledgement

Please acknowledge receipt of this agreement and adherence to its terms by signing and returning an originally signed copy to the attention of the undersigned.

Thank you for your assistance in this matter. We look forward to working with you on this assignment.

Sincerely,

Chris Alfaro, MAI, AI-GRS

Valuation Glossary 2023

Unless specified otherwise, these definitions were extracted from the following sources or publications:

The Dictionary of Real Estate Appraisal, Seventh Edition, Appraisal Institute, Chicago, Illinois, 2022 (Dictionary).

Uniform Standards of Professional Appraisal Practice, 2020-2023 Edition (USPAP).

The Appraisal of Real Estate, Fifteenth Edition, Appraisal Institute, Chicago, Illinois, 2020 (15th Edition).

Absolute Net Lease

A lease in which the tenant pays all expenses including structural maintenance, building reserves, and management; often a long-term lease to a credit tenant. (Dictionary)

Ad Valorem Tax

A real estate tax based on the assessed value of the property, which is not necessarily equivalent to its market value. (15th Edition)

Arm's-length Transaction

A transaction between unrelated parties who are each acting in his or her own best interest. (*Dictionary*)

As-Is Market Value

The estimate of the market value of real property in its current physical condition, use, and zoning as of the appraisal date. (*Dictionary*)

Assessed Value

The value of a property according to the tax rolls in ad valorem taxation; may be higher or lower than market value, or based on an assessment ratio that is a percentage of market value. (Dictionary)

Average Daily Room Rate (ADR)

In the lodging industry, the net rooms revenue derived from the sale of guest rooms divided by the number of paid occupied rooms. (*Dictionary*)

Band of Investment

A technique in which the capitalization rates attributable to components of an investment are weighted and combined to derive a weighted-average rate attributable to the total investment. (Dictionary)

Cash-Equivalent Price

The sale price of a property that is equivalent to what a cash buyer would pay. (Dictionary)

Common Area

The total area within a property that is not designed for sale or rental but is available for common use by all owners, tenants, or their invitees, e.g., parking and its appurtenances, malls, sidewalks, landscaped areas, recreation areas, public toilets, truck and service facilities. (Dictionary)

Contract Rent

The actual rental income specified in a lease. (15th Edition)

Cost Approach

A set of procedures through which a value indication is derived for the fee simple estate by estimating the cost new as of the effective date of the appraisal to construct a reproduction of (or replacement for) the existing structure, including an entrepreneurial incentive; deducting depreciation from the total cost; and adding the estimated land value. The contributory value of any site improvements that have not already been considered in the total cost can be added on a depreciated-cost basis. Adjustments may then be made to the indicated value of the fee simple estate in the subject property to reflect the value of the property rights being appraised. (*Dictionary*)

Curable Functional Obsolescence

An element of depreciation; a curable defect caused by a flaw involving the structure, materials, or design, which can be practically and economically corrected. (*Dictionary*)

Debt Coverage Ratio (DCR)

The ratio of net operating income to annual debt service, which measures the relative ability of a property to meet its debt service out of net operating income; also called debt service coverage ratio (DSCR). (Dictionary)

Deferred Maintenance

Items of wear and tear on a property that should be fixed now to protect the value or income-producing ability of a property. (*Dictionary*)

Depreciation

In appraisal, a loss in the value of improvements from any cause; the difference between the cost of an improvement on the effective date of the appraisal and the value of the improvement on the same date. (*Dictionary*)

Direct Costs

Expenditures for the labor and materials used in the construction of improvements; also called *hard costs.* (*Dictionary*)

Discounted Cash Flow (DCF) Analysis

The procedure in which a discount rate is applied to a set of projected income streams and a reversion. The analyst specifies the quantity, variability, timing, and duration of the income streams and the quantity and timing of the reversion, and discounts each to its present value at a specified yield rate. (*Dictionary*)

Discount Rate

A rate of return on capital used to convert future payments or receipts into present value. (*Dictionary*)

Disposition Value

The most probable price that a specified interest in property should bring under the following conditions:

- 1. Consummation of a sale within a specified time, which is shorter than the typical exposure time for such a property in that market.
- 2. The property is subjected to market conditions prevailing as of the date of valuation.
- 3. Both the buyer and seller are acting prudently and knowledgeably.
- 4. The seller is under compulsion to sell.
- 5. The buyer is typically motivated.
- 6. Both parties are acting in what they consider their best interests.
- 7. An adequate marketing effort will be made during the exposure time.
- 8. Payment will be made in cash in U.S. dollars (or the local currency) or in terms of financial arrangements comparable thereto.
- 9. The price represents the normal consideration for the property sold, unaffected by special or creative financing or sales concessions granted by anyone associated with the sale.

This definition can also be modified to provide for valuation with specified financing terms. (*Dictionary*)

Easement

The right to use another's land for a stated purpose. Access or right-of-way easements may be acquired by private parties or public utilities. Governments may be the beneficiaries of easements placed on privately owned land that is dedicated to conservation, open space, or preservation. (15th Edition)

Economic Life

The period over which improvements to real estate contribute to property value. (*Dictionary*)

Effective Age

The age of property that is based on the amount of observed deterioration and obsolescence it has sustained, which may be different from its chronological age. (Dictionary)

Effective Date

The date on which the appraisal or review opinion applies (SVP) (Dictionary)

Effective Gross Income (EGI)

The anticipated income from all operations of the real estate after an allowance is made for vacancy and collection losses and an addition is made for any other income. (*Dictionary*)

Effective Gross Income Multiplier (EGIM)

The ratio between the sale price (or value) of a property and its effective gross income. (*Dictionary*)

Effective Rent

The total base rent, or minimum rent stipulated in a lease, over the specified lease term minus rent concessions - e.g. free rent, excessive tenant improvements, moving allowances, lease buyouts, cash allowances, and other lease incentives. (15th Edition)

Eminent Domain

The right of government to take private property for public use upon the payment of just compensation. The Fifth Amendment of the U.S. Constitution, also known as the *takings clause*, guarantees payment of just compensation upon appropriation of private property. (*Dictionary*)

Entrepreneurial Incentive

The amount an entrepreneur expects or wants to receive as compensation for providing coordination and expertise and assuming the risks associated with the development of a project. Entrepreneurial incentive is the expectation of future reward as opposed to the profit actually earned on the project. (*Dictionary*)

Entrepreneurial Profit

A market-derived figure that represents the amount an entrepreneur received for his or her contribution to a past project to compensate for his or her time, effort, knowledge, and risk; the difference between the total cost of a property (cost of development) and its market value (property value after completion), which represents the entrepreneur's compensation for the risk and expertise associated with development. An entrepreneur is motivated by the prospect of future value enhancement (i.e., the entrepreneurial incentive). An entrepreneur who successfully creates value through new development, expansion, renovation, or an innovative change of use is rewarded by entrepreneurial profit. Entrepreneurs may also fail and suffer losses. (Dictionary)

Excess Land

Land that is not needed to serve or support the existing use. The highest and best use of the excess land may or may not be the same as the highest and best use of the improved parcel. Excess land has the potential to be sold separately and is valued separately. (Dictionary)

Excess Rent

The amount by which contract rent exceeds market rent at the time of the appraisal; created by a lease favorable to the lessor and may reflect superior management, a lease execution in an earlier, stronger rental market, or an agreement of the parties. Due to the higher risk inherent in the receipt of excess rent, it may be calculated separately and capitalized or discounted at a higher rate in the income capitalization approach. (15th Edition)

Expense Stop

A clause in a lease that limits the landlord's expense obligation, which results in the lessee paying any operating expenses above a stated level or amount. (Dictionary)

Exposure Time

An opinion, based on supporting market data, of the length of time that the property interest being appraised would have been offered on the market prior to the hypothetical consummation of a sale at market value on the effective date of the appraisal. (USPAP)

Extraordinary Assumption

An assignment-specific assumption as of the effective date regarding uncertain information used in an analysis which, if found to be false, could alter the appraiser's opinions or conclusions. Uncertain information might include physical, legal, or economic characteristics of the subject property; or conditions external to the property, such as market conditions or trends; or the integrity of data used in an analysis. An extraordinary assumption may be used in an assignment only if:

- It is required to properly develop credible opinions and conclusions;
- The appraiser has a reasonable basis for the extraordinary assumption;
- Use of the extraordinary assumption results in a credible analysis; and
- The appraiser complies with the disclosure requirements set forth in USPAP for extraordinary assumptions. (USPAP)

External Obsolescence

A type of depreciation; a diminution in value caused by negative external influences and generally incurable on the part of the owner, landlord, or tenant. The external influence may be either temporary or permanent. There are two forms of external obsolescence: economic and locational. (*Dictionary*)

Fair Market Value

In nontechnical usage, a term that is equivalent to the contemporary usage of *market value*.

As used in condemnation, litigation, income tax, and property tax situations, a term that is similar in concept to market value but may be defined explicitly by the relevant agency or interpreted differently by court precedent. (Dictionary)

Feasibility Analysis

A study of the cost-benefit relationship of an economic endeavor. (USPAP)

Fee Simple Estate

Absolute ownership unencumbered by any other interest or estate, subject only to the limitations imposed by the governmental powers of taxation, eminent domain, police power and escheat. (*Dictionary*)

Floor Area Ratio (FAR)

The relationship between the above-ground floor area of a building, as described by the zoning or building code, and the area of the plot on which it stands; in planning and zoning, often expressed as a decimal, e.g., a ratio of 2.0 indicates that the permissible floor area of a building is twice the total land area. (Dictionary)

Functional Obsolescence

The impairment of functional capacity of improvements according to market tastes and standards. (*Dictionary*)

Functional Utility

The ability of a property or building to be useful and to perform the function for which it is intended according to current market tastes and standards; the efficiency of a building's use in terms of architectural style, design and layout, traffic patterns, and the size and type of rooms. (Dictionary)

Furniture, Fixtures, and Equipment (FF&E)

Business trade fixtures and personal property, exclusive of inventory. (Dictionary)

Going-concern

An established and operating business having an indefinite future life. (*Dictionary*)

Going-concern Value

An outdated label for the market value of all the tangible and intangible assets of an established and operating business with an indefinite life, as if sold in aggregate; more accurately termed the *market value of the going concern or market value of the total assets of the business. (Dictionary)*

Gross Building Area (GBA)

Total floor area of a building, excluding unenclosed areas, measured from the exterior of the walls of the above-grade area. This includes mezzanines and basements if and when typically included in the market area of the type of property involved. (*Dictionary*)

Gross Leasable Area (GLA)

Total floor area designed for the occupancy and exclusive use of tenants, including basements and mezzanines; measured from the center of joint partitioning to the outside wall surfaces. (*Dictionary*)

Gross Living Area (GLA)

Total area of finished, above-grade residential space area; calculated by measuring the outside perimeter of the structure and includes only finished, habitable, above-grade living space. (Finished basements and attic areas are not generally included in total gross living area. Local practices, however, may differ.) (Dictionary)

Highest & Best Use

The reasonably probable use of property that results in the highest value. The four criteria that the highest and best use must meet are legal permissibility, physical possibility, financial feasibility, and maximum productivity. The use of an asset that maximizes its potential and that is possible, legally permissible, and financially feasible. The highest and best use may be for continuation of an asset's existing use or for some alternative use. This is determined by the use that a market participant would have in mind for the asset when formulating the price that it would be willing to bid (IVS). (Dictionary)

Hypothetical Condition

A condition, directly related to a specific assignment, which is contrary to what is known by the appraiser to exist on the effective date of the assignment results, but is used for the purpose of analysis. Hypothetical conditions are contrary to known facts about physical, legal, or economic characteristics of the subject property; or about conditions external to the property, such as market conditions or trends; or about the integrity of data used in an analysis. (USPAP)

Income Capitalization Approach

In the income capitalization approach, an appraiser analyzes a property's capacity to generate future benefits and capitalizes the income into an indication of present value. The principle of anticipation is fundamental to this approach. Techniques and procedures from this approach are used to analyze comparable sales data and to measure obsolescence in the cost approach. (15th Edition)

Incurable Functional Obsolescence

An element of depreciation; a defect caused by a deficiency or superadequacy involving the structure, materials, or design that cannot be practically or economically corrected as of the effective date of the appraisal. (*Dictionary*)

Indirect Costs

Expenditures or allowances for items other than labor and materials that are necessary for construction, but are not typically part of the construction contract. Indirect costs may include administrative costs, professional fees, financing

costs and the interest paid on construction loans, taxes and the builder's or developer's all-risk insurance during construction, and marketing, sales, and lease-up costs incurred to achieve occupancy or sale. Also called *soft costs*. (Dictionary)

Interim Use

The use contemplated by the market participants that the subject real estate can be put to while waiting for certain subsequent factors to occur. (*Dictionary*)

Investment Value

The value of a property to a particular investor or class of investors based on the investor's specific requirements. Investment value may be different from market value because it depends on a set of investment criteria that are not necessarily typical of the market. (*Dictionary*)

Leased Fee Interest

The ownership interest held by the lessor, which includes the right to receive the contract rent specified in the lease plus the reversion right when the lease expires. (*Dictionary*)

Leasehold Estate

The right held by the lessee to use and occupy real estate for a stated term and under the conditions specified in the lease. (*Dictionary*)

Legal Nonconforming Use

A use that was lawfully established and maintained, but no longer conforms to the use regulations of its current zoning; sometimes known as a legally nonconforming use. (Dictionary)

Liquidation Value

The most probable price that a specified interest in property should bring under the following conditions:

- 1. Consummation of a sale within a short time period.
- 2. The property is subjected to market conditions prevailing as of the date of valuation.
- 3. Both the buyer and seller are acting prudently and knowledgeably.
- 4. The seller is under extreme compulsion to sell.
- 5. The buyer is typically motivated.
- 6. Both parties are acting in what they consider to be their best interests.
- 7. A normal marketing effort is not possible due to the brief exposure time.
- 8. Payment will be made in cash in U.S. dollars (or the local currency) or in terms of financial arrangements comparable thereto.
- 9. The price represents the normal consideration for the property sold, unaffected by special or creative financing or sales concessions granted by anyone associated with the sale.

This definition can also be modified to provide for valuation with specified financing terms. (*Dictionary*)

Market Area

The geographic region from which a majority of demand comes and in which the majority of competition is located. Depending on the market, a market area may be further subdivided into components such as primary, secondary, and tertiary market areas, or the competitive market area may be distinguished from the general market area. (Dictionary)

Market Rent

The most probable rent that a property should bring in a competitive and open market under all conditions requisite to a fair lease transaction, the lessee and lessor each acting prudently and knowledgeably, and assuming the rent is not affected by undue stimulus. (Dictionary)

Market Study

An analysis of the market conditions of supply, demand, and pricing for a specific property type in a specific area. (*Dictionary*)

Market Value (Most Common Non-FRT)

The most probable price, as of a specific date, in cash, or in terms equivalent to cash, or in other precisely revealed terms, for which the specified property rights should sell after reasonable exposure in a competitive market under all conditions requisite to a fair sale, with the buyer and seller each acting prudently, knowledgeably, and for self-interest, and assuming that neither is under undue distress. (Dictionary)

Market Value (Interagency Guidelines)

The most probable price which a property should bring in a competitive and open market under all conditions requisite to a fair sale, the buyer and seller each acting prudently and knowledgeably, and assuming the price is not affected by undue stimulus. Implicit in this definition is the consummation of a sale as of a specified date and the passing of title from seller to buyer under conditions whereby:

- 1. buyer and seller are typically motivated;
- 2. both parties are well informed or well advised, and acting in what they consider their own best interests:
- 3. a reasonable time is allowed for exposure in the open market;
- 4. payment is made in terms of cash in U.S. dollars or in terms of financial arrangements comparable thereto; and
- the price represents the normal consideration for the property sold unaffected by special or creative financing or sales concessions granted by anyone associated with the sale. (Interagency Appraisal and Evaluation Guidelines, Federal Register, December 10, 2010.

Marketability Analysis

The study of how a specific property is expected to perform in a specific market. A marketability analysis expands on a market analysis by addressing a specific property. (Dictionary)

Neighborhood Analysis

The objective analysis of observable or quantifiable data indicating discernible patterns of urban growth, structure, and change that may detract from or enhance property values; focuses on four sets of considerations that influence value: social, economic, governmental, and environmental factors. (*Dictionary*)

Net Net Net Lease

An alternative term for a type of net lease. In some markets, a net net lease is defined as a lease in which the tenant assumes all expenses (fixed and variable) of operating a property except that the landlord is responsible for structural maintenance, building reserves, and management. Also called *NNN lease*, *triple net lease*, or *fully net lease*. (Dictionary)

Net Operating Income (NOI)

The actual or anticipated net income that remains after all operating expenses are deducted from effective gross income but before mortgage debt service and book depreciation are deducted. Note: This definition mirrors the convention used in corporate finance and business valuation for EBITDA (earnings before interest, taxes, depreciation, and amortization). (15th Edition)

Obsolescence

One cause of depreciation; an impairment of desirability and usefulness caused by new inventions, changes in design, improved processes for production, or external factors that make a property less desirable and valuable for a continued use; may be either functional or external. (Dictionary)

Off-site Costs

Costs incurred in the development of a project excluding onsite costs such as grading and construction of the building and other improvements; also called *common costs* or *offsite improvement costs.* (Dictionary)

On-site Costs

Costs incurred for the actual construction of buildings and improvements on a particular site. (*Dictionary*)

Overage Rent

The percentage rent paid over and above the guaranteed minimum rent or base rent; calculated as a percentage of sales in excess of a specified breakeven sales volume. (15th Edition)

Overall Capitalization Rate (OAR)

The relationship between a single year's net operating income expectancy and the total property price or value. (Dictionary)

Parking Ratio

The ratio of parking area or parking spaces to an economic or physical unit of comparison. Minimum required parking ratios for various land uses are often stated in zoning ordinances. (Dictionary)

Potential Gross Income (PGI)

The total income attributable to property at full occupancy before vacancy and operating expenses are deducted. (Dictionary)

Potential Gross Income Multiplier (PGIM)

The ratio between the sale price (or value) of a property and its annual potential gross income. (*Dictionary*)

Present Value (PV)

The value of a future payment or series of future payments discounted to the current date or to time period zero. (*Dictionary*)

Prospective Opinion of Value

A value opinion effective as of a specified future date. The term does not define a type of value. Instead, it identifies a value opinion as effective at some specific future date. An opinion of value as of a prospective date is frequently sought in connection with projects that are proposed, under construction, or under conversion to a new use, or those that have not achieved sellout or a stabilized level of long-term occupancy. (*Dictionary*)

Qualitative Adjustment

An indication that one property is superior, inferior, or similar to another property. Note that the common usage of the term is a misnomer in that an adjustment to the sale price of a comparable property is not made. Rather, the indication of a property's superiority or inferiority to another is used in relative comparison analysis, bracketing, and other forms of qualitative analysis. (Dictionary)

Quantitative Adjustment

In the application of the sales comparison and income capitalization approaches, a numerical (dollar or percentage) adjustment to the sale price, rent, or expense amount of a comparable property to account for the effect on value of a difference between each comparable property and the subject property. (*Dictionary*)

Rentable Area

The amount of space on which the rent is based; calculated according to local practice. (*Dictionary*)

Replacement Cost

The estimated cost to construct, at current prices as of a specific date, a substitute for a building or other improvements, using modern materials and current standards, design, and layout. (*Dictionary*)

Replacement Cost for Insurance Purposes

The estimated cost, at current prices as of the effective date of valuation, of a substitute for the building being valued, using modern materials and current standards, design and layout for insurance coverage purposes guaranteeing that damaged property is replaced with a new property (i.e., depreciation is not deducted). (Dictionary)

Reproduction Cost

The estimated cost to construct, at current prices as of the effective date of the appraisal, an exact duplicate or replica of the building being appraised, using the same or similar materials, construction standards, design, layout, and quality of workmanship and embodying all the deficiencies, superadequacies, and obsolescence of the subject building. (Dictionary)

Retrospective Value Opinion

A value opinion effective as of a specified historical date. The term *retrospective* does not define a type of value. Instead, it identifies a value opinion as being effective at some specific prior date. Value as of a historical date is frequently sought in connection with property tax appeals, damage models, lease renegotiation, deficiency judgments, estate tax, and condemnation. Inclusion of the type of value with this term is appropriate, e.g., "retrospective market value opinion." (*Dictionary*)

Sales Comparison Approach

The process of deriving a value indication for the subject property by comparing sales of similar properties to the property being appraised, identifying appropriate units of comparison, and making adjustments to the sale prices (or unit prices, as appropriate) of the comparable properties based on relevant, market-derived elements of comparison. The sales comparison approach may be used to value improved properties, vacant land, or land being considered vacant when an adequate supply of comparable sales is available. (Dictionary)

Scope of Work

The type and extent of research and analysis in an appraisal or appraisal review assignment. Scope of work includes, but is not limited to:

The extent to which the property is identified;

The extent to which tangible property is inspected;

The type and extent of data researched; and

The type and extent of analysis applied to arrive at opinions or conclusions. (USPAP)

Shopping Center Types

Neighborhood Shopping Center: The smallest type of shopping center, generally with a gross leasable area of between 30,000 and 100,000 square feet. Typical anchors include supermarkets. Neighborhood shopping centers offer convenience goods and personal services and usually depend on a market population support of 3,000 to 40,000 people.

Community Shopping Center: A shopping center of 100,000 to 400,000 square feet that usually contains one junior department store, a variety store, discount or department store. A community shopping center generally has between 20 and 70 retail tenants and a market population support of 40,000 to 150,000 people.

Regional Shopping Center: A shopping center of 300,000 to 900,000 square feet that is built around one or two full-line department stores of approximately 200,000 square feet each plus small tenant spaces. This type of center is typically supported by a minimum population of 150,000 people.

Super-Regional Center: A large center of 600,000 to 2.0 million square feet anchored by three or more full-line department stores. This type of center is typically supported by a population area of 300,000 people. (15th Edition)

Sum of the Retail Values

The sum of the separate and distinct market value opinions for each of the units in a condominium; subdivision development, or portfolio of properties, as of the date of valuation. The aggregate of retail values does not represent the value of all the units as sold together in a single transaction; it is simply the total of the individual market value conclusions. An appraisal has an effective date, but summing the sales prices of multiple units over an extended period of time will not be the value on that one day unless the prices are discounted to make the value equivalent to what another developer or investor would pay for the bulk purchase of the units. Also called the aggregate of the retail values or aggregate retail selling price. (Dictionary)

Superadequacy

An excess in the capacity or quality of a structure or structural component; determined by market standards. (Dictionary)

Surplus Land

Land that is not currently needed to support the existing use but cannot be separated from the property and sold off for another use. Surplus land does not have an independent highest and best use and may or may not contribute value to the improved parcel. (Dictionary)

Tenant Improvements (TIs)

- 1. Fixed improvements to the land or structures installed for use by a lessee.
- 2. The original installation of finished tenant space in a construction project; subject to periodic change for succeeding tenants. (*Dictionary*)

Usable Area

The area that is actually used by the tenants measured from the inside of the exterior walls to the inside of walls separating the space from hallways and common areas. (Dictionary)

Useful Life

The period of time over which a structure or a component of a property may reasonably be expected to perform the function for which it was designed. (*Dictionary*)

Vacancy and Collection Loss

A deduction from potential gross income (*PGI*) made to reflect income deductions due to vacancies, tenant turnover, and nonpayment of rent; also called *vacancy and credit loss* or *vacancy and contingency loss*. (*Dictionary*)

Yield Capitalization

A method used to convert future benefits into present value by (1) discounting each future benefit at an appropriate yield rate, or (2) developing an overall rate that explicitly reflects the investment's income pattern, holding period, value change, and yield rate. (*Dictionary*)

Clay M. Roth, MAI

Area of Expertise

Clay M. Roth, MAI, joined Colliers Valuation & Advisory in 2023 and currently serves as a Multifamily Specialty Practice Co-Leader and Managing Director in the firm's Houston, Texas office. Clay has more than 30 years of real estate appraisal and consulting experience working for financial institutions, insurance companies, attorneys, federal agencies, operators, and developers.

Clay specializes in the valuation of investment-grade multifamily communities for institutional lenders. His experience includes all residential property types (low-rise, mid-rise and high-rise) ranging from standard, twostory, garden-style communities to luxury apartment complexes and student housing, both existing and proposed. Clay also has significant experience with Fannie Mae- and Freddie Mac-compliant assignments. This experience relates to numerous encumbered developments operating under the affordable housing programs for state, local and federal agencies for LIHTC, HUD Section 8, HOME, HAP, bond-financed communities and taxexempt, not-for-profit 501(c)(3) properties. Clay is also MAP-certified through the U.S. Department of Housing and Urban Development.

While he specializes in multifamily appraisal work, his valuation expertise encompasses a wide variety of including commercial asset types hospitality, office, retail, industrial, nursing homes, assisted living congregate care facilities, and specialpurpose facilities. He completes appraisal reports, appraisal reviews and market feasibility studies, and is also qualified as an expert witness in Civil and Federal Bankruptcy Courts in Houston, Texas.

Valuation & Advisory Services

Real estate valuations play a pivotal role in today's business climate. An accurate and well supported opinion of property value can mean the difference between reaching a critical goal—securing a loan, closing a sale, reporting to investors, choosing the best asset—or failing to achieve it altogether.

Colliers Valuation & Advisory Services' reports are designed to deliver insight into a property's fundamentals, its competition and the overall market dynamics affecting value. A solid valuation report can be a strategic asset for investors, lenders and owners, provided that it addresses both a property's unique characteristics and the most current market conditions.

Commitment to high-end client service, coupled with Colliers' unparalleled market intelligence and resources, differentiates us as the firm of choice in the real estate industry.

Professional

Our professionals share a commitment to deliver the highest level of service and consistent results. We go the extra mile for our clients, whether this means meeting a tight deadline or working with a complex and challenging property.

Technology

Our unmatched report creation technology speeds appraisals through the pipeline. This secure, centralized production system generates a wide range of reports and high volume portfolio orders without delays.

Information

Today's business climate places valuation in a more pivotal position than ever before. All our appraisals are evaluated and approved by an experienced review team to ensure our clients receive concise and timely appraisals. With clear, prompt reporting and a comprehensive, big picture approach, Colliers' valuation and advisory reports give our clients the information they need to make better business decisions.
